Your submission to Proposed National Policy Statement for Highly Productive Land

Emily McKay

Wa kato

New Zea and

Reference no: 7

Clause

What are the values and benefts assoc ated with highly productive and?

Notes

High y product ve and has the potent a to provide food crops to sustain the population in New Zea and, they can produce higher yelds of crops and food supply than product ve and used for farming, or unproduct ve and.

Clause

Does the RMA framework provide sufficient carty and direction on how highly productive and should be managed? Why/why not? **Notes**

No. The dea around "sustanable management" is not perceived the same for everyone, particularly farmers who do not think in long term especially for the environment or so i. Only in short term for money. The framework needs more specific guidelines for how this and should be managed (eg; maximum stocking rate, maximum fert is ser & irrigation applications, maximum grazing periods)

Clause

How s highly productive and currently considered when providing urban expansion? Can you provide examples?

Notes

It s considered to be the best option for urban expansion, however this and s completely wasted by one storey arge properties with huge backyards and driveways.

Clause

How shoud h ghy product ve and be considered when p ann ng for future urban expans on?

Notes

Houses should be building up - not out. More apartments with multiple levels, stop wasting land on a 5 bedroom one storey house with a garage as big as the house.

Clause

How should the tensions between primary production activities and potentially incompatible activities best be managed?

Notes

Have more ru es and regu at ons

Clause

Are you aware of other prob ems fac ng h gh y product ve and?

Notes

Poor so management. Need better mon tor ng of so qua ty to ensure so s managed appropriate y.
