Reference no: 17

Clause

What are the values and benefits associated with existing food growing hubs and how can these be maximised?

Notes

Knowing when food will be readily available is a benefit of an existing food growing hub and depending on the circumstances im sure there would be ways of maximising things ie if theres a demand for potatoes then grow more of them and less of something else.

Clause

What are the values and benefits associated with highly productive land?

Notes

Being able to produce great food better reliability and also confidence to invest.

Clause

Does the RMA framework provide sufficient clarity and direction on how highly productive land should be managed? Why/why not?

Notes

And where do i get this RMA framework stuff? neva mind , on doing a bit more reading you don't have to answer all the questions.

Clause

What is an appropriate and workable timeframe to allow councils to identify highly productive land and amend their policy statements and plans to identify that land?

Notes

Sound like that would almost have to be a case by case basis. there could be alot of factors to consider what makes a piece of highly productive land.
