Hi,

please find my submission attached.

I have been a soil scientist mapping soils for several decades. I was also regional council science manager and policy manger for 14 years. Now I'm a private contractor who maps soils for subdivision.

The current rules are not protecting high quality land and most councils (if not all) hare disinclined to actively apply their rules to protect them.

Form unambiguous rules are required.

Best regards

Dr Peter Singleton, Phone [REDACTED]
