Subject: Fwd: e-versions of final submission now include references to Attachment B
Date: Thursday, 10 October 2019 7:51:07 AM
Attachments: [D Hicks final HPL submission 2.5 & 7.9 added .doc](#)
[D Hicks final HPL attachment A.doc](#)
[D Hicks final HPL attachment B.doc](#)

Attn. Highly Productive Lands Team

Further to yesterday's email with an extra Attachment B, I've realised ... in the cold grey light of dawn ... that the main text of my submission should contain two references to the extra attachment.

To avoid any confusion about which e-version of the submission is final, I now attach :

* D Hicks final HPL submission 2.5 & 7.9 added.doc

* D Hicks final HPL attachment A.doc

* D Hicks final HPL attachment B.doc

Please substitute these for the e-versions previously emailed on Monday 7 & Wednesday 9 October.

With thanks,
Doug Hicks

Subject: Fwd: Extra attachment for submission on proposed NPS - highly productive land

Attn. Highly Productive Lands Team

I'd be grateful if you could please add a short extra attachment (identified as Attachment B) to the submission I emailed on Monday 7th October.

A signed copy of Attachment B will be couriered to you, although given irregularity in NZ Post's courier service, it may arrive after the 5 pm 10th October deadline.

Regards,

Douglas Hicks

Subject: Submission on proposed NPS - highly productive land

My signed submission and attachment, together with a covering letter, will be despatched tomorrow (8 October) to PO Box 2526 by NZ Post courier.

For ease of reproduction, electronic versions of the submission, attachment and letter are attached to this email. If any minor layout discrepancies when these documents roll off MPI's printer, please feel free to rectify so they match the posted copies.

Regards,

Douglas Hicks
