Swamp Kauri Information

Milling Swamp Kauri

Prohibitions under Section 67D of the Forests Act 1949 exist on milling indigenous swamp kauri timber, and require that:

- the sawmill must be registered in accordance with regulations made under section 72; and
- the timber has been or will be harvested from an area of land that is not indigenous forest land; or
- the timber has been or will be harvested from trees that have died from natural causes on land not subject to a registered sustainable management plan or permit, and that the forest's natural values will be maintained.

Exporting Swamp Kauri Products

The following swamp kauri products may be exported from New Zealand under Section 67C of the Forests Act 1949:

- Any finished or manufactured indigenous timber product, regardless of the source of the timber used in the product. This is defined as any indigenous timber product in its final shape ready to be installed or used without further processing. It may include a complete item or a component of an item (whether assembled or in kitset form) such as joinery, furniture, toys, tools, and household utensils. It does not include dressed or rough sawn timber (including veneer), mouldings, panelling, furniture blanks, joinery blanks, building blanks or similar items.
- Any personal effects.
- Any salvaged stump or salvaged root, whether whole or sawn, where the timber has been taken from an area that is not indigenous forest land.

A Notice of Intention to Export Swamp Kauri Form (ITE2) must be submitted to AsureQuality New Zealand for all exports of indigenous swamp kauri products.

Exporters are advised to ensure that all required documentation is complete and submitted at least 10 days prior to the date of shipping. This ensures that adequate time is available for inspecting the export consignment.

Meanings under the Forests Act 1949

Groundline: means the point at the base of the tree where the tree, when standing, commenced or commences to be naturally in contact with the ground.

Salvage: Trees felled to waste before 3 July 1989 or stumps or roots remaining from any trees felled before 3 July 1989. The timber must be taken from an area that is not indigenous forest land.

Stump (or Root): means the basal part of a tree, being the roots and that part of the trunk that extends from the groundline to a point (up the trunk) equal to the maximum diameter of the trunk.
