

## QUARTERLY PROGRESS SUMMARY: July - September 2016

### Summary of progress

- The number of products commercialised by ANZCO and TBE from the programme remains at 19.
- Of the 19 products commercialised to date, nine are food products, four are ingredients and 6 are healthcare products.
- ANZCO has identified three major new priority projects for 2017, including two food products and one healthcare product.
- Taranaki Bio Extracts (TBE) is investigating a new approach to recovering protein from waste streams. If successful, this approach will enable production of new value added products, and deliver environmental benefits.
- The complexities of exporting new products to new markets have continued to present problems for some outputs of the FoodPlus programme. In particular, a lack of clarity about regulations at the border, and inside some countries has caused significant problems.

### Key highlights and achievements

The highlight of the quarter was the identification of a key new Healthcare product for development.

### Upcoming

In the September to December quarter, two new food related projects will get under way.

### Investment

<b>Investment period</b>	<b>Industry contribution</b>	<b>MPI contribution</b>	<b>Total investment</b>
During this Quarter	\$0.359m	\$0.359m	\$0.717m
Programme To Date	\$7.89m	\$7.89m	\$15.8m
