**Full Report** of the 13<sup>th</sup> Session – [Link to Report & Agenda](#)

**Next Meeting:** 14<sup>th</sup> Session TBA

---

### **NZ Delegation Report of the 13<sup>th</sup> session of CCCF**

#### **Main outcome of importance to New Zealand were:**

- Endorsement by CCCF for the adoption of the guidelines developed by New Zealand for Rapid Risk Analysis following Instances of Detection of Contaminants in Food where there is No Regulatory Level.
- Agreement by CCCF for New Zealand to continue to chair the work on establishing Maximum Levels (MLs) for Methylmercury in further fish species.
- Conclusion of the review process for lead MLs with the endorsement of MLs in cattle, pork and poultry offal; and wine. New Zealand has contributed our domestic occurrence data to support this multi-year review process.
- Agreement to continue with development of guideline on data analysis for ML setting and to development of a forward work plan for the committee.
