

Cats and Dogs to Australia (OMAR)

AUPET9

Effective from 1 November 2023

TITLE

Animal Products Notice: Cats and Dogs to Australia (OMAR)

COMMENCEMENT

This Animal Products Notice comes into force on 1 November 2023

REVOCATION

This Animal Products Notice revokes and replaces:

- Dogs and Cats to Australia (OMAR) dated 1 March 2023

ISSUING AUTHORITY

This Animal Products Notice is issued under sections 167(1) and 60(1) of the Animal Products Act 1999.

Dated at Wellington, 20 October 2023

Introduction

This introduction is not part of the Animal Products Notice, but is intended to indicate its general effect.

Purpose

The purpose of this document is to set out the zoosanitary requirements necessary to export compliant cats and dogs from New Zealand to Australia.

Background

The Animal Products Act 1999 provides the controls and mechanisms needed to give and to safeguard official assurances or zoosanitary certificates to facilitate the entry of animal material including live animals, hatching eggs, semen and embryos, and products into overseas markets.

Notices issued as Overseas Market Access Requirements (OMARs) under section 60(1)(a) and (b) of the Animal Products Act specify the requirements that are necessary or desirable for the purpose of facilitating access to overseas markets or are in accordance with the requirements of the relevant authority of the importing country.

OMARs may also determine the form and content of the official assurances that can be issued for animal material or product, including live animals, hatching eggs, semen or embryos, which meet the specified requirements.

Where the OMAR determines the form and content of the official assurances, a separate export certificate template is available to authorised persons, recognised persons and registered exporters who have applied for access to the certificate templates, to facilitate the completion and issuing of the relevant official assurance. That template will be an amendable version of the form set in the OMAR.

Notices issued under section 60(1)(c) of the Animal Products Act to safeguard the assurances provided by New Zealand, and guidance in the form of Operational Codes, should be read in conjunction with this Notice.

Where the OMAR determines the requirements can be met without an official assurance, a separate pre-printed certificate is available from designated private veterinarians who are permitted to provide export certification for cats and dogs to Australia.

This OMAR specifies the requirements that must be met by exporters of cats and dogs to be exported from New Zealand to Australia and determines the form and content of the official assurance and the content of the pre-printed certificate that must accompany the cats and dogs to be exported.

By agreement with the Australian Government most cats and dogs can enter Australia without an official assurance issued by an Official Veterinarian employed by MPI. Instead export certificates for cats and dogs are routinely issued by veterinarians in private practice in New Zealand and approved by MPI for this purpose using pre-printed certificates. The approval mechanism of the registered veterinarians ensures the Australian Government continues to have confidence in the New Zealand certification system.

Notwithstanding that an official assurance is not required for the export of cats and dogs to Australia, there are specific circumstances agreed with the Australian Government where a MPI Official Veterinarian will be required to issue the required certification in place of an approved veterinarian.

The OMAR was issued after consultation with industry and the Australian Department of Agriculture, Fisheries and Forestry (DAFF). It is based on the previous OMAR: Dogs and Cats to Australia, dated 1 March 2023.

Who should read this Animal Products Notice?

Exporters of cats and dogs to Australia.

Why is this important?

This Notice is important because it sets out the requirements that need to be met so that the Director-General of the New Zealand Ministry for Primary Industries (MPI) can certify that the cats and dogs meet the requirements for export to Australia which New Zealand, in consultation with the government of Australia, has determined will apply. It should be noted that although the cats and dogs may comply with these requirements and be given a pre-printed export certificate (AUPET9) or an official assurance (by way of a certificate, AUPETO9), the importing country ultimately retains control over what cats and dogs it clears for entry.

Export non-conformances

Exporters should note that, under section 51 of the Animal Products Act 1999, where they have exported animal material or products, including live animals, hatching eggs, semen and embryos, that are refused entry by the foreign government they have a statutory duty to notify the Director-General of MPI not later than 24 hours after they have first knowledge of the event.

Liability

Section 61A of the Animal Products Act 1999 states that:

The Crown is not liable, and nor is the Director-General or any employee of the Ministry liable, for any loss arising through the refusal or failure of the relevant authority of an overseas market to admit export animal material or animal product to that market.

Related documents

OMAR documents can be downloaded from <https://www.mpi.govt.nz/export-requirements/omars-for-live-animals-semen-and-embryos/>

When you click on the + symbol on the right-hand side of any OMAR document, you can view the related information and documents.

The pre-printed export certificate (AUPET9) for this OMAR is supplied by the MPI contracted service provider to designated private veterinarians on request. A sample version is provided in Part 2 of this OMAR.

The official assurance export certificate (AUPETO9) for this OMAR is provided for in *Cats and Dogs to Australia (Export Certificate)*. The export certificate is password-protected through a RealMe® account. A sample version is provided in Part 3 of this OMAR.

Document History

Version Date	Section Changed	Change(s) Description
01 March 2023	All sections	<ul style="list-style-type: none">• New OMAR format• Updates to reflect the current name of the Australian competent authority.• Updates to reflect the current MPI logo and branding.• Minor grammatical and formatting updates.

	Veterinary certification	<ul style="list-style-type: none"> • Removal of <i>Ehrlichia canis</i> testing requirement. • Removal of the country disease status statement relating to <i>Ehrlichia canis</i>. • Addition of the specified route of administration for imidocarb dipropionate.
	Exporter declaration	<ul style="list-style-type: none"> • Residency period for imported cats and dogs has increased to 180 days. • The addition of a specific clause to facilitate the accurate certification of Bengal cats which have been granted permission for importation. Bengal cats are classed as a domestic/non-domestic hybrid and the class of domestic/non-domestic hybrid are prohibited for importation into Australia.
01 November 2023	All sections	<ul style="list-style-type: none"> • A separate Official Assurance (AUPETO9) has been agreed and issued under this OMAR to accompany cats and dogs which require MPI Official Veterinary certification. • The addition of the updated import requirement to facilitate treatment for <i>Babesia canis</i> administered by the intramuscular route

Part 1: Requirements

1.1 Application

- (1) This Notice applies to the export of cats and dogs from New Zealand to Australia.

1.2 Definitions

- (1) In this Notice, unless the context otherwise requires:

Act means the Animal Products Act 1999

Official Assurance means a zoosanitary export certificate which is issued by MPI Official Veterinarians.

Pre-Printed Export Certificate means an export certificate which is issued by designated Private Veterinarians.

- (2) Any term defined in the Act, the *Animal Products Notice: Official Assurances Specifications for Animal Material and Animal Products*, or the *Animal Products Notice: Specifications for Laboratories* and used in this Notice but not defined in this Notice, has the meaning given in the Act, or the Animal Products Notice, unless otherwise specified.

1.3 Requirements for export

- (1) Cats and dogs exported from New Zealand to Australia must be accompanied by either:
- A pre-printed export certificate (AUPET9) containing the information outlined in Part 2 of this Notice, or
 - an official assurance (AUPETO9) containing the information outlined in Part 3 of this Notice.

A sample version of the pre-printed export certificate (AUPET9) and the official assurance (AUPETO9) are included in Part 2 and 3 of this Notice.

- (2) Notwithstanding clause 1.3(1), the official assurance (AUPETO9) must be completed and issued by an Official Veterinarian when any of the following apply:
- a) The cat or dog has been issued with a dispensation or equivalence by the Australian Government and the certification must be amended.
 - b) It is a dog which has resided in mainland Africa and the treatment required in Part 2 and 3 was administered prior to import to New Zealand.
 - c) It is a dog which has ever resided in mainland Africa and the treatment required in Part 2 and 3 was administered in New Zealand.
 - d) The cat or dog is being exported to Australia for onward certification to another country within 30 days of arriving in Australia, using testing, vaccinations and/or treatments administered in New Zealand. Note that additional attestations may be required.

Guidance

Circumstances where it is advisable for the export certificate to be issued by an Official Veterinarian include, but are not limited to:

- The cat or dog is scheduled to reside in Australia for 30 days or less and then return to New Zealand.
- There is no Approved Veterinarian available to perform the standard certification.

1.4 Specific requirements for export using a pre-printed export certificate

- (1) A pre-printed export certificate (AUPET9) must be completed and issued by a veterinarian employed by a veterinary practice listed by MPI (<https://www.mpi.govt.nz/resources-and-forms/registers-and-lists/veterinary-practices-approved-for-certification-of-dogs-and-cats-to-australia/>) and who is authorised by the veterinary practice to certify cats and dogs to Australia.
- (2) In order to issue a pre-printed export certificate (AUPET9), the private veterinarian must be satisfied that:
 - a) The proposed shipment otherwise meets the requirements of this Notice.

1.5 Specific requirements for export using an official assurance

- (1) The official assurance (AUPETOA9) must be completed and issued by an authorised person.
- (2) In order to issue the official assurance (AUPETOA9), the authorised person must be satisfied that:
 - a) The proposed shipment otherwise meets the requirements of this Notice.

Part 2: Pre-Printed Export Certificate (AUPET9)

EXPORT CERTIFICATE

Cats and dogs from New Zealand to Australia

Certificate number AA

Ministry for Primary Industries
Manatū Ahu Matua

Exporter's declaration

I, _____, being the Owner ☐ Exporter ☐ Representative ☐ (tick as appropriate) do solemnly and sincerely declare, in relation to the cat or dog destined for export to Australia, and as identified below, that:

The animal is a: cat ☐ dog ☐ Sex: M ☐ F ☐ (tick as appropriate)

Name of animal: _____ **Colour:** _____ **Age:** ____ years ____ months

[illegible]

1. The identified animal was continuously resident in New Zealand since birth or since imported from Australia, or has resided in New Zealand for at least 180 days prior to the scheduled date of export and was not under any quarantine restriction during the 180 days before export.
2. The animal for export will be at least 8 weeks old at the time of export.
3. If the animal is **female**, it will not be more than 40 days pregnant, nor suckling young at the time of export.
4. The animal is not derived from a domestic/non-domestic hybrid. Refer to note 7.
5. In the case of a **cat** being a Bengal, I have sought and received permission by Department of Climate Change, Energy, the Environment and Water.
6. In the case of a **dog**, I have read and understood note 8 and the dog is not one of the restricted pure breeds mentioned.
7. In the case of a **dog**: *(tick only one point as appropriate)*

- ☐ has been continuously resident in New Zealand since birth
- ☐ has been continuously resident in New Zealand since imported from Australia
- ☐ has been continuously resident in New Zealand since import from a country other than Australia or the residency history is unknown (and has been resident in New Zealand for at least 21 days prior to the test for *Leishmania* as per clause 4 below)

8. In the case of a **dog**: it has been resident in mainland Africa (if known) ☐ (tick only if appropriate)

9. The residential address of the destination in Australia is:

9. My New Zealand address is:

10. Scheduled date of export: D D / M M M / Y Y Y Y

11. Scheduled flight number/ ship name: _____

If travelling by air, the animal will be transported in accordance with the container requirements specified in the International Air Transport Association (IATA) Live Animals Regulations.

Signature of Exporter: _____ **Date:** / /

Veterinary certification

I, _____, being a registered veterinarian approved to certify live cats and dogs to Australia, certify, after due enquiry with respect to the animal described above, that:

1. I have no reason to doubt the exporter's declaration.

2. New Zealand is free from rabies.

3. For dogs only, canine brucellosis (*Brucella canis*), leptospirosis (*Leptospira canicola*) and indigenous cases of, and established populations of competent vectors for leishmaniasis have not been confirmed in New Zealand during the 12 months prior to export.

4. In the case of a **dog**: (tick as appropriate)

EITHER ☐ I am satisfied by the exporter's declaration that the dog has been continuously resident in New Zealand since birth, or since it was imported from Australia:

OR ☐ The dog tested negative to an indirect fluorescent antibody test (IFAT) or an enzyme linked immunosorbent assay (ELISA) for *Leishmania infantum* on a blood sample collected after it has resided in New Zealand for at least 21 days.

Date of sample collection: D D / M M M / Y Y Y Y Test used: _____

5. In the case of a **dog** that has resided in mainland Africa (see clause 7 above), the dog has been treated for *Babesia canis* with imidocarb dipropionate: (tick as appropriate)

EITHER ☐ one treatment at 7.5 mg/kg bodyweight by subcutaneous injection;

OR ☐ two treatments at 6 mg/kg bodyweight by subcutaneous injection at an interval of two weeks.

6. The animal has been treated for external and internal parasites within 5 days of the scheduled time of export.

7. I have examined the animal for export and scanned and confirmed the microchip within 5 days of the scheduled time of export and have found the animal to be free from external parasites and clinical signs of infectious or contagious disease and fit to travel.

8. Additional health/treatment information is attached. (as appropriate)

MPI Practice Approval Number: _____ Practice name and address: _____

Telephone: _____ Email: _____

Signature of Veterinarian: _____ Date: D D / M M M / Y Y Y Y

Export certification notes

1. This certificate replaces that dated 1 July 2018.
2. For general enquiries regarding this export certificate, please contactASUREQuality on 0508 00 11 22 or email exports@asurequality.com
3. Ensure ALL parts of the certificate are filled out in accordance with the MPI requirements and guidance for Cats and Dogs to Australia. Where possible have the certificate peer reviewed for accuracy by a colleague prior to issuing to the exporter.
4. The Approved Veterinary Practice must email copies of completed export certificates within ten working days to exports@asurequality.com. Copies of the completed export certificate are not to be sent to the Ministry for Primary Industries.
5. A Permit to Import is not required from the Australian Department of Agriculture, Fisheries and Forestry (DAFF).
6. The exporter must give DAFF at least three days notice of the animal's arrival in Australia. This should be done by emailing the regional office in the state/territory in which the animal will first arrive in Australia. Current email addresses are available on the department's website: <http://www.agriculture.gov.au/cats-dogs/step-by-step-guides/category-1-new-zealand>
Information which must be included on the email include:
 - date and estimated time of arrival;
 - flight number or vessel name;
 - air waybill number;
 - a short description of the cat/dog including microchip number.
 - a contact phone number in New Zealand or Australia;
 - the address at which the animal is to reside in Australia;
 - whether the dog is an assistance dog.
7. In accordance with the Australian Environment Protection and Biodiversity Conservation Act 1999 (EPBC Act), cats and dogs derived from a domestic/non-domestic hybrid are not eligible for import to Australia. For dogs, this includes Czechoslovakian wolfdog or Czechoslovakian Vlcak, Saarloos wolfdog or Saarloos wolfhound, Lupo Italiano or Italian wolfdog and Kunming wolfdog or Kunming dog. For cats, this includes the Savannah cat - domestic cat (Felis catus) crossed with serval cat (Felis serval), Safari cat - domestic cat crossed with Geoffroy cat (Oncifelis geoffroyi), Chausie - domestic cat crossed with Jungle cat (Felis chaus) and Bengal cat - domestic cat crossed with Asian leopard cat (Prionailurus bengalensis). Note – in certain circumstances, the Department may permit the import of Bengal cats that are five generations or more removed from their wild ancestor. If you plan to import a Bengal cat, contact Department of Climate Change, Energy, the Environment and Water at exotic.species@dceew.gov.au to confirm your cat satisfies the requirements.
8. In accordance with the Customs (Prohibited Imports) Regulations 1956, the following pure breeds cannot be imported to Australia: Pit Bull Terrier or American Pit Bull, Japanese Tosa, Fila Brasileiro, Dogo Argentino, Perro de Presa Canario or Presa Canario. For more information on prohibited dog breeds, contact the Department of Home Affairs on +61 2 6264 1111 or 131 881 (within Australia).
9. A registered veterinarian approved by MPI to certify cats and dogs to Australia (Approved Veterinarian) must examine the animal and scan and confirm the microchip number prior to completing the export certificate.
10. At each veterinary visit, the animal's microchip must be scanned, and the microchip number must be correctly recorded on all documentation in accordance with the Animal Products Notice: Export Requirements for Live Animals Microchipping. For all testing, treatment, and examinations relevant for certification to Australia.
11. The exporter declaration must be completed in full at the time of certification and before the animals are examined by the Approved Veterinarian. If the owner is not present at the time of certification (i.e. the exporter declaration is signed by an exporter or representative) an owner's statutory declaration signed in the presence of a Justice of the Peace or other person authorised to take a statutory declaration, must be presented to the certifying veterinarian and kept on file.
12. The Approved Veterinarian should only sign the Export Certificate once the whole certificate, including the exporter declaration, has been completed and he/she has examined the animal and confirmed that it is fit to travel.
13. For dogs that require *Leishmania infantum* testing, the test must be done only after the dogs have been resident in New Zealand for a minimum of 21 days. This testing remains valid only if the dog is continuously resident in New Zealand from the sampling date until export to Australia.
14. Samples for *Leishmania infantum* testing are to be sent to the Animal Health Laboratory (IDC), Wallaceville. For enquiries, please contact the laboratory on 04 894 5600. Copies of the test results must be attached to this certificate.
15. All dogs which have resided in mainland Africa, must be prepared for export by the Approved Veterinarian, and will be certified by an Official MPI Veterinarian.
For dogs that have previously resided in mainland Africa, the dog was treated as in clause 5 of the veterinary certification, while the dog was resident in New Zealand or for the purpose of import into New Zealand/Australia.
16. Parasite treatment must be effective against internal (effective against nematodes and cestodes) and external parasites (that kills ticks and fleas on contact) using drugs registered for that purpose in New Zealand. As a general rule, oral external parasite treatments do not meet Australian import conditions and should therefore not be relied upon for exporting dogs and cats to Australia. The department's website includes a table of acceptable parasite treatments for use in preparing dogs and cats for export to Australia - <http://www.agriculture.gov.au/cats-dogs/step-by-step-guides/parasite-treatment>. The list is not exhaustive but where an exporter wishes to use an unlisted product, they should contact the department first to check that it will be appropriate.
17. Additional health information should include a letter on a practice letterhead detailing any health conditions of the animal that could affect its clearance in Australia, any laboratory results (*Leishmania infantum*) and previous export certificates which contain details of imidocarb dipropionate treatment.
18. Cats and dogs travelling by air must be transported to Australia in accordance with the container requirements specified in the International Air Transport Association (IATA) Live Animals Regulations. These specify, among other things that the container must: be strong enough to prevent the animal escaping, allow the animal to have enough space to turn around normally while standing, to stand and sit erect, and lie in a natural position. For more details regarding IATA regulations contact your airline. The IATA standards have been developed to prevent escape and injury during transportation. Assistance dogs may travel with their handler in the cabin – contact your airline for clarification of these requirements.
19. The MPI Approval Number is the number given to the MPI Approved Veterinary Practice where this veterinarian is approved to do this certification.
20. Documentation must be in order and all import requirements must be met.
21. The original export certificate must accompany the animal.
22. Any animal arriving in Australia having not met their requirements may be ordered into quarantine or re-shipped to New Zealand at the importer's expense.

Section 61A of the Animal Products Act states that 'The Crown is not liable, and nor is the Director-General or any employee of the Ministry liable, for any loss arising through the refusal or failure of the relevant authority of an overseas market to admit export animal material or animal product to that market'.

IV: SANITARY INFORMATION**VETERINARY CERTIFICATE**

I, the undersigned Official Veterinarian of the New Zealand Ministry for Primary Industries certify, after due enquiry, in regard to the animals described above, that:

1. COUNTRY/REGION DISEASE FREEDOM AND RESIDENCY

- 1.1 New Zealand is free from Rabies
- 1.2 Canine brucellosis (*Brucella canis*), leptospirosis (*Leptospira canicola*) and indigenous cases of, and established populations of competent vectors for leishmaniasis have not been confirmed in New Zealand during the 12 months prior to certification.
- 1.3 The animal has either:
- 1.3.1 continuously resided in New Zealand since birth^[1], or
 - 1.3.2 continuously resided in New Zealand since direct import from Australia^[1], or
 - 1.3.3 continuously resided in New Zealand, free from any quarantine restrictions, for at least 180 days prior to the scheduled date of export, and at any time during its lifetime, either^[1],
 - 1.3.3.1 has never resided in mainland Africa.^[1] or,
 - 1.3.3.2 has, or may have, resided in mainland Africa.^[1]

2. ANIMAL ELIGIBILITY, HEALTH AND WELFARE STATUS

- 2.1 The animal for export will be at least 8 weeks old at the scheduled time of export.
- 2.2 In the case of an entire **female** animal, it will not be more than 40 days pregnant, nor suckling young at the scheduled time of export.
- 2.3 To the best of my knowledge, and after due enquiry, the animal(s) is not derived from a domestic/non-domestic hybrid, other than a Bengal cat.
- 2.4 In the case of a **Bengal cat**, permission to import has been granted by the Department of Climate Change, Energy, the Environment and Water.
- 2.5 In the case of a **dog**, to the best of my knowledge, and after due enquiry, it is not one of the restricted pure breeds.
- [2.6 In the case of a **dog** that has not resided in New Zealand since birth or since import from Australia, it has tested negative to an indirect fluorescent antibody test (IFAT) or an enzyme linked immunosorbent assay (ELISA) for *Leishmania infantum* on a blood sample collected after it has resided in New Zealand for at least 21 days without quarantine restrictions. Laboratory results are attached.
- Date of sample collection:** **Test used:**
- [2.7 In the case of a **dog** that has, or may have, resided in mainland Africa, it has been treated for *Babesia canis* with imidocarb dipropionate with either:
- [(i) one treatment at 7.5 mg/kg bodyweight by subcutaneous or intramuscular injection] ^[1]
 - or
 - [(ii) two treatments at 6 mg/kg bodyweight by subcutaneous or intramuscular injection at an interval of two weeks]]^[1]

Certificate number:

- 2.8 The animal has been treated for external and internal parasites within 5 days of the scheduled time of export.

2.8.1 External Parasite Treatment

Name of product	Active ingredient(s)	Date of treatment

2.8.2 Internal Parasite Treatment

Name of product	Active ingredient(s)	Date of treatment

- 2.9 I have examined the animal for export and scanned and confirmed the microchip within 5 days of the scheduled time of export and have found the animal to be free from external parasites and clinical signs of infectious or contagious disease and fit to travel.
- 2.10 If travelling by air, provisions are in place for the animal to be transported in accordance with the container requirements specified in the International Air Transport Association (IATA) Live Animals Regulations.
