

QUARTERLY PROGRESS SUMMARY: Q4 April - June 2018

Ballance Clearview Innovations

Summary of progress during this quarter

- Novel N product concepts in trial for final efficacy screening
- Biofertiliser field trial established in Canterbury to validate previous field work
- MitAgator tool launched at Te Papa on 7 June
- Video collateral supporting MitAgator tool completed
- Tools including Mitigator and N-Guru featured at Ballance Mystery Creek National Fieldays site
- Release of two new extension podcasts

Key highlights and achievements

- Hon Damien O'Connor, Minister of Primary Industries launched the MitAgator tool at Te Papa on 7 June. Over 130 guests attended presentations by Mark Wynne Ballance CEO and Dr Richard McDowell from AgResearch. Guests were regional council staff and councillors, primary sector representatives, central government staff, scientists and farmers.
- Landcorp Farming conference presentations on Ballance PGP tools
- N Guru tool profiled at Owl Farm Open day

Upcoming

- Effort will be concentrated on the completion of existing projects and communication about these with stakeholders
- There will also be a focus on the wind-down of the programme and preparation of the final report.
