

Biosecurity New Zealand

Ministry for Primary Industries
Manatū Ahu Matua

THANK YOU

Biosecurity New Zealand and the horticulture industry thank you for your patience and co-operation during the recent Queensland fruit fly operation in your neighbourhood.

There have been no more Queensland fruit fly detected and that means there are no longer any restrictions on moving fruit and vegetables within your area.

Ensuring this pest hadn't established here was critical as it could have severely damaged our horticultural industry and home gardens.

We'll still be keeping a routine eye out for this pest using fruit fly traps. In the very unlikely event you find maggots in fruit, or find something you suspect to be a fruit fly, please contact our **Pest and Disease hotline 0800 80 99 66.**

Once again thank you for your support. We couldn't have done it without you. It takes all of us to protect what we've got.

KO TĀTĀOU THIS IS US
