

Have you seen any of these signs?

- Symptoms include drooling, limping and blisters on lips and tongue
- Affects cattle, pigs, sheep, deer and goats
- Highly infectious – any outbreak will badly damage our economy, affecting jobs and livelihoods of many New Zealanders
- If you suspect you have seen FMD on your site tell the Verification Services vet on duty or the Senior AsureQuality inspector urgently
- Or call **0800 80 99 66**

One day old blister which burst when tongue was pulled down.

Cattle tongue with three day old blister which has resulted in loss of tongue surface.

Two day old blister on dental pad of a sheep. Note that signs in sheep are often easy to miss.

Two day old blister on a sheep tongue.

Steers foot with three day old burst blister on heel.

Pig's feet with six day old blisters and skin loss around hooves and heels.

If you suspect you have seen foot-and-mouth disease,
call the MPI Exotic Pest and Disease Hotline immediately
