1.2 Definitions	6
1.3 Requirements for export	7
1.4 Specific requirements for the zoosanitary certificate	7
Part 2: Zoosanitary Certificate – Non-Commercial Movement	11
Part 3: Zoosanitary Certificate – Commercial Movement	18

Introduction

This introduction is not part of the Animal Products Notice, but is intended to indicate its general effect.

Purpose

The purpose of this document is to set out the zoosanitary requirements necessary to export compliant dogs and cats from New Zealand to Great Britain.

Background

The Animal Products Act 1999 provides the controls and mechanisms needed to give and to safeguard official assurances or zoosanitary certificates to facilitate the entry of animal material including live animals, hatching eggs, semen and embryos, and products into overseas markets.

Notices issued as Overseas Market Access Requirements (OMARs) under section 60(1)(a) and (b) of the Animal Products Act specify the requirements that are necessary or desirable for the purpose of facilitating access to overseas markets or are in accordance with the requirements of the relevant authority of the importing country.

OMARs may also determine the form and content of the official assurances that can be issued for animal material or product, including live animals, hatching eggs, semen or embryos, which meet the specified requirements.

Where the OMAR determines the form and content of the official assurances, a separate export certificate template is available to authorised persons, recognised persons and registered exporters who have applied for access to the certificate templates, to facilitate the completion and issuing of the relevant official assurance. That template will be an amendable version of the form set in the OMAR.

Notices issued under section 60(1)(c) of the Animal Products Act to safeguard the assurances provided by New Zealand, and guidance in the form of Operational Codes, should be read in conjunction with this Notice.

This OMAR specifies the requirements that must be met by exporters of dogs and cats to be exported from New Zealand to Great Britain and determines the form and content of the official assurance that must accompany the dogs and cats to be exported. It is based on the Great Britain requirements and retained *EU Animal Health Law* as written in:

(1) **Non-commercial certificate:**

Great Britain Pet Health Model Certificate (in accordance with Regulation (EU) No. 576/2013)
[Regulation \(EU\) No. 576/2013](#)
[Commission Implementing Regulation \(EU\) No. 577/2013](#)
[Commission Delegated Regulation \(EU\) 2018/772](#)

(2) **Commercial certificate:**

GBHC640 v 1.0, Aug 23 (Great Britain model certificate)
[Regulation \(EU\) No. 576/2013](#)
[Regulation \(EU\) No. 2016/429](#)
[Commission Implementing Regulation \(EU\) No. 577/2013](#)
[Commission Delegated Regulation \(EU\) 2018/772](#)
[Commission Delegated Regulation 2020/692](#)

Who should read this Animal Products Notice?

Exporters of dogs and cats to Great Britain.

Why is this important?

This Notice is important because it sets out the requirements that need to be met so that the Director-General of the New Zealand Ministry for Primary Industries (MPI) can certify that the dogs and cats meet the requirements for export to Great Britain which New Zealand, has determined will apply. It should be noted that although the dogs and cats may comply with these requirements and be given an official assurance (by way of a certificate), the importing country ultimately retains control over what dogs and cats it clears for entry.

Document History

Version Date	Section Changed	Change(s) Description
26 January 2021	All sections	- New OMAR as Great Britain have left the European Union but have retained <i>EU Animal Health Law</i>. - New OMAR format.
04 November 2022	All sections	- New Requirements and model export certificate to support commercial movements as written in <i>GBHC157X v3.1, September 2022</i>. - The removal of ferrets from the OMAR, as ferrets in New Zealand do not comply with <i>Commission Delegated Regulation 2020/692</i>, Article 6, paragraph 2. - Extensive background formatting to the certificate templates to facilitate accurate and concise data entry.
01 March 2024	All sections	- New document references and a new model export certificate to support commercial movements as written in <i>GBHC640 v1.0, Aug 2023</i>. - Minor update to the effective date of the non-commercial model template to align with the date of this OMAR and the updated commercial model certificate.

Other information

Export non-conformances

Exporters should note that, under section 51 of the Animal Products Act 1999, where they have exported animal material or products, including live animals, hatching eggs, semen and embryos, that are refused entry by the foreign government they have a statutory duty to notify the Director-General of MPI not later than 24 hours after they have first knowledge of the event.

Liability

Section 61A of the Animal Products Act 1999 states that:

The Crown is not liable, and nor is the Director-General or any employee of the Ministry liable, for any loss arising through the refusal or failure of the relevant authority of an overseas market to admit export animal material or animal product to that market.

Related documents

OMAR documents can be downloaded from <https://www.mpi.govt.nz/export-requirements/omars-for-live-animals-semen-and-embryos/>

When you click on the + symbol on the right-hand side of any OMAR document, you can view the related information and documents (guidance document and export certificate template).

The export certificates for this OMAR are provided for in *Dogs and Cats {Purpose} to Great Britain (Export Certificate)*. The export certificates are password-protected through a RealMe® account.

Part 1: Requirements

1.1 Application

- (1) This Notice applies to the export of dogs (*Canis lupus familiaris*) and cats (*Felis silvestris catus*) from New Zealand to Great Britain.
- (2) Ferrets (*Mustela putorius furo*) are excluded from this OMAR, as New Zealand does not meet the necessary requirement to allow the export of ferrets from New Zealand to the European Union (Commission Delegated Regulation 2020/692, Article 6, paragraph 2).
- (3) Great Britain being:
 - a) England, Wales and Scotland
 - b) The Channel Islands
 - c) Isle of Man
 - i) Northern Ireland is not part of Great Britain and under the Brexit Northern Ireland Protocol will remain aligned with EU requirements.
 - ii) For exports to Northern Ireland refer to the *Animal Products Notice: Dogs and Cats to the European Union (OMAR)*.
- (4) Dogs and cats travelling on a non-commercial certificate.
- (5) Dogs and cats travelling on a commercial certificate.
- (6) F1 hybrid dog or cats cannot enter Great Britain under the scope of Retained EU Regulation 576/2013.
- (7) Dog breeds prohibited from Great Britain:
 - Pit Bull Terrier
 - Japanese Tosa
 - Dogo Argentino
 - Fila Brasileiro.

1.2 Definitions

- (1) In this Notice, unless the context otherwise requires:

Act means the Animal Products Act 1999.

Cat means a kept animal of the *Felis silvestris catus* species.

Commercial movement means any movement which does not fit the definition of a non-commercial movement. More information advising which animals should use the commercial certificate can be found in the accompanying *Guidance Document*.

HS code means harmonised system and is a 6-digit customs/tariff designation.

Identification system means microchip transponder.

Code means the code as it appears in *Column 2 of Part 1 of Annex VIII, to Commission Implementing Regulation (EU) 2021/404*.

Dog means a kept animal of the *Canis lupus familiaris* species.

ISO stands for the International Organisation for Standardisation.

Means of transport means the transport method used to export the animal from New Zealand to the first entry border control post in Great Britain.

Non-commercial movement means any movement which does not have as its aim either the sale or the transfer of ownership of a pet animal and is part of the movement of the pet owner (either under his or her direct responsibility; or under that of a responsible natural person, in cases where the pet animal

is physically separated from the pet owners). More information advising which animals should use the commercial certificate can be found in the accompanying Guidance Document.

Owner means a natural person indicated as the owner in the identification document.

Pet animal means a dog or cat accompanying its owner or a responsible natural person during non-commercial movement, and which remains for the duration of such non-commercial movement under the responsibility of the owner or the responsible natural person.

Responsible natural person means any natural person who has authorisation in writing from the pet owner to carry out the non-commercial movement of the pet animal on behalf of the pet owner.

Transit is defined under [Regulation \(EU\) 2017/625 of the European Parliament and of the Council of 15 March 2017 \(Article 3\(44\)\)](#). The act of landing and departing from an airport is not considered to be transport through the country that the airport is located in for the purpose of this definition. Dogs and cats can be transported by air even when that aircraft lands at a port in a third country not listed by the EU provided the animals do not clear customs supervision.

Transhipped is defined under [Commission Delegated Regulation \(EU\) 2019/2124 of 10 October 2019 \(Article 2 \(2\) “consignments of animals or goods entering the Union by sea or by air transport from a third country when those animals or goods are moved from vessels or aircraft and are transported under customs supervision to another vessel or aircraft in the same port or airport in preparation for onward travel”](#).

Transponder means a read-only passive radio frequency identification device (microchip).

Registration/Approval number means the registered exporters approved registration code, assigned by the Competent Authority of New Zealand.

- (2) A term used in this Notice that is defined in the Act or the following Notices (or their successors) has the meaning given to it in the Act or that Notice:
- a) [Animal Products Notice: Official Assurances Specifications for Animal Material and Animal Products](#).

1.3 Requirements for export

- (1) Dogs and cats exported from New Zealand to Great Britain must be accompanied by an official assurance in the form of a zoosanitary certificate, a sample version of which is included in Part 2.
- (2) A zoosanitary certificate must be completed and issued by an authorised person.
- (3) In order to issue a zoosanitary certificate, the authorised person must be satisfied that the proposed shipment otherwise meets the requirements of this Notice.

1.4 Specific requirements for the zoosanitary certificate

1.4.1 Rabies Vaccination

- (1) Each animal must be vaccinated against rabies and meet the following requirements:
 - a) The rabies vaccination must have been administered after the implantation of the microchip.
 - b) The animal's microchip must have been verified and recorded at the time of rabies vaccination.
 - c) The animal must have been at least 12 weeks old at the time the vaccination was administered.
 - d) If the vaccination was a booster vaccination, it must have been administered within the period of validity (on or prior to the validity expiry date) of the previous vaccination, otherwise it must be considered to be a primary vaccination.
 - e) If the vaccination was a primary vaccination it must have been administered at least 21 days prior to entry into Great Britain.

- f) The validity of the rabies vaccination commences either at the time a booster vaccination is administered, or 21 days after a primary vaccination is administered.
 - g) Further information in relation to requirements for rabies vaccination administered in countries other than New Zealand can be found in the accompanying *Dogs and Cats to Great Britain Guidance Document*.
- (2) A copy of the documentation supporting the rabies vaccination details must have the certificate reference number (shoulder number) recorded on it, be signed, stamped and dated by the authorised person, and be attached to the official assurance.
- (3) The supporting documentation must bear the microchip number of the animal and details of the rabies vaccination, and in case of a booster vaccination, the previous vaccination.

1.5 Additional requirements for non-commercial movements of dogs and cats to Great Britain

1.5.1 General requirements

- (1) The owner or responsible natural person must sign a declaration stating that the animal(s) will accompany him/her, by travelling within not more than 5 days of his/her movement and is not intended to be sold or transferred to another owner.
- (2) The maximum number of pet animals in a single non-commercial movement is five (5), unless the following conditions are fulfilled:
 - a) the non-commercial movement of the pet animals is for the purpose of participating in competitions, exhibitions or sporting events, or in training for such events;
 - b) the owner or the responsible natural person submits written evidence that the pet animals are registered either to attend an event referred, or with an association organising such events; and
 - c) the pet animals are more than 6 months old.
- (3) If the maximum number of pet animals in a single non-commercial consignment movement exceeds 5 or the pet animal(s) is not travelling within 5 days of the owner's or responsible natural person's movement, the pet animals must be transported using the commercial export certificate template.
- (4) If the pet animal(s) is less than 12 weeks old and has not received an anti-rabies vaccination or the pet animal is between 12 and 16 weeks old and has received an anti-rabies vaccination but does not yet meet the 21 days waiting period:
 - a) either the owner or responsible natural person must sign a declaration that from birth until the time of the non-commercial movement the pet animal(s) has had no contact with wild animals of species susceptible to rabies; or
 - b) the pet animal(s) must be accompanied by its mother, on whom it still depends, and from the identification document accompanying the mother it can be established that before its birth, the mother received an anti-rabies vaccination which complied with the validity requirements mentioned in the EU legislation.
- (5) If the pet animal(s) is transiting through one of the territories or third countries other than those listed in Annex II to Commission Implementing Regulation (EU) No 577/2013, (see Appendix 4 of the accompanying *Cats and Dogs to Great Britain Guidance Document*), the owner or responsible natural person must sign a declaration that during the transit, the pet animals have had no contact with animals susceptible to rabies and remain secure within a means of transport or within the perimeter of an international airport.

1.5.2 *Echinococcus multilocularis* treatment

- (1) Each dog must be treated against *Echinococcus multilocularis* and the manufacturer of the product, name of the product, date of treatment and details of the veterinarian who administered the treatment must be recorded on the export certificate.

- (2) The *Echinococcus multilocularis* treatment must meet the following requirements:
- a) It must be administered not more than 120 hours prior to the scheduled time of arrival into Great Britain.
 - b) It must be administered not less than 24 hours prior to the scheduled time of arrival into Great Britain.
 - c) It must be administered by a registered veterinarian who must provide supporting documentation consisting of at least the microchip number of the dog treated, date and time of administration of the treatment, the manufacturer and name of the product, the practice address and the name of the administering veterinarian and bears the original signature of the veterinarian.
 - d) The products used must contain an appropriate dose of praziquantel, or other pharmacological substances which alone, or in combination, have been proven to reduce the burden of mature and immature intestinal forms of *Echinococcus multilocularis*.
 - e) The product used must have been approved for *Echinococcus* spp. use in New Zealand.
- (3) Where details of the *Echinococcus multilocularis* treatment is being certified the original supporting documentation for this treatment must have the certificate reference number (shoulder number) recorded on it, be signed, dated and stamped by the authorised person, and be attached to the official assurance.

1.6 Additional requirements for non-commercial movements of dogs and cats to Great Britain using the commercial export certificate template

- (1) Dogs and cats must come from holdings or businesses which are registered by the competent authority and are not subject to any ban on animal health grounds, where the animals are examined regularly, and which comply with the requirements ensuring the welfare of the animals held.
- (2) Dogs and cats being moved as non-commercial movements using the commercial export certificate must use the services of a registered pet exporter to comply with point 1.6(1) of this OMAR.
- (3) The dogs and cats showed no signs of disease and were fit to be transported for the intended journey at the time of examination by a veterinarian authorised by the competent authority within 48 hours prior to the time of dispatch.

1.6.1 *Echinococcus multilocularis* treatment

- (1) Each dog must be treated against *Echinococcus multilocularis* and the manufacturer of the product, name of the product, date of treatment and details of the veterinarian who administered the treatment must be recorded on the export certificate.
- (2) The *Echinococcus multilocularis* treatment must meet the following requirements:
 - a) It must be administered not more than 120 hours prior to the scheduled time of arrival into Great Britain.
 - b) It must be administered not less than 24 hours prior to the scheduled time of arrival into Great Britain.
 - c) It must be administered by a registered veterinarian who must provide supporting documentation consisting of at least the microchip number of the dog treated, date and time of administration of the treatment, the manufacturer and name of the product, the practice address and the name of the administering veterinarian and bears the original signature of the veterinarian.
 - d) The products used must contain an appropriate dose of praziquantel, or other pharmacological substances which alone, or in combination, have been proven to reduce the burden of mature and immature intestinal forms of *Echinococcus multilocularis*.
 - e) The product used must have been approved for *Echinococcus* spp. use in New Zealand.
- (3) Where details of the *Echinococcus multilocularis* treatment is being certified the original supporting documentation for this treatment must have the certificate reference number (shoulder number)

recorded on it, be signed, dated and stamped by the authorised person, and be attached to the official assurance.

1.7 Additional requirements for commercial movements of dogs and cats to Great Britain

- (1) Dogs and cats must come from holdings or businesses which are registered by the competent authority and are not subject to any ban on animal health grounds, where the animals are examined regularly, and which comply with the requirements ensuring the welfare of the animals held.
- (2) Dogs and cats being moved using the commercial export certificate must use the services of a registered pet exporter to comply with point 1.7(1) of this OMAR.
- (3) The dogs and cats showed no signs of disease and were fit to be transported for the intended journey at the time of examination by a veterinarian authorised by the competent authority within 48 hours prior to the time of dispatch.

1.7.1 *Echinococcus multilocularis* treatment

- (1) Each dog must be treated against *Echinococcus multilocularis* and the manufacturer of the product, name of the product, date of treatment and details of the veterinarian who administered the treatment must be recorded on the export certificate.
- (2) The *Echinococcus multilocularis* treatment must meet the following requirements:
 - a) It must be administered not more than 120 hours prior to the scheduled time of arrival into Great Britain.
 - b) It must be administered not less than 24 hours prior to the scheduled time of arrival into Great Britain.
 - c) It must be administered by a registered veterinarian who must provide supporting documentation consisting of at least the microchip number of the dog treated, date and time of administration of the treatment, the manufacturer and name of the product, the practice address and the name of the administering veterinarian and bears the original signature of the veterinarian.
 - d) The products used must contain an appropriate dose of praziquantel, or other pharmacological substances which alone, or in combination, have been proven to reduce the burden of mature and immature intestinal forms of *Echinococcus multilocularis*.
 - e) The product used must have been approved for *Echinococcus* spp. use in New Zealand.
- (3) Where details of the *Echinococcus multilocularis* treatment is being certified the original supporting documentation for this treatment must have the certificate reference number (shoulder number) recorded on it, be signed, dated and stamped by the authorised person, and be attached to the official assurance.

Part 2: Zoosanitary Certificate – Non-Commercial Movement

NEW ZEALAND MINISTRY FOR PRIMARY INDUSTRIES

Pet health certificate for the non-commercial movement to Great Britain, Channel Islands and Isle of Man of dogs, cats or ferrets in accordance with Regulation (EU) no 576/2013

NEW ZEALAND

Pet health certificate for the non-commercial movement to Great Britain, Channel Islands and Isle of Man of dogs, cats or ferrets in accordance with Regulation (EU) no 576/2013

II. Health information		II.a Certificate reference No	
Transponder or tattoo number of the dog	Name and manufacturer of the product	Date [dd/mm/yyyy] and time of treatment [00: 00]	Name in capitals, stamp and signature

Notes

- a) This certificate is meant for dogs (*Canis lupus familiaris*), cats (*Felis silvestris catus*) and ferrets (*Mustela putorius furo*).
- b) This certificate is valid for 10 days from the date of issue by the official veterinarian until the date of the documentary and identity checks at the designated point of entry into Great Britain, Channel Islands and Isle of Man.
- In the case of transport by sea, that period of 10 days is extended by an additional period corresponding to the duration of the journey by sea.

Part I

- Box I.3: *Consignee:* indicate Great Britain, Channel Islands and Isle of Man as destination.
- Box I.28 *Identification system:* select of the following: transponder or tattoo.
Identification number: indicate the transponder or tattoo alphanumeric code.
Date of birth/breed: as stated by the owner.

Part II:

- ¹ Keep as appropriate.
- ² The declaration referred to in point II.1 shall be attached to the certificate and comply with the model and additional requirements set out in Part 3 of Annex IV to Implementing Regulation (EU) No 577/2013.
- ³ The evidence referred to in point II.1 (e.g. boarding pass, flight ticket) and in point II. 2 (e.g. receipt of entry to the event, proof of membership) shall be surrendered on request by the competent authorities responsible for the checks referred to in point (b) of the Notes.
- ⁴ Any revaccination must be considered a primary vaccination if it was not carried out within the period of validity of a previous vaccination.
- ⁵ A certified copy of the identification and vaccination details of the animals concerned shall be attached to the certificate.
- ⁶ The third option is subject to the condition that the owner or the natural person referred to in point II.1 provides, on request by the competent authorities responsible for the checks referred to in point (b), a declaration stating that the animals have had no contact with animals of species susceptible of rabies and remain secure within the means of transport or the perimeter of an international airport during the transit through a third country other than those listed in Annex II to Implementing Regulation (EU) No 577/2013. This declaration shall comply with the format, layout and language requirements set out in Parts 2 and 3 of Annex I to Implementing Regulation (EU) No 577/2013.
- ⁷ The rabies antibody titration test referred to in point II.3.1:
 - must be carried out on a sample collected by a veterinarian authorised by the competent authority, at least 30 days after the primary rabies vaccination within a current valid vaccination series and 3 months before the date of import;
 - must measure a level of neutralising antibody to rabies virus in serum equal to or greater than 0.5 IU/ml;
 - must be performed by a laboratory approved in accordance with Article 3 of Council Decision 2000/258/EC (list of approved laboratories available at https://ec.europa.eu/food/animals/pet-movement/approved-labs_en);
 - does not have to be renewed on an animal, which following that test with satisfactory results, has been revaccinated against rabies within the period of validity of a previous vaccination.

A certified copy of the official report from the approved laboratory on the results of the rabies antibody test referred to in point II.3.1 shall be attached to the certificate.
- ⁸ By certifying this result, the official veterinarian confirms that he has verified, to the best of his ability and where necessary with contacts with the laboratory indicated in the report, the authenticity of the laboratory report on the results of the antibody titration test referred to in point II.3.1.
- ⁹ In conjunction with footnote⁽⁶⁾, the marking of the animals concerned by the implantation of a transponder or by a clearly readable tattoo applied before 3 July 2011 must be verified before any entry is made in this certificate and must always precede any vaccination, or where applicable, testing carried out on those animals.
- ¹⁰ The treatment against *Echinococcus multilocularis* referred to in point II.4 must:
 - be administered by a veterinarian within a period of not more than 120 hours and not less than 24 hours before the time of the scheduled entry of the dogs into Great Britain, Channel Islands and Isle of Man;
 - consist of an approved medicinal product which contains the appropriate dose of praziquantel or pharmacologically active substances, which alone or in combination, have been proven to reduce the burden of mature and immature intestinal forms of *Echinococcus multilocularis* in the host species concerned.

NEW ZEALAND

Pet health certificate for the non-commercial movement to Great Britain, Channel Islands and Isle of Man of dogs, cats or ferrets in accordance with Regulation (EU) no 576/2013
