Export Control Act

Certificate N^o

Page 2 of 3

Zoosanitary requirements for Australian live ornamental fish and marine invertebrates to be exported to New Zealand.

I, Dr, a duly authorised government veterinary officer, hereby certify that:

Eligibility

1. The consignment consists of species of ornamental fish and marine invertebrates eligible for importation under New Zealand’s Ministry for Primary Industries (NZMPI) Import Health Standard (IHS) *Ornamental Fish and Marine Invertebrates*.
2. The consignment consists of species of ornamental fish and marine invertebrates that are **not** listed in “Schedule 3 – Species of Ornamental Fish and Marine Invertebrates Susceptible to Diseases” in Part 2 of NZMPI IHS *Ornamental Fish and Marine Invertebrates*.

Note: species of ornamental fish and marine invertebrates that are listed in Schedule 3 are **not eligible** for export under this health certificate.

Pre-export isolation

1. The ornamental fish and marine invertebrates for export to New Zealand were held in PEI for a minimum of:
 - a. four weeks for freshwater fish
 - b. three weeks for marine fish and marine invertebrates.
2. The fish and marine invertebrates were maintained for the minimum isolation period at the exporter’s premises supervised by the Competent Authority of Australia, in accordance with the NZMPI Standard *Ornamental Fish and Marine Invertebrates* clause 1.11.
3. The ornamental fish and marine invertebrates were observed daily by PEI facility staff for signs of illness and abnormal behaviour during the PEI period and daily records were maintained and made available for certification.
4. The ornamental fish and marine invertebrates were inspected in person or virtually by an Australian government officer every 7 days during the PEI period.
5. Within 7 days of export, the ornamental fish and marine invertebrates were inspected in person or virtually by an Australian government officer and were clinically healthy and showed no clinical signs of disease.
6. During PEI, management procedures were used to ensure the ornamental fish and marine invertebrates in this consignment were isolated in a separate biosecure area from other ornamental fish and marine invertebrates not of an equivalent health status.
