

MINISTRY FOR PRIMARY INDUSTRIES

IMPORTING COUNTRIES PHYTOSANITARY REQUIREMENTS

THE EUROPEAN UNION

Status: Approved

Date: 26 June 2003

EXPORTERS ARE ADVISED TO CONFIRM THE PHYTOSANITARYIMPORT REQUIREMENTS PRIOR TO EXPORT FROM NEW ZEALAND

Amendment Record

Amendment No.	Date:	Nature of amendment:	Approved by:
124	11 June 2025	Added <i>Knightia excelsa</i> under section 4.3 Nursery Stock	HVC
123	9 June 2025	<p>Added Commission Implementing Regulation (EU) 2024/2970 of 29 November 2024 under section 1.4 Phytosanitary Legislation.</p> <p>Replaced outdated link to hops regulation with note to contact Plant Exports under section 4.2 Cut Flowers.</p> <p>Added Tomato brown rugose fruit virus as a RNQP for <i>Capsicum annuum</i> and <i>Solanum lycopersicum</i> (including hybrids) under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Added including hybrids for <i>Solanum lycopersicum</i> requirements under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p>	AS
122	14 January 2025	<p>Removed species under section 3.4.1 Seeds, Grains and Nuts (i.e. <i>Libertia grandiflora</i> and <i>Plantago lanceolata</i>)</p> <p>Updated Appendix 2: Plant species requiring an additional declaration for <i>Xylella fastidiosa</i></p> <p>Updated Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072.</p>	HVC
121	16 December 2024	<p>Updated section 3.1.2 Dried Fruit and Vegetables</p> <p>Updated spelling under 3.4.1 Seeds, Grains and Nuts for Sowing</p>	GF

		<p>Added used agriculture machinery under section 3.6 Miscellaneous</p> <p>Added 'N/A' to a number of species that do not produce bulbs under section 4.3.2 Specific Commodity Requirements.</p> <p>Updated <i>Cyathea</i> spp. and <i>Dicksonia</i> spp., <i>Vaccinium</i> spp., <i>Rosa</i> spp., <i>Rubus</i> spp, under section 4.3.2 Specific commodity requirements</p> <p>Added <i>Fuchsia procumbens</i> under section 4.3.2 Specific commodity requirements</p> <p>Added Xylella additional declaration under the applicable plants within section 4.3.2 Specific commodity requirements</p> <p>Under section 2.5.2 Quarantine Pests and Protected Zones removed the protected zone 'Portugal (Azores)' under pest <i>Gonipterus scutellatus</i></p> <p>Added Additional declaration number 25 Under Appendix 1 : Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072.</p> <p>Removed 'Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus' from additional declaration 3 under appendix 1</p> <p>Updated Appendix 4: Quarantine Pest List, see changes below:</p> <ul style="list-style-type: none"> • Removed: <i>Guignardia loricata</i>, <i>Melampsora medusae</i> f. sp. <i>tremuloidis</i> (fungi) <i>Draeculacephala minerva</i> (insect), <i>Riparsiella hibisci</i> (insect), Sweet potato chlorotic stunt virus, Sweet potato mild mottle virus • Added: <i>Neofusicoccum loricinum</i>, <i>Phyllocoptes fructiphilus</i>, <i>Neoceratitis asiatica</i>, <i>Neoceratitis cyanescens</i>, <i>Neotephritis finalis</i>, Citrus strain of Orchid fleck virus, Rose rosette virus 	HVC
120	15 February 2024	<p>Added Commission Implementing Regulation (EU) 2023/1134 of 8 June 2023 under section 1.4 Phytosanitary Legislation.</p> <p>Added a list of species that require only a phytosanitary certificate under section 3.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Updated additional declarations for <i>Capsicum</i> spp. and <i>Solanum melongena</i> under section 4.1 Fresh Fruit and Vegetables.</p> <p>Removed conditions for <i>Hordeum vulgare</i> that are covered by section 3.4.1 under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Added requirements for <i>Linum usitatissimum</i> under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p>	AS

119	25 January 2024	Updated additional declaration for <i>Vicia faba</i> under section 4.4.1 Seeds, Grains, and Nuts for Sowing.	AS
118	20 December 2023	<p>Updated heading for section 1.3 Member Countries of the European Union.</p> <p>Removed note to contact Plant Exports under section 3.1.2 Dried Fruit and Vegetables and section 3.1.3 Frozen Fruit and Vegetables.</p> <p>Corrected reference to section 2.3.1 under section 3.3 Nursery Stock.</p> <p>Removed conditions for <i>Athyrium</i> spp. under section 4.3.2 Nursery Stock.</p> <p>Removed species covered by requirements for the genus under section 4.3.2 Nursery Stock.</p> <p>Added conditions for <i>Vicia faba</i> under section 4.4.1 Seeds, Grains, and Nuts for Sowing.</p> <p>Corrected family name for <i>Spodoptera eridania</i>, <i>Spodoptera frugiperda</i> and <i>Spodoptera litura</i> under Appendix 4 Quarantine Pest List.</p>	MM/AS
117	14 December 2023	<p>Plant Exports Fees and Charges updated under section '1.5 Fees and charges'</p> <p>Removed '<i>Stranvaesia</i> spp.' under section '2.6 Prohibitions' and added <i>Fagus</i> spp. and updated several commodities listed in the prohibitions table</p> <p>Removed conditional Additional Declaration 9 from under <i>Ophiopogon</i> spp. under section '4.3.2 Specific Commodity Requirements'</p> <p>Moved RNQP requirements for specific nursery stock species under section 4 'Commodity Specific Requirements'</p> <p>Removed RNQP requirements for plants that have not been exported</p> <p>Removed Plant species under section '4.3.2 Specific Commodity Requirements' that have not been exported in the last 5 years</p> <p>Removed seed species under section 4 'Commodity Specific Requirements' that have not been exported in the last 5 years</p> <p>Removed Fruit and Vegetable species under section under section 4 'Commodity Specific Requirements' that have not been exported in the last 5 years</p> <p>Removed cut flowers under section 4 'Commodity Specific Requirements' that have not been exported in the last 5 years</p>	HVC

		Removed amendments from amendment table older than 5 years Full update and review of document	
116	20 November 2023	Amended enactment date of new additional declaration to 1 January 2024 for <i>Photinia</i> spp. and <i>Vaccinium</i> spp. under section 4.3 Nursery Stock. Removed enactment date for <i>Parrotia</i> spp. under section 4.3 Nursery Stock.	AS
115	6 November 2023	Updated section 4.3 Nursery Stock, specifically conditions under <i>Cornus</i> spp., <i>Ficus</i> spp., <i>Hibiscus syriacus</i> , <i>Hibiscus trionum</i> , <i>Malus</i> spp., <i>Parrotia</i> spp., <i>Photinia</i> spp., <i>Prunus</i> spp., <i>Pyrus</i> spp., <i>Vaccinium</i> spp.	GF
114	20 October 2023	Under section 1.4 Phytosanitary Legislation, removed Commission Implementing Decision (EU) 2020/1191 of 11 August 2020 as this is no longer in force, and added Commission Implementing Decision (EU) 2023/1032 of 25 May 2023. Removed broken link under section 2.4 Phytosanitary Certificates. ? Removed note: 'Switzerland requires phytosanitary certificates', under section 2.4 Phytosanitary Certificates. Added the following statement: 'From 23 October 2023 onwards, all phytosanitary certificates for the French territories Guadeloupe, Guyana, Martinique or Mayotte must include "France" in the "Country of destination" field of the phytosanitary certificate', under section 2.4 Phytosanitary Certificates. Under section 4.3.2 removed <i>Capsicum</i> spp. and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>) nursery stock. Under section 4.4.1 Seeds, Grains and Nuts for Sowing, updated requirements relating to Tomato brown rugose fruit virus for <i>Capsicum annuum</i> and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>). Added additional declaration 23 as a requirement for <i>Tulipa</i> and <i>Lilium</i> bulbs Updated Appendix 2 – Plant species requiring an additional declaration for <i>Xylella fastidiosa</i> . Updated Appendix 3 – Annex for <i>Capsicum</i> spp. and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>) seeds and plants for planting.	MW/KE/G F
113	06 June 2023	Added Additional Declaration 22 under section '4.3.2 Specific Commodity Requirements' for <i>Astelia</i> spp. tissue culture Added Additional Declarations under section '4.3.2 Specific Commodity' for <i>Actinidia</i> spp. Added note under appendix 1 for <i>Euwallacea fornicatus sensu lato</i>	HVC
112	13 March 2023	Added a note for <i>Actinidia</i> pollen under section '2.5.3 Union Regulated Non-Quarantine Pests (RNQPs)	HM

		<p>and Measures to prevent its presence on specific plants for planting.' Under RNQP tables combined Part D and C; Part M and K.</p> <p>Added Additional Declaration 23 and 24 under 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072</p> <p>Added Additional Declaration 23 and 24 for nursery stock under section '4.3.2 Specific Commodity Requirements' for several commodities.</p>	
111	21 December 2022	Removed 'Note I' Under section 2.4 'Phytosanitary Certificates' referring to wet signatures for France, Italy and Spain.	HM
110	5 December 2022	<p>Added reference to Commission Implementing Regulation (EU) 2022/1372 under section 1.4 Phytosanitary Legislation.</p> <p>Added Additional Declaration for <i>Oryza sativa</i> under section 4.4.1 Seeds, Grains, Nuts for Sowing.</p>	GF
109	06 October 2022	<p>Removed Additional Declaration 18 under 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072'.</p> <p>Updated requirements for <i>Actinidia</i> spp. under section '4.3.2 Specific Commodity Requirements'.</p>	HM
108	23 August 2022	<p>Updated section 4.2 Cut Flowers and Foliage under <i>Humulus lupulus</i>.</p> <p>Updated section 4.4.1 Seeds, Grains, Nuts for Sowing under <i>Beta vulgaris</i> (applies to seeds and fodder beet seed) and <i>Beta vulgaris</i> (applies to vegetable seed).</p>	GF
107	01 June 2022	Updated additional declarations for <i>Capsicum</i> spp., <i>Momordica</i> spp., <i>Solanum aethiopicum</i> , and <i>Solanum melongena</i> under section 4.1 Fresh Fruit and Vegetables.	MLM
106	11 May 2022	<p>Removed outdated reference to the EU directive 2000/29/EC under section 1.3 'Member Countries of the European Union'.</p> <p>Updated the information under section 2.3.1 'Letter of Authority'.</p> <p>Removed section 3.4.2 'Entry of seeds for sowing into the UK'</p> <p>Removed additional declaration 3 from <i>Hibiscus syriacus</i> and <i>Wisteria</i> spp. under 4.3.2 'Specific Commodity Requirements'.</p> <p>Added additional declaration 6 to <i>Agapanthus</i> spp., <i>Astelia</i> spp., <i>Phormium</i> spp. under 4.3.2 'Specific Commodity Requirements'.</p> <p>Updated 'Tree ferns to EU: Cuttings Only Compliance Programme and Registration' details under section 4.3.2 'Specific Commodity Requirements'.</p>	HM
105	11 April 2022	<p>Updated 'Combined Part D, Annex IV and Part C of Annex V' under section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Added Combined Part E, Annex IV. RNQPs and Part D Annex V. under section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p>	HM

		<p>Minor update to 'Combined Part F, Annex IV and Part E of Annex V' under section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Updated 'Combined Part L, Annex IV. RNQPs and Part J, Annex V' under section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Addition of 'Combined Part M, Annex IV. RNQPs and Part K, Annex V' to section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Added and updated requirements for <i>Apium graveolens</i> and <i>Ocimum spp.</i> under section 4.1 'Fresh Fruit and Vegetables'</p> <p>Updated requirements for <i>Citrus spp.</i>, <i>Fortunella spp.</i>, <i>Poncirus spp.</i>, <i>Mangifera spp.</i>, <i>Momordica spp.</i>, <i>Prunus spp.</i> & <i>Solanaceae</i> under section 4.1 'Fresh Fruit and Vegetables'.</p> <p>Updated requirements for <i>Chrysanthemum spp.</i>, <i>Dianthus spp.</i>, <i>Eryngium spp.</i>, <i>Gypsophila spp.</i>, <i>Orchidaceae</i>, <i>Solidago spp.</i> under section 4.2 'Cut Flowers and Foliage'.</p> <p>Updated the requirements for <i>Cydonia spp.</i>, <i>Euphorbia pulcherrima</i>, <i>Fragaria spp.</i>, <i>Malus spp.</i>, <i>Prunus spp.</i>, <i>Ribes spp.</i>, <i>Rubus spp.</i> under section 4.3 'Nursery Stock'</p> <p>Updated additional declaration 10 and 11 under 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072.'</p> <p>Removed <i>Ficus spp.</i>, from Additional declaration 16 under 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072'.</p> <p>Updated additional declaration 18 'Live pollen and plants of <i>Actinidia spp.</i> intended for planting, other than seeds' in 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072'.</p> <p>Added Additional declarations 21 & 22 for plants for planting under 'Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072'.</p> <p>Updated and added requirements for <i>Zea Mays</i> under section 4.4.1 'Seeds, Grains and Nuts for Sowing'.</p> <p>Addition of Appendix 4. Quarantine Pest List</p>	
104	23 December 2021	<p>Added note under section 4.3.2 Specific Commodity Requirements.</p> <p>Added requirements for <i>Persea americana</i> under section 4.3.2 Specific Commodity Requirements.</p>	MLM

		Updated note under Appendix 2 - Plant species requiring an additional declaration for <i>Xylella fastidiosa</i> .	
103	29 October 2021	<p>Updated additional declarations for <i>Rubus</i> spp. under section 4.3.2 Specific Commodity Requirements.</p> <p>Amended <i>Vaccinium corymbosum</i> to <i>Vaccinium</i> spp. under section 4.3.2 Specific Commodity Requirements.</p> <p>Updated requirements for <i>Rubus</i> spp. under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Added conditions for <i>Vaccinium</i> spp. under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Removed additional declaration for France regarding <i>Stenocarpella maydis</i> for <i>Zea mays</i> (Maize) under section 4.4.1 Seeds, Grains and Nuts for Sowing.</p> <p>Updated Appendix 2 - Plant species requiring an additional declaration for <i>Xylella fastidiosa</i>.</p>	MLM
102	21 September 2021	Added conditions for <i>Armeria</i> spp. under section 4.3.2 Specific Commodity Requirements.	GF
101	02 September 2021	Updated section 2.4 Phytosanitary Certificates, to remove statement regarding 14 day inspection requirement for Spain.	MLM
100	5 August 2021	<p>Updated section 2.4 Phytosanitary Certificates.</p> <p>Updated section 3.1.1 Fresh Fruit and Vegetables (intended for consumption).</p> <p>Updated section 3.2 Cut Flowers and Foliage.</p> <p>Added note to <i>Malus</i> spp. under section 4.1 to state that the specific species must be listed on the phytosanitary certificate.</p> <p>Updated additional declaration for <i>Actinidia</i> spp. under section 4.3.2 Specific Commodity Requirements.</p> <p>Updated additional declaration for <i>Hibiscus syriacus</i> to include AD 8 for all countries within the EU under section 4.3.2 Specific Commodity Requirements.</p> <p>Removed all historic instances of the following throughout ICPR: "Note: Effective 14 December 2019, a phytosanitary certificate is required. Effective 1 September 2019 a phytosanitary certificate is required, and Note: Effective 14 December 2019, the below additional declaration applies."</p>	GF
99	21 July 2021	Updated additional declaration regarding <i>Xylella fastidiosa</i> under section 4.3.2 Specific Commodity Requirements and Appendix 2 - Plant species requiring an additional declaration for <i>Xylella fastidiosa</i> .	MLM
98	31 May 2021	Updated Section 4.4.1 Seeds, Grains and Nuts for Sowing (<i>Pisum sativum</i>) and Combined Part F, Annex IV and Part E of Annex V.	SR
97	13 May 2021	Updated Additional Declaration section for <i>Phormium</i> spp. under Section 4.3.2 Specific Commodity Requirements.	FA

96	14 April 2021	Updated Section 4.3 Nursery Stock to correct commodities associated with Additional declaration 20.	FA
95	7 April 2021	Removed references to the United Kingdom (England, Scotland, Wales). Northern Ireland references have been retained. Updated requirements for <i>Capsicum</i> spp. under Section 4.4.1 Seeds, Grain and Nuts for Sowing. Updated Section 2.3 Exemption for Prohibited Items (derogation). Updated Section 4.3 Nursery Stock and Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072. Removal of references to Annex of EC Plant Health Directive 2000/29/EC throughout the document.	FA
94	22 December 2020	Updated requirements for <i>Acer</i> under section 4.3 Nursery Stock. Removed repetition of additional declaration "New Zealand is free from <i>Xylella fastidiosa</i> " from <i>Acacia</i> spp. under section 4.3 Nursery Stock, as a list of plant species that require this additional declaration are already outlined under Appendix 2 – Plant species requiring an additional declaration for <i>Xylella fastidiosa</i> .	GF
93	24 September 2020	Updated requirements in Additional Declaration 4 and Additional Declaration 20 under Section 4.3 Nursery Stock Appendix 1. Updated the conditions for <i>Beta vulgaris</i> under Nursery Stock Section 4.3.2 Commodity Specific Requirements. Updated Section 4.4.1 Seeds, Grain and Nuts for Sowing.	FA
92	9 September 2020	Updated Appendix 2 - Plant species requiring an additional declaration for <i>Xylella fastidiosa</i> . Removed all references to Reunion Island from Part 2.4 Phytosanitary Certificates.	MLM
91	24 August 2020	Updated Section 2.4 Phytosanitary Certificates. Added Conditions for <i>Pisum sativum</i> to Section 4.4.1 Seeds, Grains and Nuts for Sowing. Updated Additional Declarations for <i>Pinus</i> spp. <i>Pseudotsuga menziesii</i> to Section 4.4.1 Seeds, Grains and Nuts for Sowing. Updated Additional Declarations for <i>Capsicum</i> spp., <i>Capsicum annuum</i> and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>) in Section 4.3 Nursery Stock and Section 4.4.1 Seeds, Grains and Nuts for Sowing. Added a new section – Appendix 3: ANNEX <i>Capsicum</i> spp. and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>) seeds and plants for planting.	GF/FA
90	3 July 2020	Updated Additional Declaration 16 under Appendix 1. in section 4.3 Nursery Stock.	FA

		Updated Additional Declaration for multiple species in section 4.3 Nursery stock relevant to Additional Declaration 16.	
89	13 May 2020	<p>Updated section 2.6 Prohibitions and specifically Prohibitions for certain protected zones.</p> <p>Updated additional declarations for <i>Apium graveolens</i>, <i>Momordica</i> spp., <i>Ocimum</i> spp. and <i>Solanum melongena</i> in section 4.1 Fresh fruit and Vegetables.</p> <p>Updated Explanation of Format table for Additional Declarations under section 4.3 Nursery Stock.</p> <p>Added additional declarations for <i>Olea europaea</i> and <i>Lavandula</i> spp., and <i>Prunus dulcis</i> under section 4.3 Nursery Stock to include emergency measures as notified by the United Kingdom.</p> <p>Updated conditions and additional declarations for a number of commodities under section 4.3 Nursery Stock to include reference to section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Updated conditions and additional declarations for a number of commodities under section 4.4.1 Seeds, Grains and Nuts for Sowing to include reference to section 2.5.3 Union Regulation Non-Quarantine Pests (RNQPs).</p> <p>Minor amendments made throughout document.</p>	GF
88	27 March 2020	<p>Removed additional declaration for seed for sowing of <i>Triticum</i> spp., <i>Trifolium</i> spp., and Cruciferae under section 4.4.1.</p> <p>Removed wording "additional declaration not required, unless specified" for seed for sowing of Poaceae under section 4.4.1.</p> <p>Added word 'note' to separate from the additional declaration for fresh fruit and vegetables of <i>Apium graveolens</i>, <i>Capsicum</i> spp., <i>Citrus</i> spp., <i>Fortunella</i> spp., <i>Ocimum</i> spp. (leafy vegetables), <i>Poncirus</i> spp., <i>Prunus</i> spp., <i>Solanum aethiopicum</i>, <i>Solanum lycopersicum</i>, <i>Solanum melongena</i> under section 4.1.</p> <p>Added word 'note' to separate from the additional declaration for cut flowers and foliage of <i>Chrysanthemum</i> spp., <i>Dianthus</i> spp., <i>Gypsophila</i> spp., <i>Solidago</i> spp. under section 4.2.</p> <p>Minor amendment to wording of point 3, under section 4.3 Appendix 1.</p>	GF
87	04 March 2020	<p>Requirements for a number of commodities updated throughout as per Commission Implementing Regulation (EU) 2019/2072.</p> <p>Minor format changes throughout document.</p>	GF
86	03 February 2020	Added note under section 1.3, 3 and 4 to specify that the United Kingdom (England, Northern Ireland, Scotland and Wales) will apply current European Union requirements after leaving the European Union. This transitional period lasts until 31 December 2020.	Gen F/Gilda F
85	13 December 2019	Added note to specific plants for planting.	Gen F/Gilda F

		<p>Added requirement for phytosanitary certificate to have the full wording of the additional declarations and reference to the directive effective 14 December 2019</p> <p>Updated Section 2.8 Inspection on arrival requirement where EU will perform official controls on arrival in the Union on at least 1% of the consignments of the plants and plant products.</p> <p>More changes have been highlighted all throughout the document.</p>	
84	30 October 2019	<p>Added note to section 4.3.2 under <i>Magnolia</i> spp.</p> <p>Added requirement for phytosanitary certificate effective 14 December 2019 for Section 3.1.2, 3.1.3, & 4.1 for <i>Allium cepa</i>, <i>Allium sativum</i>, <i>Asparagus</i> spp., <i>Brassica oleracea</i> var. <i>gemmifera</i>, <i>Cucurbita maxima</i>, <i>Cyphomandra betacea</i>, <i>Daucus carota</i>, <i>Fragaria</i> spp., <i>Ipomoea batatas</i>, <i>Lens culinaris</i>, <i>Persea Americana</i>.</p> <p>Added Additional Declaration to section 4.4.1 under <i>Capsicum</i> spp. and <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>).</p> <p>Added Additional Declaration to section 4.3.2 under <i>Lycopersicon esculentum</i> (syn. <i>Solanum lycopersicum</i>).</p> <p>Added Miscellaneous sections 3.6 and 4.6 for Terrarium bedding.</p>	GF/SR
83	3 October 2019	<p>Added emergency additional declaration requirement for <i>Capsicum</i> spp. and <i>Solanum melongena</i> (eggplant) in section 4.1.</p>	SH
82	30 August 2019	<p>Added phytosanitary certificate requirement for <i>Actinidia deliciosa</i> in section 4.1.</p> <p>Added additional declaration requirement for <i>Malus</i> spp., <i>Pyrus</i> spp., <i>Citrus</i> spp. and <i>Capsicum</i> spp. in section 4.1.</p>	GF
81	27 June 2019	<p>Updated Phytosanitary Legislation in section 1.4.</p> <p>Amended section 2.3 Exemption for Prohibited Items (derogation) to reference most recent EU legislation.</p>	SH
80	7 June 2019	<p>Amended note I in section 2.4 Phytosanitary Certificates to include Spain as a country requiring certificates to be hand signed ("wet signature").</p> <p>Amended section 3.5 (growing media and packing material) removed declaration requirements for pure peat.</p>	SH/HC
79/78	3 May 2019	<p>Amended section 3.5 (growing media and packing material) added conditions section and declaration requirements for peat.</p> <p>Added a note, stating that sphagnum moss growing media are classified as peat</p> <p>Amended section 2.6 (e.g. soil and growing medium) to show that Sphagnum moss growing media are classified as 'peat'</p>	HC

DISCLAIMER

The phytosanitary requirements found in this document may be used as the basis of export certification. However, exporters should be aware that importing countries may change their requirements at any time; at short notice or without giving notice to New Zealand.

This information is provided strictly on the basis that the Crown, the Ministry for Primary Industries (MPI), its statutory officers, employees, agents and all other persons responsible for or associated with the compilation, writing, editing, approval or publication of the information:

1. Disclaim any and all responsibility for any inaccuracy, error, omission, lateness, or any other kind of inadequacy, deficiency or flaw in, or in relation to, the information

Users of this document are strongly advised to read all sections to understand the phytosanitary requirements for a commodity.

1.1 For enquiries about this document, email the Plant Exports Team: PlantExports@mpi.govt.nz

Please state the nature of your enquiry in the subject line e.g., European Union query or pest interception or password re-set.

1.2 Scope

The requirements listed in this Importing Country Phytosanitary Requirement (ICPR) document apply to product of New Zealand only, unless specifically stated.

This ICPR specifies the European Union's phytosanitary requirements for the stated commodities and commodity classes only. If a commodity or commodity grouping is not identified within this ICPR exporters should direct enquiries to:

- European Union member countries directly to ascertain requirements
- The Ministry for Primary Industries (MPI) - Plant Exports. Refer to Section 1.1

Please note the determination of phytosanitary requirements is undertaken on a cost recovery basis. The import requirements for the EU stipulate the requirements that particular genus/species have to fulfil prior to import. If there are no requirements listed for a particular genus/species, then contact PlantExports@mpi.govt.nz

1.3 Member Countries of the European Union

Austria (A)	Italy (I)
Belgium	Latvia (LV)
Bulgaria	Lithuania (LT)
Croatia	Luxembourg
Cyprus (CY)	Malta (M)
Czech Republic (CZ)	Netherlands
Denmark (DK)	Poland (PL)
Estonia (ES)	Portugal (including Azores) (P)
Finland (FI)	Romania
France (F)	Slovakia (SV)
Germany	Slovenia (SL)
Greece (EL)	Spain (including Canary Islands) (E)
Hungary (HU)	Sweden (S)
Ireland (IRL)	

Note: Switzerland is not a member of the EU, however Switzerland's plant health regulation is to a wide extent identical to the EU regulations.

1.4 Phytosanitary Legislation

- Council Directive 2000/29/EC of 8 May 2000 on protective measures against the introduction into the Community of organisms harmful to plants or plant products and against their spread within the Community.
- Council Directive 2002/89/EC of 28 November 2002 amending Directive 2000/29/EC
- Commission Directive 2009/7/EC amending 2000/29/EC
- Commission Directive 2009/74/EC of 26 June 2009 amending Council Directives 66/401/EEC, 66/402/EEC and 2002/57/EC.
- Commission Implementing Directive 2014/78/EU amending Annexes I, II, III, IV, V to Council Directive 2000/29/EC of 17 June 2014
- Regulation (EU) 2016/2031 of the European Parliament of the Council of 26 October 2016
- Commission Implementing Regulation (EU) 2018/2019 of 18 December 2018
- Commission Implementing Regulation (EU) 2019/66 of 16 January 2019
- Commission Implementing Decision (EU) 2019/120 of 24 January 2019
- Commission Delegated Regulation (EU) 2019/829 of 14 March 2019
- Commission Implementing Directive (EU) 2019/523 of 21 March 2019
- Commission Implementing Regulation (EU) 2019/2072 of 28 November 2019
- Commission Implementing Regulation (EU) 2022/1372 of 5 August 2022
- Commission Implementing Regulation (EU) 2023/1032 of 25 May 2023
- Commission Implementing Regulation (EU) 2023/1134 of 8 June 2023
- Commission Implementing Regulation (EU) 2024/2970 of 29 November 2024

1.5 Fees and charges

Please note that the determination and provision of phytosanitary requirements for a commodity not listed within the ICPR may be undertaken on a cost recovered basis. A link to the list of Plant Exports Fees and Charges is available on the form that needs to be completed and emailed to PlantExports@mpi.govt.nz:

<https://www.mpi.govt.nz/dmsdocument/738-plant-exports-request-for-services>

2. General Requirements

2.1 Definitions

Plants

Living plants and specified living parts thereof, including seeds. Living parts of plants include:

- fruit, in the botanical sense, other than that preserved by deep freezing
- vegetables, other than those preserved by deep freezing
- tubers, corms, bulbs, rhizomes
- cut flowers
- branches with foliage
- cut trees retaining foliage
- leaves and foliage
- plant tissue cultures
- live pollen
- budwood, cuttings, scions

Seeds

Seeds in the botanical sense, other than those not intended for planting.

Plant products

Products of plant origin, unprocessed or having undergone simple preparation, in so far as these are not plants.

Planting

Any operation for the placing of plants to ensure their subsequent growth, reproduction or propagation.

Plants intended for planting

Plants which are already planted and are intended to remain planted or to be replanted after their introduction or plants which are not planted at the time of introduction, but are intended to be planted thereafter.

Plant passport

The movement within the Union territory, and into and within protected zones, of certain plants, plant products and other objects should only be permitted if accompanied by a plant passport, attesting compliance with the requirements and measures established pursuant to the provisions of the EU Regulation.

Union quarantine pests

Pests of plants or of plant products, which belong to the animal or plant kingdoms, or which are viruses, mycoplasmas or other pathogens.

Union regulated non-quarantine pests (RNQPs)

A pest, which is not a Union quarantine pest and if that pest is mainly transmitted through specific plants for planting, its presence on those plants for planting has an unacceptable economic impact as regards the intended use of those plants. In order to limit the presence of such pests, their introduction into, or movement within, the Union territory on the plants for planting concerned should be prohibited where those pests are present at an incidence above a certain threshold.

2.2 Phytosanitary Import Permits

Phytosanitary import permits are not required for plants or plant products to enter the European Union.

2.3 Exemption for Prohibited Items (derogation)

2.3.1 Letter of Authority

The Commission Directive EC 2019/829 issued 14 March 2019, allows for certain prohibited pests and plants, plant products and other objects to be introduced or moved within the European Union or certain protected zones for official testing, scientific or educational purposes, trials, varietal selections, or breeding purposes.

Prohibited material may be exported to the European Union if the importer in the destination country has obtained a Letter of Authority from the EU member state government. The Letter of Authority will specify the conditions for import.

A phytosanitary certificate is not required unless specified on the Letter of Authority or by written correspondence from the importing country.

MPI will not endorse a Letter of Authority for unwanted organisms unless they are cleared by MPI to be moved within NZ for the purpose of being exported.

For a Letter of Authority to be endorsed by MPI, the consignment will need to be verified. Please contact an Independent Verification Agency (IVA) for more information:

[Plant exports authorised independent verification agencies | MPI | NZ Government](#)

2.3.2 Derogation for fruit plant propagating material and fruit plants intended for fruit production

Similarly, the Commission Implementing Decision (EU) 2019/120 of 24 January 2019 amending Council Directive 2008/90/EC has extended the derogation relating to import conditions for fruit plant propagating material and fruit plants intended for fruit production from third countries. Certain genera and species are affected of this Directive (refer to 2008/90/EC for the list and the specific commodity requirements under Section 3 and 4 of this document). The extension of the derogation under the 2019/120 shall expire on 31 December 2022.

2.4 Phytosanitary Certificates

Phytosanitary certificate is required for all plants, plant products and other regulated articles to be exported.

Where an additional declaration is required, the reference to the relevant European Commission Regulation must be included in the 'additional declaration section' of the phytosanitary certificate (e.g. "Consignment complies with..."). If unsure of the phytosanitary requirements for specific commodities in these sections, please contact MPI.

Phytosanitary certificates must not be issued more than 14 days prior to export.

Where a phytosanitary certificate is issued after a consignment has been dispatched the inspection date must be stated in the Inspection date field of the Phytosanitary certificate.

The phytosanitary inspection date must be stated on all phytosanitary certificates issued for the export of New Zealand product to France, Italy, and Spain.

All postal consignments must have the original phytosanitary certificate attached to the outside of the package on entry into the EU.

From 23 October 2023 onwards, all phytosanitary certificates for the French territories Guadeloupe, Guyana, Martinique or Mayotte must include France in the "Country of Destination" field of the phytosanitary certificate.

2.5 Quarantine Pests

2.5.1 List of Quarantine Pests

The list of the European Union quarantine pests is available at the Official New Zealand Pest Register:

<https://pierpesterregister.mpi.govt.nz/pest-register-exporting/>

Please note that these pathogens and pests are prohibited from entering the European Union if they are present on the plants or plant products specified for that pest.

Note: Exporters should be aware that New Zealand has a number of endemic and native organisms that are unlikely to be listed on an importing country's quarantine pest list but would almost certainly be treated as quarantine pests if found at import inspection. Phytosanitary Inspectors should take this into account when making decisions about the eligibility of product for an overseas market and treat endemic and native species found at phytosanitary inspection as quarantine pests unless there is clear evidence to the contrary. The New Zealand Organisms Register provides a search tool that can be used to determine whether the organism is endemic, native to NZ or introduced. Follow the link here: <http://www.nzor.org.nz/search>.

2.5.2 Quarantine Pests and Protected Zones

The following table shows the pests whose introduction into and whose spread within the relevant protected zones of the European Union is prohibited without reference to any specific plants or plants products. Please refer to Annex III of Commission Implementing Regulation (EU) 2019/2072.

Species	Protected Zones
Bacteria	
<i>Erwinia amylovora</i>	a) Estonia, b) Spain (except the autonomous communities of Andalucía, Aragón, Castilla la Mancha, Castilla y León, Extremadura, the autonomous community of Madrid, Murcia, Navarra and La Rioja, the province of Guipuzcoa (Basque Country), the comarcas of Garrigues, Noguera, Pla d'Urgell, Segrià and Urgell in the province of Lleida (Comunidad autonoma de Catalunya); and the municipalities of Alborache and Turís in the province of Valencia and the Comarcas de L'Alt Vinalopó and El Vinalopó Mitjà in the province of Alicante (Comunidad Valenciana)); c) France (Corsica); d) Italy (Abruzzo, Basilicata, Calabria, Campania, Lazio, Liguria, Marche, Molise, Piedmont (except the communes of Busca, Centallo, Scarnafigi, Tarantasca and Villafalletto in the province of Cuneo), Sardinia, Sicily (except the municipalities of Cesarò (Messina Province), Maniace, Bronte, Adrano (Catania Province) and Centuripe, Regalbuto and Troina (Enna Province)), Tuscany, Umbria, Valle d'Aosta); e) Latvia; f) Finland; h) until 30 April 2020: Ireland (except Galway city); i) until 30 April 2020: Italy (Apúlia, Lombardy (except the provinces of Milan, Mantua, Sondrio and Varese, and the communes of Bovisio Masciago, Cesano Maderno, Desio, Limbiate, Nova Milanese and Varedo in Monza Brianza Province), Veneto (except the provinces of Rovigo and Venice, the communes Barbona, Boara Pisani, Castelbaldo, Masi, Piacenza d'Adige, S. Urbano and Vescovana in the province

	of Padova and the area situated to the South of the motorway A4 in the province of Verona)); j) until 30 April 2020: Lithuania (except the municipalities of Babtai and Kėdainiai (region of Kaunas); k) until 30 April 2020: Slovenia (except the regions of Gorenjska, Koroška, Maribor and Notranjska, and the communes of Lendava and Renče-Vogrsko (south of the motorway H4)) and Velika Polana, and the settlements Fužina, Gabrovčec, Glogovica, Gorenja vas, Gradiček, Grintovec, Ivančna Gorica, Krka, Krška vas, Male Lese, Malo Črnelo, Malo Globoko, Marinča vas, Mleščevo, Mrzlo Polje, Muljava, Podbukovje, Potok pri Muljavi, Šentvid pri Stični, Škrjanče, Trebnja Gorica, Velike Lese, Veliko Črnelo, Veliko Globoko, Vir pri Stični, Vrhpolje pri Šentvidu, Zagradec and Znojile pri Krki in the commune Ivančna Gorica); l) until 30 April 2020: Slovakia (except the county of Dunajská Streda, Hronovce and Hronské Kľačany (Levice County), Dvory nad Žitavou (Nové Zámky County), Málinec (Poltár County), Hrhov (Rožňava County), Veľké Ripňany (Topoľčany County), Kazimír, Luhýňa, Malý Horeš, Svätušie and Zátin (Trebíšov County))
Fungi and oomycetes	
<i>Colletotrichum gossypii</i>	a) Greece
<i>Cryphonectria parasitica</i>	a) Czech Republic b) Ireland c) Sweden d) Northern Ireland
<i>Entoleuca mammata</i>	a) Ireland b) Northern Ireland
<i>Gremmeniella abietina</i>	a) Ireland
<i>Phytophthora ramorum</i>	a) until 30 April 2023: France (except the department of Finistère (Bretagne))
Insects and Mites	
<i>Bemisia tabaci</i> (European)	a) Ireland b) Sweden c) Northern Ireland
<i>Cephalcia lariciphila</i>	a) Ireland b) Northern Ireland
<i>Daktulosphaira vitifoliae</i>	a) Cyprus
<i>Dendroctonus micans</i>	a) Ireland b) Greece c) Northern Ireland
<i>Dryocosmus kuriphilus</i>	a) Ireland b) Northern Ireland
<i>Gilpinia hercyniae</i>	a) Ireland b) Greece c) Northern Ireland
<i>Gonipterus scutellatus</i>	a) Greece
<i>Ips amitinus</i>	a) Ireland b) Greece c) Northern Ireland
<i>Ips cembrae</i>	a) Ireland b) Greece c) Northern Ireland
<i>Ips duplicatus</i>	a) Ireland b) Greece c) Northern Ireland
<i>Ips sexdentatus</i>	a) Ireland b) Cyprus c) Northern Ireland
<i>Ips typographus</i>	a) Ireland b) Northern Ireland
<i>Leptinotarsa decemlineata</i>	a) Ireland b) Spain (Ibiza and Menorca) c) Cyprus d) Malta e) Portugal (Azores and Madeira) f) Finland (districts of Åland, Häme, Kymi, Pirkanmaa, Satakunta, Turku, Uusimaa) g) Sweden (counties of Blekinge, Gotland, Halland, Kalmar and Skåne) h) Northern Ireland
<i>Liriomyza bryoniae</i>	a) Ireland b) Northern Ireland
<i>Paysandisia archon</i>	a) Ireland b) Malta c) Northern Ireland
<i>Rhynchophorus ferrugineus</i>	a) Ireland b) Portugal (Azores) c) Northern Ireland
<i>Sternonchetus mangiferae</i>	a) Spain (Granada and Malaga) b) Portugal (Alentejo, Algarve and Madeira)
<i>Thaumetopoea pityocampa</i>	a) Northern Ireland
<i>Thaumetopoea processionea</i>	a) Ireland

<i>Viteus vitifoliae</i>	a) Cyprus
Virus, Viroids and phytoplasmas	
<i>Beet necrotic yellow vein virus</i>	a) Ireland b) France (Brittany) c) Portugal (Azores) d) Finland e) Northern Ireland
<i>Candidatus Phytoplasma ulmi</i>	a) Northern Ireland
<i>Citrus tristeza virus (EU isolates)</i>	a) Malta

2.5.3 Union Regulated Non-Quarantine Pests (RNQPs) and Measures to prevent its presence on specific plants for planting

Ref.: Annex IV, Part A-M and Annex V, Part A-J of Commission Implementing Regulation (EU) 2019/2072

Apart from the Union quarantine pests, the EU have set up a threshold for Union regulated non-quarantine pests (RNQPs). (See definition for RNQP under Section 2.1 of this document). List of Union RNQPs and specific plants for planting, with categories and thresholds can be referred to Annex IV of Commission Implementing Regulation (EU) 2019/2072 and under section '4.3.2 Specific Commodity Requirements' in this document.

2.6 Prohibitions

Annex VI, List of plants, plant products and other objects whose introduction into the Union from certain third countries is prohibited Ref.: Commission Implementing Regulation (EU) 2019/2072

Scientific Name	Common Name	Plant or Plant Part Affected
	Soil/Growing media	Soil as such, consisting in part of solid organic substances. Growing medium as such, which consists in whole or in part of solid organic substances, other than that composed entirely of peat or fibre of <i>Cocos nucifera</i> L., previously not used for growing of plants or for any agricultural purposes. Refer also to AD 1 within Section 4 of this document for further import requirements on soil. Note: Sphagnum moss growing media are classified as 'peat' based on EFSA Report on Risks to plant health posed by EU import of soil or growing media dated June 2015
<i>Abies</i> spp.	Fir	Plants other than fruit and seeds
<i>Castanea</i> spp.	Chestnut	Plants with leaves other than fruit and seeds
<i>Cedrus</i> spp.	Cedar	Plants other than fruit and seeds
<i>Chaenomeles</i> spp.	Flowering quince	Plants for planting other than dormant plants free from leaves, flowers and fruits
<i>Chamaecyparis</i> spp.	Cypress	Plants other than fruit and seeds

<i>Citrus</i> spp. and hybrids		Plants and their hybrids, other than fruit and seeds
<i>Cotoneaster</i> spp.		Plants and plant parts (including live pollen.). For specific regions only. (refer 2.6.1 Prohibitions for certain protected zones)
<i>Crataegus</i> spp.	Hawthorn	Plants for planting prohibited pending risk assessment (ref: Commission Implementing regulation (EU) 2018/2019)), other than seeds, in vitro material, naturally or artificially dwarfed woody plants for planting, and fruit. And Plants for planting other than dormant plants free from leaves, flowers and fruits ((ref: Commission Implementing regulation (EU) 2019/2072)),
<i>Cydonia</i> spp.	Quince	Plants for planting other than dormant plants free from leaves, flowers and fruits
<i>Eriobotrya</i> spp.	Loquat	Plants and live pollen for pollination. For specific regions only. (refer 2.6.1 Prohibitions for certain protected zones)
<i>Fagus</i> spp.		Prohibited pending risk assessment.
<i>Ficus carica</i>	Fig	Prohibited pending risk assessment.
<i>Fortunella</i> and hybrids		Nursery Stock other than fruit and seeds
<i>Fragaria</i> spp.	Strawberry	Seeds
<i>Graminaceae</i>		Plants of the family <i>Graminaceae</i> other than plants of ornamental perennial grasses of the subfamilies <i>Bambusoideae</i> and <i>Panicoideae</i> and of the genera <i>Buchloe</i> , <i>Bouteloua</i> Lag., <i>Calamagrostis</i> , <i>Cortaderia</i> Stapf., <i>Glyceria</i> R. Br., <i>Hakonechloa</i> Mak. ex Honda, <i>Hystrix</i> , <i>Molinia</i> , <i>Phalaris</i> L., <i>Shibataea</i> , <i>Spartina</i> Schreb., <i>Stipa</i> L. and <i>Uniola</i> L., intended for planting, other than seeds
<i>Juniperus</i> spp.	Juniper	Plants other than fruit and seeds
<i>Larix</i> spp.	Larch	Plants other than fruit and seeds
<i>Malus</i> spp.	Apple	Plants for planting prohibited pending risk assessment (ref: Commission Implementing regulation (EU) 2018/2019)), other than seeds, in vitro material, naturally or artificially dwarfed woody plants for planting, and fruit.

<i>Mespilus</i> spp.	Medlar	Plants and live pollen for pollination other than fruit and seeds into certain protected zones only. (refer 2.6.1 Prohibitions for certain protected zones)
<i>Picea</i> spp.	Spruce	Plants other than fruit and seeds
<i>Pinus</i> spp.	Pine	Plants other than fruit and seeds
<i>Poaceae</i>		Plants for planting other than plants of ornamental perennial grasses of the subfamilies <i>Bambusoideae</i> and <i>Panicoideae</i> and of the genera <i>Buchloe</i> , <i>Bouteloua</i> Lag., <i>Calamagrostis</i> , <i>Cortaderia</i> Stapf., <i>Glyceria</i> R. Br., <i>Hakonechloa</i> Mak. ex Honda, <i>Hystrix</i> , <i>Molinia</i> , <i>Phalaris</i> L., <i>Shibataea</i> , <i>Spartina</i> Schreb., <i>Stipa</i> L. and <i>Uniola</i> L., other than seeds
<i>Poncirus</i> spp. and hybrids		Plants other than fruit and seeds
<i>Prunus</i> spp.		Plants for planting prohibited pending risk assessment (ref: Commission Implementing regulation (EU) 2018/2019)), other than seeds, in vitro material, naturally or artificially dwarfed woody plants for planting, and fruit.
<i>Pseudotsuga</i> spp.	Douglas Fir	Plants other than fruit and seeds
<i>Pyracantha</i> spp.	Firethorn	Plants and live pollen for pollination other than fruit and seeds, (refer 2.6.1 Prohibitions for certain protected zones)
<i>Pyrus</i> spp.	Pear	Plants for planting and hybrids other than dormant plants free from leaves, flowers and fruit, and seeds. (refer 2.6.1 Prohibitions for certain protected zones)
<i>Quercus</i> spp.	Oak	Plants with leaves other than fruit and seeds
<i>Rosa</i> spp.	Rose	Plants for planting other than dormant plants free from leaves, flowers and fruits.
<i>Solanaceae</i>		Tubers of <i>Solanum tuberosum</i> spp. seed potatoes. Plants for planting of stolon or tuber forming species of <i>Solanum</i> spp. and their hybrids other than those tubers of <i>Solanum tuberosum</i> L. Plants of <i>Solanaceae</i> intended for planting, other than seeds
<i>Sorbus</i> spp.	Mountain ash	Prohibited pending risk assessment (Effective 14 December 2019): Plants for planting, other than seeds, in vitro material and naturally or artificially dwarfed woody plants for planting. (ref: (EU) 2018/2019)

<i>Tsuga</i> spp.	Hemlock	Plants other than fruit and seeds
<i>Vitis</i> spp.	Grape	Plants other than fruits

2.6.1 Prohibitions for certain protected zones

Annex IX, List of plants, plant products and other objects whose introduction into certain protected zones is prohibited Ref.: Commission Implementing Regulation (EU) 2019/2072))

Plants, plant products and other objects which are prohibited	Zones from which entry is prohibited
<p>1. Plants and live pollen for pollination other than fruit and seeds, originating in third countries other than Switzerland and other than those recognised as being free from <i>Erwinia amylovora</i> (Burr.) Winkl. <i>et al.</i> by the respective National Plant Protection Organization and being officially notified to the Commission or in which pest free areas have been established in relation to <i>Erwinia amylovora</i> (Burr.) Winkl. <i>et al.</i> in accordance with the relevant International Standard for Phytosanitary Measures by the respective National Plant Protection Organization and being officially notified to the Commission, and belonging to one of the following species:</p> <p>— <i>Amelanchier</i> Med., — <i>Chaenomeles</i> Lindl., — <i>Crataegus</i> L., — <i>Cydonia</i> Mill., — <i>Eriobotrya</i> Lindl., — <i>Malus</i> Mill., — <i>Mespilus</i> L., — <i>Pyracantha</i> Roem., — <i>Pyrus</i> L. or — <i>Sorbus</i> L..</p>	<p>a) Estonia;</p> <p>(b) Spain (except the autonomous communities of Andalucía, Aragón, Castilla la Mancha, Castilla y León, Extremadura, the autonomous community of Madrid, Murcia, Navarra and La Rioja, the province of Guipuzcoa (Basque Country), the comarcas of Garrigues, Noguera, Pla d'Urgell, Segrià and Urgell in the province of Lleida (Comunidad autonoma de Catalunya); and the municipalities of Alborache and Turís in the province of Valencia and the Comarcas de L'Alt Vinalopó and El Vinalopó Mitjà in the province of Alicante (Comunidad Valenciana));</p> <p>(c) France (Corsica);</p> <p>(d) Ireland (except Galway city);</p> <p>(e) Italy (Abruzzo, Apúlia, Basilicata, Calabria, Campania, Lazio, Liguria, Lombardy (except the provinces of Milan, Mantua, Sondrio and Varese, and the communes of Bovisio Masciago, Cesano Maderno, Desio, Limbiate, Nova Milanese and Varedo in Monza Brianza Province), Marche, Molise, Piedmont (except the communes of Busca, Centallo, Scarnafigi, Tarantasca and Villafalletto in the province of Cuneo), Sardinia, Sicily (except the municipalities of Cesarò (Messina Province), Maniace, Bronte, Adrano (Catania Province) and Centuripe, Regalbuto and Troina (Enna Province)), Tuscany, Umbria, Valle d'Aosta, Veneto (except the provinces of Rovigo and Venice, the communes Barbona, Boara Pisani, Castelbaldo, Masi, Piacenza d'Adige, S. Urbano and Vescovana in the province of Padova and the area situated to the South of the motorway A4 in the province of Verona));</p> <p>(f) Latvia;</p> <p>(g) Lithuania (except the municipalities of Babtai and Kėdainiai (region of Kaunas)); (h) Slovenia (except the regions of Gorenjska, Koroška, Maribor and Notranjska, and the</p>

	<p>communes of Lendava and Renče-Vogrsko (south of the motorway H4) and Velika Polana, and the settlements Fužina, Gabrovčec, Glogovica, Gorenja vas, Gradiček, Grintovec, Ivančna Gorica, Krka, Krška vas, Male Lese, Malo Črnelo, Malo Globoko, Marinča vas, Mleščevo, Mrzlo Polje, Muljava, Podbukovje, Potok pri Muljavi, Šentvid pri Stični, Škrjanče, Trebnja Gorica, Velike Lese, Veliko Črnelo, Veliko Globoko, Vir pri Stični, Vrhpolje pri Šentvidu, Zagradec and Znojile pri Krki in the commune Ivančna Gorica); (i) Slovakia (except the county of Dunajská Streda, Hronovce and Hronské Kľačany (Levice County), Dvory nad Žitavou (Nové Zámky County), Málíneč (Poltár County), Hrhov (Rožňava County), Velké Ripňany (Topoľčany County), Kazimír, Luhyňa, Malý Horeš, Svätušie and Zátin (Trebíšov County));</p> <p>(j) Finland;</p>
<p>2. Plants and live pollen for pollination other than fruit and seeds, originating in third countries other than those recognised as being free from <i>Erwinia amylovora</i> (Burr.) Winkl. <i>et al.</i> by the respective National Plant Protection Organization and being officially notified to the Commission, or in which pest free areas have been established in relation to <i>Erwinia amylovora</i> (Burr.) Winkl. <i>et al.</i> in accordance with the relevant International Standard for Phytosanitary Measures by the respective National Plant Protection Organization and being officially notified to the Commission, and belonging to one of the following species:</p> <p>(1) <i>Cotoneaster</i> Ehrh. or (2) <i>Photinia davidiana</i> (Dcne.) Cardot.</p>	<p>(a) Estonia;</p> <p>(b) Spain (except the autonomous communities of Andalucía, Aragón, Castilla la Mancha, Castilla y León, Extremadura, the autonomous community of Madrid, Murcia, Navarra and La Rioja, the province of Guipuzcoa (Basque Country), the comarcas of Garrigues, Noguera, Pla d'Urgell, Segrià and Urgell in the province of Lleida (Comunidad autonoma de Catalunya); and the municipalities of Alborache and Turís in the province of Valencia and the Comarcas de L'Alt Vinalopó and El Vinalopó Mitjà in the province of Alicante (Comunidad Valenciana));</p> <p>(c) France (Corsica);</p> <p>(d) Ireland (except Galway city);</p> <p>(e) Italy (Abruzzo, Apúlia, Basilicata, Calabria, Campania, Lazio, Liguria, Lombardy (except the provinces of Milan, Mantua, Sondrio and Varese, and the communes of Bovisio Masciago, Cesano Maderno, Desio, Limbiate, Nova Milanese and Varedo in Monza Brianza Province), Marche, Molise, Piedmont (except the communes of Busca, Centallo, Scarnafigi, Tarantasca and Villafalletto in the province of Cuneo), Sardinia, Sicily (except the municipalities of Cesarò (Messina Province), Maniace, Bronte, Adrano (Catania Province) and Centuripe, Regalbuto and Troina (Enna Province)), Tuscany, Umbria, Valle d'Aosta, Veneto (except the provinces of Rovigo and Venice, the communes Barbona, Boara Pisani, Castelbaldo, Masi, Piacenza d'Adige, S.</p>

	<p>Urbano and Vescovana in the province of Padova and the area situated to the South of the motorway A4 in the province of Verona));</p> <p>(f) Latvia;</p> <p>(g) Lithuania (except the municipalities of Babtai and Kėdainiai (region of Kaunas));</p> <p>(h) Slovenia (except the regions of Gorenjska, Koroška, Maribor and Notranjska, and the communes of Lendava and Renče-Vogrsko (south of the motorway H4) and Velika Polana, and the settlements Fužina, Gabrovčec, Glogovica, Gorenja vas, Gradiček, Grintovec, Ivančna Gorica, Krka, Krška vas, Male Lese, Malo Črnelo, Malo Globoko, Marinča vas, Mleščevo, Mrzlo Polje, Muljava, Podbukovje, Potok pri Muljavi, Šentvid pri Stični, Škrjanče, Trebnja Gorica, Velike Lese, Veliko Črnelo, Veliko Globoko, Vir pri Stični, Vrhpolje pri Šentvidu, Zagradec and Znojile pri Krki in the commune Ivančna Gorica);</p> <p>(i) Slovakia (except the county of Dunajská Streda, Hronovce and Hronské Kľačany (Levice County), Dvory nad Žitavou (Nové Zámky County), Málinec (Poltár County), Hrhov (Rožňava County), Veľké Ripňany (Topoľčany County), Kazimír, Luhyňa, Malý Horeš, Svätušie and Zátin (Trebíšov County));</p> <p>(j) Finland; (k) Pla (Isle of Man; Channel Islands).</p>
3. Plants, other than fruit or seeds of <i>Coffea</i> spp. or <i>Polygala myrtifolia</i> which originate in any third country.	Northern Ireland

2.7 Transit Provisions

Not specified.

2.8 Inspection on Arrival

All consignments may be subjected to inspection on arrival. Commission Implementing Regulation (EU) 2019/66 of 16 January 2019 specifies that the EU will perform official controls on arrival in the Union on at least 1% of the consignments of the plants and plant products.

2.9 Wood packaging

Refer to Forestry ICPR for the EU, link below:

<http://www.mpi.govt.nz/law-and-policy/requirements/importing-countries-phytosanitary-requirements/forestry-icprs/european-union/>

3. Commodity Class Requirements

3.1 Fruit and Vegetables

3.1.1 Fresh Fruit and Vegetables (intended for consumption)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Refer to commodity for specific requirements.

If the specific genus/species for export is not listed in section 4 contact PlantExports@mpi.govt.nz.

3.1.2 Dried Fruit and Vegetables

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

For Belgium only

Dried Fruit

Phytosanitary import permit not required. Phytosanitary certificate not required.

3.1.3 Frozen Fruit and Vegetables

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

3.2 Cut Flowers and Foliage

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Refer to specific commodity for requirements.

If the specific genus/species for export is not listed in section 4 contact PlantExports@mpi.govt.nz.

3.3 Nursery Stock

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Refer to commodity specific requirements for Nursery Stock. Letter of Authority may be required, refer Section 2.3.1.

Additional declarations for plants for planting apply to tissue culture material with the exception of the soil related additional declarations.

If unsure of the requirements for the genus/species or type (i.e. plant, budwood, tissue culture) of nursery stock for export to the European Union listed within the ICPR, or if the specific genus/species is not listed in section 4 contact PlantExports@mpi.govt.nz.

Note: Exporters are advised to plan exports in advance, if shipping to the EU, as field surveys and testing are required.

3.4 Seeds, Grains and Nuts

3.4.1 Seeds, Grains and Nuts for Sowing

Seed species of the following genera intended for planting:

<i>Acacia</i> spp.	<i>Delphinium elatum</i>	<i>Lupinus arboreus</i>
<i>Acaena inermis</i>	<i>Dianella nigra</i>	<i>Meconopsis</i> spp.
<i>Acanthus mollis</i>	<i>Dierama</i> spp.	<i>Melianthus major</i>
<i>Acca sellowiana</i>	<i>Diplotaxis tenuifolia</i>	<i>Melissa officinalis</i>
<i>Achillea millefolium</i>	<i>Dodonaea</i> spp.	<i>Mentha spicata</i>
<i>Agapanthus orientalis</i>	<i>Echinacea purpurea</i>	<i>Myosotidium hortensia</i>
<i>Agrostis</i> spp.	<i>Eruca sativa</i>	<i>Ocimum basilicum</i>
<i>Ammophila arenaria</i>	<i>Eryngium bourgatii</i>	<i>Origanum hirtum</i>
<i>Anemanthele lessoniana</i>	<i>Eucalyptus</i> spp.	<i>Origanum vulgare</i>
<i>Anethum graveolens</i>	<i>Euphorbia</i> spp.	<i>Pachystegia insignis</i>
<i>Anisotome</i> spp.	<i>Fagopyrum esculentum</i>	<i>Pastinaca sativa</i>
<i>Anthriscus sylvestris</i>	<i>Festuca actae</i>	<i>Phacelia tanacetifolia</i>
<i>Asparagus officinalis</i>	<i>Festuca arundinacea</i>	<i>Phormium tenax</i>
<i>Avena sativa</i>	<i>Festuca coxii</i>	<i>Phormium tenax purpurea</i>
<i>Borago officinalis</i>	<i>Festuca longifolia</i>	<i>Plantago</i> spp.
<i>Brassica</i> spp.	<i>Festuca pratensis</i>	<i>Primula</i> spp.
<i>Caltha palustris</i>	<i>Festulolium loliaceum</i>	<i>Pulsatilla vulgaris</i>
<i>Carex</i> spp.	<i>Francoa</i> spp.	<i>Raphanobrassica</i> spp.
<i>Chaerophyllum bulbosum</i>	<i>Geranium wallichianum</i>	<i>Raphanus sativus</i>
<i>Chaerophyllum hirsutum</i>	<i>Helichrysum bellidioides</i>	<i>Raphanus sativus</i> var. <i>longipinnatus</i>
<i>Chionochloa</i> spp.	<i>Helleborus</i> spp.	<i>Ruta graveolens</i>
<i>Cichorium intybus</i>	<i>Holcus lanatus</i>	<i>Salvia splendens</i>
<i>Clanthus puniceus</i>	<i>Hordeum vulgare</i>	<i>Sanguisorba minor</i>
<i>Commelina</i> spp.	<i>Iris foetidissima</i>	<i>Scleranthus biflorus</i>
<i>Cordyline australis</i>	<i>Iris laevigata</i>	<i>Sedum</i> spp.
<i>Coriandrum sativum</i>	<i>Kniphofia</i> spp.	<i>Sequoia sempervirens</i>
<i>Cortaderia fulvida</i>	<i>Lactuca sativa</i>	<i>Silene schafta</i>
<i>Cortaderia selloana</i>	<i>Lathyrus odoratus</i>	<i>Sinapis alba</i>
<i>Corymbia citriodora</i>	<i>Lens culinaris</i>	<i>Spinacia oleracea</i>
<i>Cryptomeria japonica</i>	<i>Leptospermum scoparium</i>	<i>Thymus vulgaris</i>
<i>Cucurbita maxima</i>	<i>Lewisia</i> spp.	<i>Tiarella wherryi</i>
<i>Cucurbita moschata</i>		<i>Uncinia rubra</i>
<i>Cucurbita pepo</i>	<i>Libertia</i> spp.	<i>Valerianella locusta</i>
<i>Cynosurus cristatus</i>	<i>Lilium</i> spp.	<i>Vigna caracalla</i>

<i>Dactylis glomerata</i>	<i>Lolium</i> spp.	<i>Zinnia elegans</i>
<i>Daucus carota</i>	<i>Lupinus angustifolius</i>	

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

For seed species with commodity specific requirements refer to section 4.4.1.

If the specific genus/species for export is not listed in section 3.4.1 or section 4.4.1 contact PlantExports@mpi.govt.nz.

Note: Seeds of crops treated with plant protection products containing fipronil shall not be used or placed on the market. There is an exception for seeds intended to be sown in greenhouses. The seeds of leek, onions, shallots, the group of Brassica vegetables intended to be sown in fields and harvested before flowering are also exempt.

3.5 Growing Media and Packing Material

3.5.1 Soil (whole or in part of solid organic substances)

Conditions

PROHIBITED

(Refer to section 2.6 Prohibitions)

Growing Media (composed entirely of peat or fibre of *Cocos nucifera*)

Conditions:

Import permit not required. Phytosanitary certificate and additional declarations required.

Note: AD 1 below referred to in appendix 1 is consignment specific.

Growing medium, attached to or associated with plants, intended to sustain the vitality of the plants, with the exception of sterile medium of in-vitro plants

Additional Declaration:

“Consignment complies with Annex VII, point 1, option (a), item (i) of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was free from soil, and organic matter and not previously used for growing plants or for any agricultural purposes.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (ii), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants composed entirely of peat or fibre of *Cocos nucifera* and had not been previously used for growing plants or for any agricultural purposes.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (iii), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was subjected to effective fumigation or heat treatment to ensure freedom from quarantine pests and which is indicated on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031 under the rubric ‘Additional declaration’.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (iv), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was subjected to effective systems approach to ensure freedom from pests and which is indicated on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031, under the rubric ‘Additional declaration.’”

And

in all the above cases mentioned in (i) to (iv) was stored and maintained under appropriate conditions to keep freedom from Union quarantine pests.

And

“Consignment complies with Annex VII, point 1, option (b), item (i), of Commission Implementing Regulation (EU) 2019/2072. This declares that since planting:

appropriate measures have been taken to ensure that the growing medium has been kept free from Union quarantine pests, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination
- hygiene measures
- using water free from Union quarantine pests.”

Or

“Consignment complies with Annex VII, point 1, option (b), item (ii), of Commission Implementing Regulation (EU) 2019/2072. This declares that since planting:

-Within two weeks prior to export the growing medium including, where appropriate, soil has been completely removed by washing using water free from Union quarantine pests. Replanting may be performed in the growing medium that shall meet the requirements laid down in point (a). Appropriate conditions shall be maintained to keep freedom from Union quarantine pests as stipulated in point (b).

Note: “the growing medium at the time of planting ...” only applies when there is soil or growing medium attached to, or associated with, the commodity at the time of import (FERA correspondence 4 August 2010). MPI interprets this as it only applies if the roots have not been washed free of soil and have been inspected to confirm this.

Treatment Schedule for growing medium use to sustain the vitality of plants:

Concentration (g/m3)	Temperature (°C)	Exposure Period
80	21 and above	72
96	11-20	72
120	10 and above	24

Pure Peat

Conditions:

Import permit not required. Phytosanitary certificate required.

Note: Sphagnum moss growing media are classified as ‘peat’ based on European Food Safety Authority (EFSA) Report on Risks to plant health.

3.6 Miscellaneous

Terrarium bedding

Conditions:

Refer to Section 4.6.

Used machinery and vehicles (agricultural or forestry)

Conditions

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 “Inspection on Arrival” for further information.

And

For France (Brittany), Finland, Ireland, Northern Ireland and Portugal (Azores) only:

The machinery must have:

- a) been cleaned and free from soil and plant debris when brought to places of production, where beets are grown; or
- b) come from an area where BNYVV is known not to occur.

Additional declaration

“Consignment complies with Annex VII of Commission Implementing Regulations (EU) 2019/2072.

This declares that the machinery or vehicles are cleaned and free from soil and plant debris.”

4 Commodity Specific Requirements

4.1 Fresh Fruit and Vegetables

Actinidia spp.

Kiwifruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Allium cepa

Onion

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Allium porrum

Leek

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration:

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

Allium sativum

Garlic

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Apium graveolens

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

And

For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration:

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

And

For consignments entering Ireland, and the United Kingdom (Northern Ireland):

Additional Declaration:

“Consignment complies with Annex X, point 31.1, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants originate in an area known to be free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess),”

Or

“Consignment complies with Annex X, point 31.1, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares immediately prior to their marketing, the plants have been officially inspected and found free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess).”

Asparagus officinalis.

Asparagus

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Beta spp. (except B. vulgaris)

Beetroot, Sugar beet etc.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

Beta vulgaris (intended for industrial processing)

Beetroot, Sugar beet etc.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 5, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares that the plants are transported in such a manner as to ensure that there is no risk of spreading BNYVV, and are intended to be delivered to a processing plant with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants have been grown in an area where BNYVV is known not to occur.”

Brassica oleracea var. gemmifera

Brussels sprouts

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Brassica napus

Rapeseed oil

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

Brassica rapa

Turnip

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYVV.”

Capsicum spp.

Bell peppers, capsicums

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Additional Declaration:

“Consignment complies with Annex VII, point 68, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that fruits originate in a country recognised as being free from *Neoleucinodes elegantalis* (Guenée) in accordance with the relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.”

Note: New Zealand is free from *Neoleucinodes elegantalis* (Guenée).

And

“Consignment complies with Article 10, item (a) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits originate in a country where *Spodoptera frugiperda* (Smith) is not known to occur.”

Or

“Consignment complies with Article 10, item (b) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits originate in an area free from *Spodoptera frugiperda* (Smith), as established by the National Plant Protection Organisation (NPPO) concerned, in accordance with the International Standards for Phytosanitary Measures No 4.”

Note: The name of the area is to be stated in the phytosanitary certificate under the ‘place of origin’.

Or

“Consignment complies with Article 10, item (c), of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subject to an official inspection and found free from *Spodoptera frugiperda* (Smith), and originate from a site of production complying with the following requirements:

- (i) The fruits have been produced in a production site which is registered and supervised by the NPPO in the country of origin.”

And

(ii) Official inspections have been carried out during the last three months prior to export, and no presence of *Spodoptera frugiperda* (Smith) has been detected on the specified plants.”

And

(iii) The fruits have been produced in a production site which has complete physical isolation against the introduction of *Spodoptera frugiperda* (Smith).”

And

(iv) Information ensuring traceability of the fruits to that site of production has been ensured during their movement prior to export.”

Or

“Consignment complies with Article 10, item (d) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subject to an official inspection and found free from *Spodoptera frugiperda* (Smith), and they originate from a site of production complying with the following requirements:

(i) The fruits have been produced in a production site which is registered and supervised by the NPPO in the country of origin.

And

(ii) Official inspections have been carried out during the three months prior to export, and no presence of *Spodoptera frugiperda* (Smith) has been detected on the specified plants.”

And

(iii) The fruits have been subjected to an effective treatment to ensure freedom from *Spodoptera frugiperda* (Smith).”

And

(iv) Information ensuring the traceability of the fruits to that site of production has been ensured during their movement prior to export.”

Or

“Consignment complies with Article 10, item (e) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subjected to an effective post-harvest treatment to ensure freedom from *Spodoptera frugiperda* (Smith).”

Note: Treatment method and details are to be stated on the phytosanitary certificate.

Citrus spp.

Citrus

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declarations required. The fruits shall be free from peduncles and leaves and the packaging shall bear an appropriate origin mark. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declarations:

“Consignment complies with Annex VII, all item (a) of points 58, 59 and 60, of Commission Implementing Regulations (EU) 2019/2072.

This declares the fruits originate in a country recognised as free from *Xanthomonas citri* pv. *citri*, *Xanthomonas citri* pv. *aurantifolii*, *Pseudocercospora angolensis*, and *Phyllosticta citricarpa*, in accordance with the relevant International Standards for Phytosanitary Measures, and this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.

Note: *Phyllosticta citricarpa* additional declaration does not apply to *Citrus aurantium* and *Citrus latifolia*

And

“Consignment complies with Annex VII, point 61, item (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the fruits originate in a country recognised as free from *Tephritidae* as referred to in point 77 of table 3, Part A of Annex II, to which those fruits are known to be susceptible in accordance with relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the National Plant Protection Organisation of the third country concerned,”

Note: New Zealand is free from *Tephritidae* (non-European).

Cucurbita maxima

Squash

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Daucus carota

Carrot

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.
For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores), and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 4, option (a) of Commission Implementing Regulations (EU) 2019/2072.

This declares the consignment or lot shall not contain more than 1% by weight of soil and growing medium.”

Or

“Consignment complies Annex X, point 4, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants are intended for processing at premises with officially approved waste disposal facilities, which ensures that there is no risk of spreading BNYPV.”

Diospyros kaki

Persimmon (Japanese)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Fragaria spp.

Strawberry

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Ipomoea batatas

Kumara

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Lens culinaris

Lentil

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Malus spp.

Conditions:

Apples

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Note: The specific species of *Malus* must be listed on the phytosanitary certificate.

Additional Declaration:

“Consignment complies with Annex VII, all option (a) of points 64, 65, and 66 of Commission Implementing Regulation (EU) 2019/2072. This declares the fruits originate in a country recognised as being free from *Botryosphaeria kuwatsukai* (Hara) G.Y Sun and E. Tanaka, *Anthonomus quadrigibbus* (Say), *Grapholita prunivora* (Walsh), *Grapholita inopinata* (Heinrich), and *Rhagoletis pomonella* (Walsh), in accordance with relevant International Standards for Phytosanitary Measures, and this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.”

Note: New Zealand is free from *Botryosphaeria kuwatsukai* (Hara) G.Y Sun and E. Tanaka, *Anthonomus quadrigibbus* (Say), *Grapholita prunivora* (Walsh), *Grapholita inopinata* (Heinrich), and *Rhagoletis pomonella* (Walsh).

Mangifera spp.

Mangoes

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

“Consignment complies with Annex VII, point 61, item (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the fruits originate in a country recognised as free from *Tephritidae* as referred to in point 77 of table 3, Part A of Annex II, to which those fruits are known to be susceptible in accordance with relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the National Plant Protection Organisation of the third country concerned.”

Note: New Zealand is free from *Tephritidae* (non-European).

Ocimum spp. (leafy vegetables)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and Additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

And

For consignments entering Ireland, and the United Kingdom (Northern Ireland):

Additional Declaration:

“Consignment complies with Annex X, point 31.1, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants originate in an area known to be free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess),”

Or

“Consignment complies with Annex X, point 31.1, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares immediately prior to their marketing, the plants have been officially inspected and found free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess).”

Passiflora edulis

Passionfruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Persea americana

Avocado

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Prunus spp.

Stone fruit/Summer fruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declarations:

“Consignment complies with Annex VII, point 61, item (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the fruits originate in a country recognised as free from *Tephritidae* as referred to in point 77 of table 3, Part A of Annex II, to which those fruits are known to be susceptible in accordance with relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the National Plant Protection Organisation of the third country concerned,”

Note: New Zealand is free from *Tephritidae* (non-European).

Psidium spp.

Guava

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Pyrus spp.

Pear

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, all option (a) of points 64 and 65 of Commission Implementing Regulation (EU) 2019/2072. This declares the fruits originate in a country recognised as being free from *Botryosphaeria kuwatsukai* (Hara) G.Y Sun and E. Tanaka and *Anthonomus quadrigibbus* (Say), in accordance with relevant International Standards for Phytosanitary Measures, and this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.”

Note: New Zealand is free from *Botryosphaeria kuwatsukai* (Hara) G.Y Sun and E. Tanaka and *Anthonomus quadrigibbus* (Say).

Ribes nigrum

Currant - black

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Solanaceae

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Note: Tubers of *Solanum tuberosum* (seed potatoes) are prohibited (refer Section 2.6 Prohibitions)

Additional Declaration:

“Consignment complies with Annex VII, point 67, item (c) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in a place of production, where official inspections and surveys for the presence of *Bactericera cockerelli* (Sulc.) including its immediate vicinity are carried out during the last three months prior to export and subject to effective treatments to ensure freedom from the pest, and representative samples of the fruit have been inspected prior to export and information on traceability is included in the phytosanitary certificate.”

Or

“Consignment complies with Annex VII, point 67, item (d) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in an insect proof site of production, established by the National Plant Protection Organisation in the country of origin, as being free from *Bactericera cockerelli* (Sulc.), on the basis of official inspections and surveys carried out during the three months prior to export, and information on traceability is included in the phytosanitary certificate”

Solanum lycopersicum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 67, item (c) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in a place of production, where official inspections and surveys for the presence of *Bactericera cockerelli* (Sulc.) including its immediate vicinity are carried out during the last three months prior to export and subject to effective treatments to ensure freedom from the harmful organism, and representative samples of the fruit have been inspected prior to export and information on traceability is included in the certificates referred to in Article 71 of Regulation (EU) No. 2016/2031.”

Or

“Consignment complies with Annex VII, point 67, item (d) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in an insect proof site of production, established by the National Plant Protection Organisation in the country of origin, as being free from *Bactericera cockerelli* (Sulc.), on the basis of official inspections and surveys carried out during the three months prior to export, and information on traceability is included in the certificates referred to in Article 71 of Regulation (EU) No. 2016/2031.”

And

“Consignment complies with Annex VII, point 68, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that fruits originate in a country recognised as being free from *Neoleucinodes elegantalis* (Guenée) in accordance with the relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.”

Note: New Zealand is free from *Neoleucinodes elegantalis* (Guenée).

And

“Consignment complies with Annex VII, point 69, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that fruits originate in a country recognised as being free from *Keiferia lycopersicella* (Walsingham) in accordance with the relevant International Standards for Phytosanitary Measures.”

Note: *Keiferia lycopersicella* (Walsingham) is not known to occur in New Zealand.

Solanum melongena

Eggplant

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Article 10, item (a) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits originate in a country where *Spodoptera frugiperda* (Smith) is not known to occur.”

Or

“Consignment complies with Article 10, item (b) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits originate in an area free from *Spodoptera frugiperda* (Smith), as established by the National Plant Protection Organisation (NPPO) concerned, in accordance with the International Standards for Phytosanitary Measures No 4.”

Note: The name of the area is to be stated in the phytosanitary certificate under the 'place of origin'.

Or

"Consignment complies with Article 10, item (c), of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subject to an official inspection and found free from *Spodoptera frugiperda* (Smith), and originate from a site of production complying with the following requirements:

(i) The fruits have been produced in a production site which is registered and supervised by the NPPO in the country of origin."

And

(ii) Official inspections have been carried out during the last three months prior to export, and no presence of *Spodoptera frugiperda* (Smith) has been detected on the specified plants."

And

(iii) The fruits have been produced in a production site which has complete physical isolation against the introduction of *Spodoptera frugiperda* (Smith)."

And

(iv) Information ensuring traceability of the fruits to that site of production has been ensured during their movement prior to export."

Or

"Consignment complies with Article 10, item (d) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subject to an official inspection and found free from *Spodoptera frugiperda* (Smith), and they originate from a site of production complying with the following requirements:

(i) The fruits have been produced in a production site which is registered and supervised by the NPPO in the country of origin.

And

(ii) Official inspections have been carried out during the three months prior to export, and no presence of *Spodoptera frugiperda* (Smith) has been detected on the specified plants."

And

(iii) The fruits have been subjected to an effective treatment to ensure freedom from *Spodoptera frugiperda* (Smith)."

And

(iv) Information ensuring the traceability of the fruits to that site of production has been ensured during their movement prior to export."

Or

"Consignment complies with Article 10, item (e) of Commission Implementing Decision (EU) 2023/1134. This declares the fruits have been subjected to an effective post-harvest treatment to ensure freedom from *Spodoptera frugiperda* (Smith)."

Note: Treatment method and details are to be stated on the phytosanitary certificate.

And

"Consignment complies with Annex VII, point 67, item (c) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in a place of production, where official inspections and surveys for the presence of *Bactericera cockerelli* (Sulc.) including its immediate vicinity are carried out during the last three months prior to export and subject to effective treatments to ensure freedom from the harmful organism, and representative samples of the fruit have been inspected prior to export and information on traceability is included in the certificates referred to in Article 71 of Regulation (EU) No. 2016/2031."

Or

"Consignment complies with Annex VII, point 67, item (d) of Commission Implementing Regulation (EU) 2019/2072. The fruits originate in an insect proof site of production, established by the National Plant Protection Organisation in the country

of origin, as being free from *Bactericera cockerelli* (Sulc.), on the basis of official inspections and surveys carried out during the three months prior to export, and information on traceability is included in the certificates referred to in Article 71 of Regulation (EU) No. 2016/2031.”

And

“Consignment complies with Annex VII, point 68, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that fruits originate in a country recognised as being free from *Neoleucinodes elegantalis* (Guenée) in accordance with the relevant International Standards for Phytosanitary Measures, provided that this freedom status has been communicated in advance in writing to the Commission by the national plant protection organisation of the third country concerned.”

Note: New Zealand is free from *Neoleucinodes elegantalis* (Guenée).

And

“Consignment complies with Annex VII, point 69, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that fruits originate in a country recognised as being free from *Keiferia lycopersicella* (Walsingham) in accordance with the relevant International Standards for Phytosanitary Measures.”

Note: *Keiferia lycopersicella* (Walsingham) is not known to occur in New Zealand

And

“Consignment complies with Annex VII, point 70, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that the fruits originate in a country free from *Thrips palmi* Karny in accordance with relevant International Standards for Phytosanitary Measures.

Or

“Consignment complies with Annex VII, point 70, item (c), of Commission Implementing Regulation (EU) 2019/2072. This declares the fruits, immediately prior to their export, have been officially inspected and found free from *Thrips palmi* Karny.”

Note: *Thrips palmi* is not known to occur in New Zealand.

Vaccinium spp.

Blueberry

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

And

4.2 Cut Flowers and Foliage

Aster spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Chrysanthemum spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Dianthus spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Eryngium spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Gypsophila spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Humulus lupulus

Hops

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Attestation certificate of equivalence required.

For a list of EU import regulations related to hops please contact Plant Exports. Refer to Section 1.1.

Hypericum spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Lisianthus spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Orchidaceae

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional declaration:

“Consignment complies with Annex VII, point 29, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares the cut flowers originate in a country recognised as being free from *Thrips palmi* Karny in accordance with the relevant International Standards for Phytosanitary Measures.”

Or

“Consignment complies with Annex VII, point 29, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares the cut flowers, immediately prior to their export, have been officially inspected and found free from *Thrips palmi* Karny.”

Note: *Thrips palmi* is not known to occur in New Zealand.

Rosa spp.

Roses

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Solidago spp.

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Additional Declaration:

“Consignment complies with Annex VII, point 28, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares that the cut flowers and the leafy vegetables originate in a country recognised as being free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

Or

“Consignment complies with Annex VII, point 28, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares that cut flowers and the leafy vegetables immediately prior to their export, have been officially inspected and found free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (Malloch).”

Note: New Zealand is free from *Liriomyza sativae* (Blanchard) and *Nemorimyza maculosa* (syn. *Amauromyza maculosa* (Malloch)).

4.3 Nursery Stock

Plants and parts of plants for propagation (other than seeds). Phytosanitary import permit not required. Phytosanitary certificate required. Additional declarations required where specified. Please also refer to appendix 2.

Refer Section 2.6 for Prohibitions.

If the specific genus/species for export is not listed contact PlantExports@mpi.govt.nz.

Explanation of Format	
Bulbs	Refers to bulbs/corms/rhizomes/tubers (without foliage)
Plants	Includes whole plants and parts of plants intended for planting other than seed. Check also for other listings i.e. budwood
Tissue culture	The growth of plants or plant parts in a clear aseptic medium in a closed transparent container
Additional Declarations	
2,5,7	(Numbers in standard text) - Requirement
1,4	(Numbers in bold text) – Commodity Specific Requirement

4.3.1 Requirements for General Plant Groups

General

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declarations required as specified.

Refer to Section 4.3.2 for commodity specific requirements.

Aquatic Plants

For phytosanitary requirements of other aquatic plants, please contact Plant Exports for further information.

Naturally or artificially dwarfed plants for planting other than seeds

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declarations required.

Additional Declarations:

“Consignment complies with Annex VII, point 30, item (a), of Commission Implementing Regulation (EU) 2019/2072. This declares the plants, including those collected directly from natural habitats have been grown, held and trained for at least two consecutive years prior to dispatch in officially registered nurseries, which are subject to an officially supervised control regime

Note: The control regime conditions are as follows – do not identify conditions unless specifically identified as requiring to be stated

And

“Consignment complies with Annex VII, point 30, item (b), of Commission Implementing Regulation (EU) 2019/2072. This declares the plants on the nurseries referred to in

(i) shall: at least during the period referred to in (a) of this entry:

- be potted, in pots which are placed on shelves at least 50 cm above ground, have been subjected to appropriate treatments to ensure freedom from non-European rusts and the active ingredient, concentration and date of application of these treatments shall be mentioned on the phytosanitary certificate provided for in Article 71 of Regulation (EU) No 2016/2031, under the rubric 'Disinfestation and/or disinfection treatment'.
- have been officially inspected at least six times a year at appropriate intervals for the presence of Union quarantine pests of concern in accordance with Regulation (EU) No 2016/2031, and these inspections have also been carried out on plants in the immediate vicinity of the nurseries referred to in point (a) of this entry, at least by visual examination of each row in the field or nursery and by visual examination of all parts of the plant above the growing medium, using a random sample of at least 300 plants from a given genus where the number of plants of that genus is not more than 3 000 plants, or 10 % of the plants if there are more than 3 000 plants from that genus,
- have been found free, in these inspections, from the relevant Union quarantine pests of concern as specified in the previous indent. Infested plants shall be removed. The remaining plants, where appropriate, shall be effectively treated, and in addition shall be held for an appropriate period and inspected to ensure freedom from such Union quarantine pests of concern,
- have been planted in either an unused artificial growing medium or in a natural growing medium, which has been treated by fumigation or by appropriate heat treatment and has been free of any Union quarantine pests,
- have been kept under conditions which ensure that the growing medium has been maintained free from Union quarantine pests and within two weeks prior to dispatch, have been:
 - shaken and washed with clean water to remove the original growing medium and kept bare rooted
Or
 - shaken and washed with clean water to remove the original growing medium and replanted in growing medium which meets the conditions laid down in (i) fifth indent
Or
 - subjected to appropriate treatments to ensure that the growing medium is free from Union quarantine pests, the active ingredient, concentration and date of application of these treatments shall be mentioned on the phytosanitary certificate provided for in Article 71 of Regulation (EU) No 2016/203 under the rubric 'disinfestation and/or disinfection treatment'

(ii) were packed in closed containers which have been officially sealed and bear the registration number of the registered nursery; this number shall also be indicated under the rubric additional declaration on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031, enabling the consignments to be identified.

Cactaceae

4.3.2 Specific Commodity Requirements

General

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declaration(s) required as identified.

Appendix 1 provides a key to the most common additional declarations.

The following additional declaration is required for plants for planting species listed in Appendix 2:

“Consignment complies with Article 28 of Commission Implementing Regulation (EU) 2020/1201 and *Xylella fastidiosa* is not present in New Zealand”

Note: Annual site inspections for *Xylella fastidiosa* are required for the species listed in Appendix 2.

For all Bulbs, corms, rhizomes and tubers, intended for planting, other than tubers of *Solanum tuberosum*, the following additional declaration applies:

“Consignment complies with Annex VII, point 13 of Commission Implementing Regulation (EU) 2019/2072. This declares that the consignment or lot shall not contain more than 1% by net weight of soil and growing medium.”

Please Note

The specific requirements for nursery stock of certain named genus/species are listed below. For any unnamed genus/species or particular plant material (for example whole plants, cuttings, budwood, tissue culture or pollen), please check the requirements with your importer and ensure you obtain the pertinent information before requesting a phytosanitary certificate.

Acacia spp.

Conditions:

Prohibited pending risk assessment (Effective 14 December 2019).

Abies spp.
Conditions:
PROHIBITED

Fir

Acer japonicum
Acer palmatum
Acer shirasawanum
Conditions:

Maple

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declarations required as identified below. The specification of the registered site(s) of production must be included in the additional declarations. Plants must be bare rooted, free of leaves, grafted or budded, one-to three-year old plants for planting.

And

Combined Part D, Annex IV and Part C, Annex V. RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes and measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The following measures shall be taken concerning the respective RNQPs and:

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled. Refer to the Requirements column.

Viruses, viroids, virus-like diseases and phytoplasmas			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes	Requirements (Ref.: Consignment complies with Annex V, Part C of Commission Implementing Regulation (EU) 2019/2072)
<i>Candidatus Phytoplasma solani</i>	Plants for planting other than seeds <i>Lavandula L.</i>	0%	(a) the plants have grown in a site of production known to be free from <i>Candidatus Phytoplasma solani</i> Quaglino <i>et al.</i> ; or

Quaglino et al. [PHYPSO]			<p>(b) no symptoms of <i>Candidatus Phytoplasma solani</i> Quaglino et al. have been seen during visual inspections, of the lot in the last complete cycle of vegetation; or</p> <p>(c) plants showing symptoms of <i>Candidatus Phytoplasma solani</i> Quaglino et al. have been rogued out and destroyed, and the lot has been tested, on the basis of a representative sample of remaining plants and found free from the pest.</p>
--------------------------	--	--	--

And

For the Northern Ireland only:

“Consignment complies with Table A3, point 2, (a) (i) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year prior to the export of the plants”

Or

“Consignment complies with Table A3, point 2, (a) (ii) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa* (Wells et al.) on the basis of official inspections, which included testing, where appropriate, that was carried out at appropriate times”

Or

“Consignment complies with Table A3, point 2, (a) (iii) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the plants have been subjected to an annual official inspection at an appropriate time, which included sampling and testing that confirmed the absence of *Xylella fastidiosa* (Wells et al.) and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 5%”

Or

“Consignment complies with Table A3, point 2, (a) (iv) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that, immediately prior to their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* (Wells et al.) and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence”

Or

“Consignment complies with Table A3, point 2, (a) (v) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that where there has been any evidence of the presence of the vector of *Xylella fastidiosa* (Wells et al.) at the place of production, that chemical and cultural controls have been used to suppress the vector”

And

“Consignment complies with Table A3, point 2, (a) (vi) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that where the place of production is located in an area where *Xylella fastidiosa* (Wells et al.) is known to occur, that the plants have been

grown throughout their life under complete physical protection; and appropriate hygiene measures have been implemented at the place of production to ensure that *Xylella fastidiosa* (Wells et al.) is not transmitted by tools or equipment”

Or

“**Consignment complies with Table A3, point 2, (b) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020.** This declares that that they derive from mother plants which were grown in accordance with the requirements specified in paragraph (a) (i) to (vi)”

And

Combined Part D, Annex IV and Part C, Annex V. RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes and measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The following measures shall be taken concerning the respective RNQPs and:

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled. Refer to the Requirements column.

Nematodes

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the propagating material of ornamental plants concerned and other plants for planting intended for ornamental purposes	Requirements (Ref.: Consignment complies with Annex V, Part C of Commission Implementing Regulation (EU) 2019/2072)
<i>Ditylenchus dipsaci</i> (Kuehn) Filipjev [DITYDI]	Plants for planting other than seeds <i>Narcissus L.</i>	0%	(a) the plants or seed-producing plants have been inspected and no symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been observed on the lot since the beginning of the last complete cycle of vegetation; or (b) the bulbs have been found free from symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev, on the basis of visual inspections carried out at the most appropriate time to detect the pest and packed for sale to the final consumer.

Olea europaea

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. Additional declarations required as identified below.

Bulbs etc

N/A

Plants

2,3,6, 21,
1,4, 23

Tissue Culture

And

“Consignment complies with Article 28 of Commission Implementing Regulation (EU) 2020/1201 and *Xylella fastidiosa* is not present in New Zealand”

(See Appendix 2 for more information)

And

For Northern Ireland only:

“Consignment complies with Table A3, point 1, (a) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the plants have been grown in a place of production which has been registered and supervised by the national plant protection organisation for a period of at least one year prior to the export of the plants”

Or

“Consignment complies with Table A3, point 1, (b) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the place of production, together with a 200m zone surrounding the place of production, is known to be free from *Xylella fastidiosa*

(Wells et al.) on the basis of official inspections, which included testing where appropriate, and were carried out at appropriate times during the 12 months prior to the export of the plants”

Or

“Consignment complies with Table A3, point 1, (c) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that the plants have been subjected to an annual official inspection at an appropriate time which included sampling and testing that confirmed the absence of *Xylella fastidiosa* (Wells et al.) and was carried out in accordance with international standards using a sampling scheme able to identify with 99% reliability a level of presence of infected plants of 1%”

Or

“Consignment complies with Table A3, point 1, (d) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that, immediately prior to their export, the plants were subjected to an official visual inspection for the presence of *Xylella fastidiosa* (Wells et al.) and, where any symptoms giving rise to a suspicion of its presence were observed, were tested in line with international standards for its presence, confirming its absence”

And

“Consignment complies with Table A3, point 1, (e) of The Official Controls (Plant Health and Genetically Modified Organisms) (England) (Amendment) Regulations 2020. This declares that where the place of production of the plants is located in an area where *Xylella fastidiosa* (Wells et al.) is known to occur, that the plants have been grown under complete physical protection for a period of at least four years prior to their export or, in the case of plants which are younger than four years, throughout their life.”

And

Part J, Annex IV. RNQPs concerning fruit propagating material and fruit plants intended for fruit production

Bacteria		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Pseudomonas savastanoi</i> pv. <i>savastanoi</i> (Smith) Gardan et al. [PSDMSA]	<i>Olea europaea</i> L.	0%
Fungi and oomycetes		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Verticillium dahliae</i> Kleb [VERTDA]	<i>Olea europaea</i> L.	0%
Nematodes		

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned

Rosa spp.
Conditions:

- (i) **Budwood/Cuttings:**
Phytosanitary import permit not required. Phytosanitary certificate required with additional declarations. It is recommended that the following additional declarations be utilised for the whole of the EU.

Budwood/Cuttings
2,3,6,7

And
"New Zealand is free from *Anoplophora chinensis*"

- (ii) **Plants and tissue culture:**
Phytosanitary import permit not required. Phytosanitary certificate required. Additional declarations required as identified below. Must be dormant (free from leaves, flowers and fruit)

Bulbs etc
N/A

Plants
2,3,6, 21,
1,4, 23

Tissue Culture
Prohibited

And
"New Zealand is free from *Anoplophora chinensis*"

And
"Consignment complies with Article 28 of Commission Implementing Regulation (EU) 2020/1201 and *Xylella fastidiosa* is not present in New Zealand"

(See Appendix 2 for more information)

Rubus spp.
Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional declarations required as identified below.

Plants
2,3,6, 21,
1,4, 7, 23

Tissue Culture
1

And
"Consignment complies with Article 28 of Commission Implementing Regulation (EU) 2020/1201 and *Xylella fastidiosa* is not present in New Zealand"

(See Appendix 2 for more information)

And
"Consignment complies with Annex VII, point 45 of Commission Implementing Regulation (EU) 2019/2072. This declares that no symptoms of diseases caused by viruses, viroids and phytoplasmas referred to in point 22 of Part A of Annex II and *Phyllosticta solitaria* Ell. and Ev. have been observed on the plants at the place of production since the beginning of the last complete cycle of vegetation."
And

“Consignment complies with Annex VII, point 48 of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants are free from aphids, including their eggs.”

And

“Consignment complies with Annex VII, point 48, (i) first indent of Commission Implementing Regulation (EU) 2019/2072. The plants have been officially certified under a certification scheme requiring them to be derived in direct line from material which has been maintained under appropriate conditions and subjected to official testing at least for, Black raspberry latent virus using appropriate indicators for the presence of Black raspberry latent virus or equivalent methods and has been found free, in these tests, from Black raspberry latent virus”

Or

“Consignment complies with Annex VII, point 48, (i) second indent of Commission Implementing Regulation (EU) 2019/2072” The plants are derived in direct line from material which is maintained under appropriate conditions and has been subjected, within the last three complete cycles of vegetation, at least once, to official testing at least for Black raspberry latent virus, using appropriate indicators for the presence of Black raspberry latent virus or equivalent methods and has been found free, in these tests, from Black raspberry latent virus”

And

“Consignment complies with Annex VII, point 48, (ii) of Commission Implementing Regulation (EU) 2019/2072. No symptoms of diseases caused by Black raspberry latent virus have been observed on plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last complete cycles of vegetation.”

And

(for pests Raspberry leaf curl virus, Cherry rasp leaf)

“Consignment complies with Annex VII, point 48.1, (i) first indent of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been officially certified under a certification scheme requiring that they are derived in direct line from material which has been maintained under appropriate conditions and subjected to official testing at least for the relevant Union quarantine pests, using appropriate indicators for the presence of those pests or equivalent methods and has been found free, in these tests, from those Union quarantine pests,”

OR

“Consignment complies with Annex VII, point 48.1, (i) second indent of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been derived in direct line from material which is maintained under appropriate conditions and has been subjected, within the last three complete cycles of vegetation, at least once, to official testing at least for the relevant Union quarantine pests, using appropriate indicators for the presence of those pests or equivalent methods and has been found free, in these tests, from those Union quarantine pests;

And

“Consignment complies with Annex VII, point 48.1, (ii) of Commission Implementing Regulation (EU) 2019/2072. The Plants have shown no symptoms of diseases caused by the relevant Union quarantine pests have been observed on plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last complete cycle of vegetation.”

“Consignment complies with Annex VII, point 24.1,option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants originate in a country recognised as being free from *Eotetranychus lewisi* (McGregor) in accordance with the relevant International Standards for Phytosanitary Measures,”
OR

“Consignment complies with Annex VII, point 24.1,option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants originate in an area established by the national plant protection organisation in the country of origin as being free from *Eotetranychus lewisi* (McGregor) in accordance with the relevant International Standards for Phytosanitary Measures. The name of the area shall be mentioned on the phytosanitary certificate,”
OR

“Consignment complies with Annex VII, point 24.1,option (c) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants originate in a place of production, established in the country of origin by the national plant protection organisation in that country, as being free from *Eotetranychus lewisi* (McGregor), in accordance with the relevant International Standards for Phytosanitary Measures.”

And

Part J, Annex IV. RNQPs concerning fruit propagating material and fruit plants intended for fruit production

Bacteria		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Agrobacterium</i> spp. Conn [1AGRBG]	<i>Rubus</i> L.	0%
<i>Rhodococcus fascians</i> Tilford [CORBFA]	<i>Rubus</i> L.	0%
Fungi and oomycetes		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Peronospora rubi</i> Rabenhorst [PERORU]	<i>Rubus</i> L.	0%
<i>Phytophthora</i> spp. de Bary [1PHYTG]	<i>Rubus</i> L.	0%
Insects and mites		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Resseliella theobaldi</i> Barnes [THOMTE]	<i>Rubus</i> L.	0%
Nematodes		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned

Appendix 1: Additional Declarations (AD's) taken from Commission Implementing Regulation (EU) 2019/2072.

The EU stipulates requirements that particular genus/species have to fulfil prior to import. If there are no requirements listed for a particular genus/species contact PlantExports@mpi.govt.nz

- Growing medium, attached to or associated with plants, intended to sustain the vitality of the plants, with the exception of sterile medium of *in-vitro* plants.**

Note: “the growing medium at the time of planting ...” only applies when there is soil or growing medium attached to, or associated with, the commodity at the time of import (FERA correspondence 4 August 2010). MPI interprets this as saying it only applies if the roots have not been washed free of soil and have been inspected to confirm this.

Additional Declarations:

“Consignment complies with Annex VII, point 1, option (a), item (i) of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was free from soil, and organic matter and not previously used for growing plants or for any agricultural purposes.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (ii), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants composed entirely of peat or fibre of *Cocos nucifera* and had not been previously used for growing plants or for any agricultural purposes.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (iii), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was subjected to effective fumigation or heat treatment to ensure freedom from quarantine pests and which is indicated on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031 under the rubric ‘Additional declaration’.”

Or

“Consignment complies with Annex VII, point 1, option (a), item (iv), of Commission Implementing Regulation (EU) 2019/2072. This declares that the growing medium, at the time of planting of the associated plants was subjected to effective systems approach to ensure freedom from pests and which is indicated on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031, under the rubric ‘Additional declaration.’”

And

in all the above cases mentioned in (i) to (iv) was stored and maintained under appropriate conditions to keep freedom from Union quarantine pests.

And

“Consignment complies with Annex VII, point 1, option (b), item (i), of Commission Implementing Regulation (EU) 2019/2072. This declares that since planting:

appropriate measures have been taken to ensure that the growing medium has been kept free from Union quarantine pests, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination
- hygiene measures
- using water free from Union quarantine pests.”

Or

“Consignment complies with Annex VII, point 1, option (b), item (ii), of Commission Implementing Regulation (EU) 2019/2072. This declares that since planting:

-Within two weeks prior to export the growing medium including, where appropriate, soil has been completely removed by washing using water free from Union quarantine pests. Replanting may be performed in the growing medium that shall meet the requirements laid down in point (a). Appropriate conditions shall be maintained to keep freedom from Union quarantine pests as stipulated in point (b).

2. **Plants for planting, other than: bulbs, corms, rhizomes, seeds, and tubers and plants in tissue culture, originating in third countries**

Note: *Thrips palmi* is not known to occur in New Zealand.

Additional Declarations:

“Consignment complies with Annex VII, point 4, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

originate in an area, established in the country of export by the national plant protection service in that country, as being free from *Thrips palmi* Karny in accordance with relevant International Standards for Phytosanitary Measures and which is mentioned on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031 under the rubric ‘Additional declaration’.”

Or

“Consignment complies with Annex VII, point 4, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

originate in a place of production, established in the country of export by the national plant protection service in that country, as being free from *Thrips palmi* in accordance with relevant International Standards for Phytosanitary Measures, and which is mentioned on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031 under the rubric ‘Additional declaration’ and declared free from *Thrips palmi* on official inspections carried out at least monthly during the three months prior to export.”

Or

“Consignment complies with Annex VII, point 4, (c) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

immediately prior to export, the plants have been subjected to an appropriate treatment against *Thrips palmi* and the details of which have been indicated on the phytosanitary certificates referred to in Article 71 of Regulation (EU) No 2016/2031, and have been officially inspected and found free from *Thrips palmi*.”

3. **Plants for planting, other than dormant plants, plants in tissue culture, seeds, bulbs, tubers, corms, and rhizomes. The relevant Union quarantine pests specific to this item are: *Bemisia tabaci*, a known vector of Begomoviruses other than: *Abutilon mosaic virus*, *Sweet potato leaf curl virus*, *Tomato yellow leaf curl virus*, *Tomato yellow leaf curl Sardinia virus*, *Tomato yellow leaf curl Malaga virus*, *Tomato yellow leaf curl*, *Axarquía virus*, *Cowpea mild mottle virus*, *Lettuce infectious yellows virus*, *Melon yellowing- associated virus*, *Squash vein yellowing virus*, *Tomato mild mottle virus* which are considered as Union quarantine pests under the Commission Implementing Regulation (EU) 2019/2072.**

Additional Declarations:

“Consignment complies with Annex VII, point 7 (b), (a) of Commission Implementing Regulation (EU) 2019/2072. Where *Bemisia tabaci* Genn. (non-European populations or other vectors of the Union quarantine pests are

known to occur. This declares that no symptoms of the relevant Union quarantine pests have been observed on the plants during their complete cycle of vegetation, and the plants originate in areas known to be free from *Bemisia tabaci* Genn. and other vectors of the Union quarantine pests.”

Or

“Consignment complies with Annex VII, point 7 (b), (b) of Commission Implementing Regulation (EU) 2019/2072. Where *Bemisia tabaci* Genn. (non-European populations or other vectors of the Union quarantine pests are known to occur. This declares that no symptoms of the relevant Union quarantine pests have been observed on the plants during their complete cycle of vegetation, and the site of production has been found free from *Bemisia tabaci* Genn. and other vectors of the relevant Union quarantine pests on official inspections carried out at appropriate times to detect the pest.”

Or

“Consignment complies with Annex VII, point 7 (b) (c) of Commission Implementing Regulation (EU) 2019/2072. Where *Bemisia tabaci* Genn. (non-European populations or other vectors of the Union quarantine pests are known to occur. This declares that the plants have been subjected to an effective treatment ensuring the eradication of *Bemisia tabaci* Genn. and the other vectors of the Union quarantine pests and have been found free thereof prior to export.”

4. Plants with roots, planted or intended for planting, grown in the open air:

Additional Declaration:

“Consignment complies with Annex VII, item 3, option (a) and option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the place of production is known to be free from *Clavibacter sepedonicus* (Spieckermann and Kottho) Nouioui *et al.* and *Synchytrium endobioticum* (Schilb.) Percival,

AND

The plants originate from a field known to be free from *Globodera pallida* (Stone), and *Globodera rostochiensis* (Wollenweber) Behrens.”

5. Plants of the bonsai-type, intended for planting, other than seeds originating in non-European countries

Refer to Section 4.3.1 for bonsai entry conditions

6. Trees and shrubs, intended for planting, other than seeds and plants in tissue culture:

Additional Declaration:

“Consignment complies with Annex VII, point 10 of Commission Implementing Regulation (EU) 2019/2072. This declares the plants

- a) are clean (i.e. free from plant debris) and free from flowers and fruits,
- b) have been grown in nurseries, and
- c) have been inspected at appropriate times and prior to export and found free from symptoms of harmful bacteria, viruses and virus-like organisms, and either found free from signs or symptoms of harmful nematodes, insects, mites and fungi, or have been subjected to appropriate treatment to eliminate such organisms.”

Note: The definition of “nursery” – Premises wholly or partly used for the cultivation or keeping of plants for the purpose of transplantation or removal to other premises (Reference Plant Health (England) Order 2005).

7. Deciduous trees and shrubs, intended for planting, other than seeds and plants in tissue culture:

Additional Declaration:

“Consignment complies with Annex VII, point 11 of Commission Implementing Regulation (EU) 2019/2072. This declares the plants are dormant and free from leaves.”

8. Plants for planting of herbaceous species, other than bulbs, corms, plants of the family Poaceae, rhizomes, seeds, tubers and plants in tissue culture originating in third countries where *Liriomyza sativae* and *Amauromyza maculosa* are known to occur.

Note: *Liriomyza sativae* and *Amauromyza maculosa* not known to occur in New Zealand.

Definition of Herbaceous – plants without woody stems (Definition received from DEFRA 31.03.03)

Additional Declarations:

“Consignment complies with Annex VII, point 8 (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

originate in an area established by the national plant protection organisation in the country of origin as being free from *Liriomyza sativae* (Blanchard) and *Amauromyza maculosa* (Malloch) in accordance with relevant International Standards for Phytosanitary Measures which is mentioned on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031, under the rubric ‘Additional declaration’.”

Or

“Consignment complies with Annex VII, point 8 (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

originate in a place of production, established by the national plant protection organisation of the country of origin as being free from *Liriomyza sativae* (Blanchard) and *Amauromyza maculosa* (Malloch) in accordance with the relevant International Standards for Phytosanitary Measures, and which is mentioned on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031, under the rubric ‘Additional declaration’, and declared free from *Liriomyza sativae* (Blanchard) and *Amauromyza maculosa* (Malloch) on official inspections carried out at least monthly during the three months prior to export.”

Or

“Consignment complies with Annex VII, point 8 (c) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in nurseries.

And

immediately prior to export, the plants have been subjected to an appropriate treatment against *Liriomyza sativae* and *Amauromyza maculosa* and have been officially inspected and found free from *Liriomyza sativae* and *Amauromyza maculosa*.”

Note: Details of the treatment referred in point (c) shall be mentioned on the phytosanitary certificate referred to in Article 71 of Regulation (EU) No. 2016/2031.

9. Annual and biennial plants for planting, other than Poaceae (Gramineae) and seeds:

Additional Declaration:

“Consignment complies with Annex VII, point 5, of Commission Implementing Regulation (EU) 2019/2072. This declares the plants

- have been grown in nurseries;
- are free from plant debris, flowers and fruits,
- have been inspected at appropriate times and prior to export, and
- found free from symptoms of harmful bacteria, viruses and virus-like organisms, and
- either found free from signs or symptoms of harmful nematodes, insects, mites and fungi, or have been subjected to appropriate treatment to eliminate such organisms.”

10. Plants of conifers (Pinopsida), other than fruit and seeds:

Additional Declaration:

“Consignment complies with Annex VII, point 31, of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been produced in a place of production free from *Pissodes cibriani* O'Brien, *Pissodes fasciatus* Leconte, *Pissodes nemorensis* Germar, *Pissodes nitidus* Roelofs, *Pissodes punctatus* Langor & Zhang, *Pissodes strobi* (Peck), *Pissodes terminalis* Hopping, *Pissodes yunnanensis* Langor & Zhang and *Pissodes zitacuarensis* Sleeper.

11. Plants of conifers (Pinopsida), other than fruit and seeds, over 3 m in height:

Additional Declaration:

“Consignment complies with Annex VII, point 32, of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been produced in a place of production is free from *Scolytinae* spp. (non-European).”

12. **Plants of Palmae, intended for planting other than seeds, originating in non-European countries.**

Additional Declarations:

“Consignment complies with Annex VII, point 55, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in an area known to be free from Palm lethal yellowing phytoplasmas and Coconut cadang-cadang viroid, and no symptoms have been observed at the place of production or in its immediate vicinity since the beginning of the last complete cycle of vegetation.”

Or

“Consignment complies with Annex VII, point 55, item (b) of Commission Implementing Regulation (EU) 2019/2072. This declares that no symptoms of Palm lethal yellowing phytoplasmas and Coconut cadang-cadang viroid have been observed on the plants since the beginning of the last complete cycle of vegetation, and plants at the place of production which have shown symptoms giving rise to the suspicion of contamination by the pests have been rogued out at that place and the plants have undergone appropriate treatment to rid them of *Myndus crudus* Van Duzee

Or

In the case of plants in tissue culture:

“Consignment complies with Annex VII, point 55, item (c) of Commission Implementing Regulation (EU) 2019/2072. This declares in the case of plants in tissue culture, the plants were derived from plants which have met the requirements laid down in point (a) or (b).

Note: Palm lethal yellowing mycoplasma and Coconut cadang-cadang viroid are not known to occur in New Zealand.

13. **For plants of Palmae intended for planting having a diameter of the stem at the base of over 5cm and belonging to the following genera; *Brahea*, *Butia*, *Chamaerops*, *Jubaea*, *Livistona*, *Phoenix*, *Sabal*, *Syagrus*, *Trachycarpus*, *Trithrinax* and *Washingtonia* and entering Ireland, Malta and Northern Ireland:**

Additional Declarations:

“Consignment complies with Annex X, point 30, item (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in places of production in countries where *Paysandisia archon* is not known to occur.

Or

“Consignment complies with Annex X, point 30, item (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in an area free from *Paysandisia archon*, established by the National Plant Protection Organisation in accordance with relevant International Standards for Phytosanitary Measures.”

Or

“Consignment complies with Annex X, point 30, item (c) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have, during a period of at least two years prior to export, been grown in a place of production:

- (i) which is registered and supervised by the National Plant Protection Organisation in the country of origin, and
- (ii) where the plants were placed in a site with complete physical protection against the introduction of *Paysandisia archon*, and
- (iii) where, during three official inspections per year carried out at appropriate times, including immediately prior to movement from, this place of production, no signs of *Paysandisia archon* have been observed.”

14. **For herbaceous perennial plants intended for planting (other than seeds) of the families Caryophyllaceae (except *Dianthus* L.), Compositae (except *Chrysanthemum* L.), Cruciferae, Leguminosae and Roseaceae (except *Fragaria* L.)**

Additional Declaration:

“Consignment complies with Annex VII, point 9, (a), (b), (c), (d), (e) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants

- a) have been grown in nurseries,
- b) are free from plant debris, flowers and fruits,
- c) have been inspected at appropriate times prior to export, and
- d) found free from symptoms of harmful bacteria, viruses, and virus-like organisms, and
- e) either found free from signs or symptoms of harmful nematodes, insects, mites and fungi, or have been subjected to appropriate treatment to eliminate such organisms.”

15. **Note:** Additional Declaration 15 has been removed as it no longer applies. This is a placeholder for the numbering system within this ICPR only.

16. **Plants of *Begonia* L., intended for planting other than seeds, tubers and corms, and plants of *Ajuga* L., *Crossandra* Salisb., *Dipladenia* A.DC., *Hibiscus* L., *Mandevilla* Lindl. and *Nerium oleander* L., intended for planting other than seeds entering Ireland, Sweden and Northern Ireland.**

Additional Declarations:

“Consignment complies with Annex X, point 14, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants originate in an area known to be free from *Bemisia tabaci* Genn. (European populations).”Or

“Consignment complies with Annex X, point 14, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares that no signs of *Bemisia tabaci* Genn. (European populations) have been observed, including on plants, at the place of production on official inspections carried out at least once each three weeks during the nine weeks prior to marketing.”

Or

“Consignment complies with Annex X, point 14, option (c) of Commission Implementing Regulation (EU) 2019/2072. This declares that in cases where *Bemisia tabaci* Genn. (European populations) has been found at the place of production, the plants held or produced in this place of production have undergone an appropriate treatment to ensure freedom from *Bemisia tabaci* Genn. (European populations) and subsequently this place of production shall have been found free from *Bemisia tabaci* Genn. (European populations) as a consequence of the implementation of appropriate procedures aiming at eradicating *Bemisia tabaci* Genn. (European populations), in both official inspections carried out weekly during the three weeks prior to the movement from this place of production and in monitoring procedures throughout the said period. The last inspection of the above weekly inspections shall be carried out immediately prior to the above movement.”

Or

“Consignment complies with Annex X, point 14, option (d) of Commission Implementing Regulation (EU) 2019/2072. This declares that for those plants for which there shall be evidence by their packing or their flower development or by other means that they are intended for direct sale to final consumers not involved in professional plant production, the plants have been officially inspected and found free from *Bemisia tabaci* Genn. (European populations) immediately prior to their movement.”

17. Plants of *Chrysanthemum*, *Dianthus* L. and *Pelargonium*, other than seeds.

Additional Declarations:

“Consignment complies with Annex VII, point 25, option (a), Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in an area free from *Spodoptera eridania*, *Spodoptera frugiperda*, and *Spodoptera litura*, established by the National Plant Protection Organisation in accordance with the relevant ISPM.”

Or

“Consignment complies with Annex VII, point 25, option (b), Commission Implementing Regulation (EU) 2019/2072. This declares no signs of *Spodoptera eridiana*, *Spodoptera frugiperda* or *Spodoptera litura* have been observed at the place of production since the beginning of the last complete cycle of vegetation.”

or

“Consignment complies with Annex VII, point 25, option (c), Commission Implementing Regulation (EU) 2019/2072.. This declares the plants have undergone appropriate treatment to protect them from *Spodoptera eridiana*, *Spodoptera frugiperda* or *Spodoptera litura*.”

18. Note: Additional Declaration 18 has been removed as it no longer applies. This is a placeholder for the numbering system within this ICPR only.

19. **Plants for planting, of the family *Poaceae* of ornamental perennial grasses of the subfamilies Bambusoideae, Panicoideae and of the genera *Buchloe* Lag., *Bouteloua* Lag., *Calamagrostis* Adan., *Cortaderia* Stapf, *Glyceria* R. Br., *Hakonechloa* Mak. ex Honda, *Hystrix* L., *Molinia* Schnrak, *Phalaris* L., *Shibataea* Mak. Ex Nakai, *Spartina* Schreb., *Stipa* L. and *Uniola* L., other than seeds**

Additional declaration:

“Consignment complies with Annex VII, point 6 of Commission Implementing Regulation (EU) 2019/2072. This declares the plants:

- a) have been grown in nurseries.
- b) are free from plants debris, flowers and fruits;
- c) have been inspected and prior to export;
- d) are found to be free from symptoms of harmful bacteria, viruses and virus-like organisms; and
- e) are found to be free from signs or symptoms of harmful nematodes, insects, mites and fungi, or have been subjected to appropriate treatment to eliminate such organisms.

20. **Bulbs, corms, rhizomes and tubers, intended for planting, other than tubers of *Solanum tuberosum*.**

Additional declaration:

“Consignment complies with Annex VII, point 13 of Commission Implementing Regulation (EU) 2019/2072. This declares that the consignment or lot shall not contain more than 1% by net weight of soil and growing medium.”

21. **Plants for planting, other than bulbs, corms, rhizomes, seeds, tubers, and plants in tissue culture.**

Additional declaration:

“Consignment complies with Annex VII, point 2.1, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been grown in nurseries, which are registered and supervised by the national plant protection organisation of the country of origin”
AND

“Consignment complies with Annex VII, point 2.1, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been inspected at appropriate times and prior to export.”

22. **Plants of herbaceous species, intended for planting, other than bulbs, corms, plants of the family Gramineae, rhizomes, seeds and tubers entering Ireland, and the United Kingdom (Northern Ireland).**

Additional Declaration

“Consignment complies with Annex X, point 3.1, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants originate in an area known to be free from *Liriomyza bryoniae*

(Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess),”

OR

“Consignment complies with Annex X, point 3.1, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares no signs of *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess) have been observed at the place of production, on official inspections carried out at least monthly during the three months prior to the movement from this place of production,”

OR

“Consignment complies with Annex X, point 3.1, option (c) of Commission Implementing Regulations (EU) 2019/2072. This declares immediately prior to the marketing, the plants have been officially inspected and found free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess) and have been subjected to an appropriate treatment against *Liriomyza bryoniae* (Kaltenbach) *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess),”

OR

“Consignment complies with Annex X, point 3.1, option (d) of Commission Implementing Regulations (EU) 2019/2072. This declares the plants originate from plant material which is free from *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess); are grown in vitro in a sterile medium under sterile conditions that preclude the possibility of infestation with *Liriomyza bryoniae* (Kaltenbach), *Liriomyza huidobrensis* (Blanchard) and *Liriomyza trifolii* (Burgess); and are shipped in transparent containers under sterile conditions.”

23. Plants for planting with roots, other than plants in tissue culture

Note: *Meloidogyne enterolobii* is not known to occur in New Zealand.

Additional declaration:

“Consignment complies with Annex VII, point 4.1, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in a country established by the national plant protection organisation in the country of origin as being free from *Meloidogyne enterolobii* Yang & Eisenback in accordance with the relevant International Standards for Phytosanitary Measures”

OR

“Consignment complies with Annex VII, point 4.1, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in an area established by the national plant protection organisation in the country of origin as being free from *Meloidogyne enterolobii* Yang & Eisenback in accordance with the relevant International Standards for Phytosanitary Measures. The name of the area shall be mentioned on the phytosanitary certificate”

OR

“Consignment complies with Annex VII, point 4.1, option (c), item (i) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in a growing medium which at the time of planting of the plants was free from soil and organic matter and had not been previously used for growing plants or for any other agricultural purposes; and was stored and maintained under appropriate conditions to keep it free from *Meloidogyne enterolobii* Yang & Eisenback and since planting appropriate

measures have been taken to ensure that the plants have been kept free from *Meloidogyne enterolobii* Yang & Eisenback, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination,
and
- hygiene measures,”

OR

“Consignment complies with Annex VII, point 4.1, option (c), item (ii) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in a growing medium which at the time of planting of the plants was composed entirely of peat or fibre of *Cocos nucifera* L. and had not been previously used for growing plants or for any other agricultural purposes; and was stored and maintained under appropriate conditions to keep it free from *Meloidogyne enterolobii* Yang & Eisenback and since planting appropriate measures have been taken to ensure that the plants have been kept free from *Meloidogyne enterolobii* Yang & Eisenback, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination,
and
- hygiene measures,”

OR

“Consignment complies with Annex VII, point 4.1, option (c), item (iii) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in a growing medium which at the time of planting of the plants was subjected to effective fumigation or heat treatment to ensure freedom from *Meloidogyne enterolobii* Yang & Eisenback; and was stored and maintained under appropriate conditions to keep it free from *Meloidogyne enterolobii* Yang & Eisenback and since planting appropriate measures have been taken to ensure that the plants have been kept free from *Meloidogyne enterolobii* Yang & Eisenback, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination,
and
- hygiene measures,”

OR

“Consignment complies with Annex VII, point 4.1, option (c), item (iv) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown throughout their life in a growing medium which at the time of planting of the plants was subjected to effective systems approach to ensure freedom from *Meloidogyne enterolobii* Yang & Eisenback; and was stored and maintained under appropriate conditions to keep it free from *Meloidogyne enterolobii* Yang & Eisenback and since planting appropriate measures have been taken to ensure that the plants have been kept free from *Meloidogyne enterolobii* Yang & Eisenback, including at least:

- physical isolation of the growing medium from soil and other possible sources of contamination,
and
- hygiene measures,”

OR

“Consignment complies with Annex VII, point 4.1, option (d), item (i) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in a place of production, established by the national plant protection organisation in the country of origin as being free from *Meloidogyne enterolobii* Yang & Eisenback in accordance with the relevant International Standards for Phytosanitary Measures”

AND

“Consignment complies with Annex VII, point 4.1, option (d), item (ii) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants immediately prior to export the roots of a representative sample of the consignment have been inspected and are found free from symptoms of *Meloidogyne enterolobii* Yang & Eisenback.”

24. **Plants for planting of *Acacia* Mill., *Acer palmatum* Thunb., *Aesculus californica* (Spach) Nutt., *Albizia falcate* Backer ex Merr., *Albizia julibrissin* Durazz., *Alectryon excelsus* Gärtn., *Camellia semiserrata* C.W.Chi, *Camellia sinensis* (L.) Kuntze, *Eucalyptus ficifolia* F.Müll., *Ficus* L., *Gleditsia triacanthos* L., *Howea forsteriana* (F.Müller) Becc., *Ilex cornuta* Lindl. & Paxton, *Magnolia grandiflora* L., *Magnolia virginiana* L., *Persea americana* Mill., *Platanus orientalis* L., *Populus fremontii* S.Watson, *Populus nigra* L., *Populus trichocarpa* Torr. & A.Gray ex Hook., *Pterocarya stenoptera* C.DC., *Salix alba* L., *Salix babylonica* L., *Salix gooddingii* C.R.Ball, *Salix laevigata* Bebb, *Salix mucronata* Thnb., *Wisteria floribunda* (Willd.) DC., other than plants in tissue culture, pollen and seeds**

Note: *Euwallacea fornicatus sensu lato* is not known to occur in New Zealand.

“Consignment complies with Annex VII, point 32.1, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants have a diameter of less than 2 cm at the base of the stem”

OR

“Consignment complies with Annex VII, point 32.1, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in a country recognised as being free from *Euwallacea fornicatus sensu lato* in accordance with the relevant International Standards for Phytosanitary Measures”

OR

“Consignment complies with Annex VII, point 32.1, option (c) of Commission Implementing Regulation (EU) 2019/2072. This declares the plants originate in an area established by the national plant protection organisation in the country of origin as being free from *Euwallacea fornicatus sensu lato*, in accordance with the relevant International Standards for Phytosanitary Measures. The name of the area shall be mentioned on the phytosanitary certificate”

OR

“Consignment complies with Annex VII, point 32.1, option (d), item (i) Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in a site of production with physical isolation against the introduction of *Euwallacea fornicatus sensu lato* at least during six months prior to export, which is subjected to official inspections at appropriate times and has been found free from the pest, confirmed at least with traps which are checked at least every four weeks, including immediately prior to export”

OR

“Consignment complies with Annex VII, point 32.1, option (d), item (ii) Commission Implementing Regulation (EU) 2019/2072. This declares the plants have been grown in a site of production which has been found free from *Euwallacea fornicatus sensu lato* since the beginning of the last complete cycle of vegetation, confirmed at least with traps, during official inspections carried out at least every four weeks; in case of suspicion of the presence of the pest at the site of production, appropriate treatments against the pest have been carried out to ensure the absence of the pest; a surrounding zone of 1 km is established, which is monitored at appropriate times for *Euwallacea fornicatus sensu lato* and where the pest is found, those plants should be immediately rogued out and destroyed; and immediately prior to export, consignments of the plants have been subjected to an official inspection for the presence of the pest, in particular in stems and branches of the plants, including destructive sampling. The size of the sample for inspection shall be such as to enable at least the detection of 1 % level of infestation with a level of confidence of 99 %.”

25. Plants for planting grown in fresh water or in soil that is permanently saturated with fresh water, other than seeds

“Consignment complies with Annex VII, point 4.3, option (a) of commission Implementing Regulation (EU) 2019/2072.

This declares the plants originate in a country recognised as being free from *Pomacea* (Perry), in accordance with the relevant International Standards for Phytosanitary Measures”

OR

“Consignment complies with Annex VII, point 4.3, option (b) of commission Implementing Regulation (EU) 2019/2072.

This declares the plants originate in an area established by the national plant protection organisation in the country of origin as being free from *Pomacea* (Perry), in accordance with the relevant International Standards for Phytosanitary Measures, which is mentioned on the phytosanitary certificate under the rubric ‘place of origin”

OR

“Consignment complies with Annex VII, point 4.3, option (c) of commission Implementing Regulation (EU) 2019/2072.

This declares the plants have been inspected immediately prior to export and have been found free from *Pomacea* (Perry).”

4.4 Seeds, Grains and Nuts

4.4.1 Seeds, Grains and Nuts for Sowing

Allium ascalonicum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Allium cepa

Allium porrum

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

And

Additional Declaration:

Combined Part F, Annex IV and Part E of Annex V. RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled. Refer to Requirements column.

Nematodes			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Ditylenchus dipsaci</i> (Kuehn) Filipjev [DITYDI]	<i>Allium cepa</i> L., <i>Allium porrum</i> L	0%	(a) the crop has been visually inspected at least once at an appropriate time to detect the pest since the beginning of the last complete cycle of vegetation and no symptoms of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev have been observed; or (b) the harvested seeds have been found to be free of <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev after laboratory tests on a representative sample; or (c) the planting material has been subjected to an appropriate chemical or physical treatment against <i>Ditylenchus dipsaci</i> (Kuehn) Filipjev and the seeds have been found to be free of this pest after laboratory tests on a representative sample.

Allium schoenoprasum
Conditions:

Chives

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Beta vulgaris (applies to seeds and fodder beet seed) Beet

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores) and Northern Ireland:

Additional Declaration:

“Consignment complies with Annex X, point 33, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to Directive 2002/54/EC, the seed of the categories ‘basic seed’ and ‘certified seed’ satisfies the conditions laid down in Annex I.B.3 to Directive 2002/54/EC”

Or

“Consignment complies with Annex X, point 33, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to Directive 2002/54/EC, in the case of ‘seed not finally certified’, the seed satisfies the conditions laid down in Article 15(2) of Directive 2002/54/EC, and is intended for processing that will satisfy the conditions laid down in part B of Annex I to that Directive and delivered to a processing enterprise with officially approved controlled waste disposal, to prevent the spread of BNYVV”

Or

“Consignment complies with Annex X, point 33, option (c) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to Directive 2002/54/EC, the seed has been produced from a crop grown in an area where BNYVV is known not to occur”.

For further information on Directive 2002/54/EC, please see the following link:

<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32002L0054&from=EN>

Beta vulgaris (applies to vegetable seed) Beet

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

For consignments entering France (Brittany), Finland, Ireland, Portugal (Azores) and Northern Ireland:

Additional Declaration

“Consignment complies with Annex X, point 34, option (a) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to Directive 2002/55/EC, the processed seed contains no more than 0.5 % by weight of inert matter (in the case of pelleted seed this standard shall be met prior to pelleting)”;

Or

“Consignment complies with Annex X, point 34, option (b) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to Directive 2002/55/EC, in the case of non-processed seed, the seed is officially packed in such a manner as to ensure that there is no risk of spread of BNYVV, and is intended for processing that will satisfy the conditions laid down in point a) and delivered to a processing enterprise with officially approved controlled waste disposal, to prevent the spread of BNYVV”;

Or

“Consignment complies with Annex X, point 34, option (c) of Commission Implementing Regulations (EU) 2019/2072. This declares that without prejudice to

Directive 2002/55/EC, where applicable, official statement that the seed has been produced from a crop grown in an area where BNYVV is known not to occur.”

For further information on Directive 2002/55/EC, please see the following link:

<https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=CELEX:32002L0055&from=EN>

Capsicum spp.

Capsicum/Chilli peppers

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

For additional declarations and regulated non-quarantine pests relevant to this commodity, please refer to Section 2.5.3 Union Regulated Non-Quarantine Pests (RNQPs), Part E, Annex V. Measures to prevent the presence of RNQPs on vegetable seed of this document.

And

For seeds of varieties which are known to be resistant to Tomato brown rugose fruit virus (ToBRFV) only:

“Consignment complies with Article 10, point 2 of the Commission Implementing Decision (EU) 2023/1032. This declares that [*Insert Capsicum spp. variety that is known to be resistant*] is resistant to Tomato brown rugose fruit virus (ToBRFV)”

Note: Contact PlantExports@mpi.govt.nz if you intend to use this option.

Note: Tomato brown rugose fruit virus (ToBRFV) is not known to occur in New Zealand.

Or

For seeds harvested from 31 August 2023 of varieties that are NOT resistant to Tomato brown rugose fruit virus (ToBRFV):

“Consignment complies with Article 10, point 1, item (a), (i) of the Commission Implementing Decision (EU) 2023/1032. This declares that the mother plants of the specified seeds concerned have been produced in a production site [*insert name of production site*] where Tomato brown rugose fruit virus is known not to occur, on the basis of official inspections carried out at the appropriate time to detect Tomato brown rugose fruit virus.”

And

For seeds originating from more than 30 mother plants:

Note: For sampling schemes and testing methods for the following Additional Declaration please refer to Appendix 3 in this document.

“Consignment complies with Article 10, point 1, item (a), (ii) of the Commission Implementing Decision (EU) 2023/1032. This declares that the specified seed lot originating from more than 30 mother plants, prior to processing, has undergone official sampling and testing for Tomato brown rugose fruit virus as set out in the Annex and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

Or

For seeds originating from less than or equal to 30 mother plants:

Note: For sampling schemes and testing methods for the following Additional Declaration: Refer to Appendix 3.

“Consignment complies with Article 10, point 1, item (a), (iii) of the Commission Implementing Decision (EU) 2023/1032. This declares that the specified seed lot originating from less than or equal to 30 mother plants, sampling and testing, as set out in the Annex have been carried out on the specified seeds, and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

Or

“Consignment complies with Article 10, point 1, item (a), (iii) of the Commission Implementing Decision (EU) 2023/1032. This declares that sampling and testing, as set out in the Annex, have been carried out on each individual mother plant of those specified seeds, and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

And

Note: The consignment must include information ensuring traceability of the production site of the mother plants:

“Consignment complies with Article 10, point 1, item (b) of the Commission Implementing Decision (EU) 2023/1032. This declares information ensuring the traceability of the mother plants to their site of production [*insert name of production site*] has been ensured.”

For seeds harvested prior to 31 August 2023:

Note: By way of derogation from Tomato brown rugose fruit virus conditions pertaining to point 1, item (a), specified seeds that have been harvested prior to 31 August 2023 and before their introduction within the Union have been found to comply with the requirements of Implementing Regulation (EU) 2020/1191, may be introduced into the Union territory accompanied by a phytosanitary certificate indicating under the heading ‘Additional Declaration’, the following statement: “These seeds have been harvested before 31 August 2023 and have been found to comply with Regulation (EU) 2020/1191.”

And

Note: The consignment must include information ensuring traceability of the production site of the mother plants:

“Consignment complies with Article 10, point 1, item (b) of the Commission Implementing Decision (EU) 2023/1032. This declares information ensuring the traceability of the mother plants to their site of production [*insert name of production site*] has been ensured.”

And

Combined Part D, Annex IV and Part C, Annex V. RNQPs concerning propagating material of ornamental plants and other plants for planting intended for ornamental purposes and measures to prevent the presence of RNQPs on propagating material of ornamental plants and other plants for planting intended for ornamental purposes

The following measures shall be taken concerning the respective RNQPs and:

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled. Refer to the Requirements column.

Bacteria			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the propagating material of ornamental plants concerned and other	Requirements (Ref.: Consignment complies with Annex V, Part C of Commission Implementing Regulation (EU) 2019/2072)

		plants for planting intended for ornamental purposes	
<i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> [XANTEU]	<i>Capsicum annuum</i> L.	0%	<p>(a) the seeds originate in areas known to be free from <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i>; or</p> <p>(b) no symptoms of disease caused by <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> have been observed in visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production; or</p> <p>(c) the seeds have been subjected to official testing for <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i> on a representative sample and using appropriate methods, whether or not following an appropriate treatment, and have been found in these tests to be free from <i>Xanthomonas euvesicatoria</i> Jones <i>et al.</i></p>
<i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i> [XANTGA]	<i>Capsicum annuum</i> L.	0%	<p>(a) the seeds originate in areas known to be free from <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i>; or</p> <p>(b) no symptoms of disease caused by <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i> have been observed in visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production; or</p> <p>(c) the seeds have been subjected to official testing for <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i> on a representative sample and using appropriate methods (whether or not following an appropriate treatment), and have been found in these tests to be free from <i>Xanthomonas gardneri</i> (ex Šutič) Jones <i>et al.</i></p>

<i>Xanthomonas perforans</i> Jones et al. [XANTPF]	<i>Capsicum annuum</i> L.	0%	<p>(a) the seeds originate in areas known to be free from <i>Xanthomonas perforans</i> Jones et al.; or</p> <p>(b) no symptoms of disease caused by <i>Xanthomonas perforans</i> Jones et al. have been observed in visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production; or</p> <p>(c) the seeds have been subjected to official testing for <i>Xanthomonas perforans</i> Jones et al. on a representative sample and using appropriate methods (whether or not following an appropriate treatment), and have been found in these tests to be free from <i>Xanthomonas perforans</i> Jones et al.</p>
<i>Xanthomonas vesicatoria</i> (ex Doidge) Vauterin et al. or
(b) the set tolerance on seed is not exceeded on the basis of a laboratory test of a representative sample.

(8) Measures on seeds of *Linum usitatissimum* L. to prevent the presence of *Fusarium* (anamorphic genus), other than *Fusarium oxysporum* f. sp. *albedinis* (Kill. & Maire) W.L. Gordon and *Fusarium circinatum* Nirenberg & O'Donnell.

(a) seed treatment authorised for use against *Fusarium* (anamorphic genus), other than *Fusarium oxysporum* f. sp. *albedinis* (Kill. & Maire) W.L. Gordon and *Fusarium circinatum* Nirenberg & O'Donnell, has been applied;
or
(b) the set tolerance on seed is not exceeded based on laboratory test of a representative sample.

Medicago sativa

Lucerne (Alfalfa)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information. For further requirements regarding regulated non-quarantine pests relevant to this commodity, see the information below.

Part A, Annex IV: RNQPs concerning fodder plant seed

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for pre-basic seed	Thresholds for basic seed	Thresholds certified seed
<i>Clavibacter michiganensis</i> ssp. <i>insidiosus</i> (McCulloch 1925) Davis et al. [CORBIN]	<i>Medicago sativa</i> L.	0%	0%	0%

<i>Ditylenchus dipsaci</i> (Kuehn) Filipjev [DITYDI]	<i>Medicago sativa</i> L.	0%	0%	0%
--	------------------------------	----	----	----

Part A, Annex V. Measures to prevent the presence of RNQPs on fodder plant seed.

1. Inspection of the crop

(1) The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out field inspections on the crop from which the fodder plant seed is produced concerning the presence of RNQPs in the crop to ensure that the presence of the RNQPs does not exceed the thresholds set out in Part A table:

The competent authority may authorise inspectors, other than the professional operators, to carry out the field inspections on its behalf and under its official supervision.

(2) Those field inspections shall be carried out when the condition and the stage of development of the crop allow for an adequate inspection. There shall be at least one field inspection per year, at the most appropriate time for the detection of the respective RNQPs.

(3) The competent authority shall determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods.

The proportion of the crops for the production of seed to be officially inspected by the competent authority shall be at least 5 %.

2. Sampling and testing of fodder plant seed

- (1) The competent authority shall:
- (a) officially draw seed samples from lots of fodder plant seed;
 - (b) authorise seed samplers to carry out sampling on its behalf and under its official supervision;
 - (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samplers under official supervision as referred to in point (b);
 - (d) supervise the performance of the seed samplers provided for in point (2).

(2) The competent authority or the professional operator under official supervision shall sample and test the fodder plant seed in accordance with up to date international methods.

Except for automatic sampling, the competent authority shall check-sample a proportion of at least 5 % of the seed lots entered for official certification. That proportion shall be as evenly spread as possible over natural and legal persons entering seed for certification, and the species entered, but may also be aimed at eliminating specific doubts.

(3) For automatic sampling, appropriate procedures shall be applied, and it shall be officially supervised.

For the examination of seed for certification, samples shall be drawn from homogeneous lots. As regards the lot and sample weights, the table of Annex III to Directive 66/401/EEC shall apply.

3. Additional measures for certain plant species

The competent authorities, or the professional operators under the official supervision of the competent authorities, shall carry out the following additional inspections or take any other actions for certain plant species to ensure that the requirements, concerning the respective RNQPs and plants for planting, are fulfilled.

(1) the pre-basic, basic and certified seeds of *Medicago sativa* L. to prevent the presence of *Clavibacter michiganensis* ssp. *insidiosus*, and in order to ascertain that:

- (a) the seeds originate in areas known to be free from *Clavibacter michiganensis* ssp. *insidiosus*; or
- (b) the crop has been grown on land on which no previous *Medicago sativa* L. crop has been present during the last three years prior to sowing, and no symptoms of *Clavibacter michiganensis* ssp. *insidiosus* are observed during field inspection at the site of production or no symptoms of *Clavibacter michiganensis* ssp. *insidiosus* have been observed on any *Medicago sativa* L. crop adjacent to it, during the previous cropping; or
- (c) the crop belongs to a variety recognised as being highly resistant to *Clavibacter michiganensis* ssp. *insidiosus* and the content of inert matter shall not exceed 0,1 % by weight;

(2) the pre-basic, basic and certified seed of *Medicago sativa* L. to prevent the presence of

Ditylenchus dipsaci, and in order to ascertain that:

- (a) no symptoms of *Ditylenchus dipsaci* have been observed at the site of production during the previous cropping and no main host crops have been grown during the two preceding years on the site of production and appropriate hygiene measures have been taken to prevent infestation of the place of production;
- (b) no symptoms of *Ditylenchus dipsaci* have been observed at the site of production during the previous cropping and no *Ditylenchus dipsaci* has been found by laboratory tests on a representative sample; or
- (c) the seeds have been subjected to an appropriate physical or chemical treatment against *Ditylenchus dipsaci* and have been found to be free of this pest after laboratory tests on a representative sample.

Oryza sativa

Rice

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Article 10, point 5 of the Commission Implementing Regulation (EU) 2022/1372. This declares that the seeds are free from soil and debris”

For further requirements regarding regulated non-quarantine pests relevant to this commodity, please refer to the information below.

Part B, Annex IV: RNQPs concerning cereal seed

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for pre-basic seed	Thresholds for basic seed	Thresholds for certified seed
<i>Aphelenchoides besseyi</i> Christie [APLOBE]	<i>Oryza sativa</i> L.	0%	0%	0%
Fungi				
<i>Gibberella fujikuroi</i> Sawada [GIBBFU]	<i>Oryza sativa</i> L.	Practically free	Practically free	Practically free

Part B, Annex V. Measures concerning cereal seed

1. Inspection of the crop

(1) The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out field inspections on the crop from which the cereal seed is produced, to confirm that the presence of the RNQPs does not exceed the thresholds set out in this table:

RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Thresholds for pre-basic seed	Thresholds for basic seed	Thresholds for certified seed
<i>Aphelenchoides besseyi</i> Christie [APLOBE]	<i>Oryza sativa</i> L.	0%	0%	0%
Fungi				
<i>Gibberella fujikuroi</i> Sawada [GIBBFU]	<i>Oryza sativa</i> L.	Not more than 2 symptomatic plants per 200 m ² seen during field inspections at appropriate times of a representative sample of the plants in each crop.	Not more than 2 symptomatic plants per 200 m ² seen during field inspections at appropriate times of a representative sample of the plants in each crop.	Certified seed of the first generation (C1): Not more than 4 symptomatic plants per 200 m ² seen during field inspections at appropriate times of a representative sample of the plants in each crop. Certified seed of the second generation (C2): Not more than 8 symptomatic

				plants per 200 m ² seen during field inspections at appropriate times of a representative sample of the plants in each crop.
--	--	--	--	---

The competent authority may authorise inspectors, other than professional operators, to carry out the field inspections on its behalf and under its official supervision.

(2) Those field inspections shall be carried out when the condition and the stage of development of the crop allow for an adequate inspection. There shall be at least one field inspection per year, at the most appropriate time for the detection of the respective RNQPs.

(3) The competent authority shall determine the size, the number and the distribution of the portions of the field to be inspected in accordance with appropriate methods. The proportion of the crops for the production of seed to be officially inspected by the competent authority shall be at least 5 %

2. Sampling and testing of cereal seed

(1) The competent authority shall:

- (a) officially draw seed samples from lots of cereal seed;
- (b) authorise seed samplers to carry out sampling on its behalf and under official supervision;
- (c) compare the seed samples drawn by itself with those of the same seed lot drawn by the seed samples under official supervision as referred to in point (b);
- (d) supervise the performance of the seed samplers as provided for in point (2).

1. Additional measures for seeds of *Oryza sativa* L.

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out the following additional inspections or take any other actions to ensure that the requirements concerning the respective RNQPs for the seed of *Oryza sativa* L. are fulfilled:

Seeds of *Oryza sativa* L. shall fulfil one of the following requirements:

- (a) originates in area known to be free from *Aphelenchoides besseyi*;
- (b) has been officially tested by the competent authorities by appropriate nematological tests on a representative sample from each lot, and have been found free from *Aphelenchoides besseyi*;
- (c) has been subjected to an appropriate hot water treatment or other appropriate treatment against *Aphelenchoides besseyi*.

Phaseolus spp.

Bean

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

Combined Part F, Annex IV and Part E of Annex V. RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled. Refer to Requirements column.

Bacteria			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Xanthomonas axonopodis</i> pv. <i>phaseoli</i> (Smith) Vauterin et al. [XANTPH]	<i>Phaseolus vulgaris</i> L.	0%	(a) the seeds originate in areas known to be free from <i>Xanthomonas axonopodis</i> pv. <i>phaseoli</i> (Smith) Vauterin et al.; or (b) the crop from which the seed was harvested was visually inspected at appropriate times during the growing season and found free from <i>Xanthomonas axonopodis</i> pv. <i>phaseoli</i> (Smith) Vauterin et al.; or (c) a representative sample of the seeds has been tested and found free from <i>Xanthomonas axonopodis</i> pv. <i>phaseoli</i> (Smith) Vauterin et al. in those tests.
<i>Xanthomonas fuscans</i> subsp. <i>fuscans</i> Schaad et al. [XANTFF]	<i>Phaseolus vulgaris</i> L.	0%	(a) the seeds originate in areas known to be free from <i>Xanthomonas fuscans</i> subsp. <i>fuscans</i> Schaad et al.; or (b) the crop from which the seed was harvested

			<p>was visually inspected at appropriate times during the growing season and found free from <i>Xanthomonas fuscans</i> subsp. <i>fuscans</i> Schaad <i>et al.</i>; or</p> <p>(c) a representative sample of the seeds has been tested and found free from <i>Xanthomonas fuscans</i> subsp. <i>fuscans</i> Schaad <i>et al.</i> in those tests.</p>
Insects and mites			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Acanthoscelides obtectus</i> (Say) [ACANOB]	<i>Phaseolus coccineus</i> L., <i>Phaseolus vulgaris</i> L.	0%	<p>(a) a representative sample of the seed has been subject to visual inspection at the most appropriate time to detect the pest, which may follow an appropriate treatment, and</p> <p>(b) the seed has been found free from <i>Acanthoscelides obtectus</i> (Say).</p>

Pinus spp.
Conditions:
PROHIBITED

Pine

Pisum sativum
Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Additional Declaration:

Combined Part F, Annex IV and Part E of Annex V. RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled. Refer to Requirements column.

Insects and mites			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Bruchus pisorum</i> (Linnaeus) [BRCHPI]	<i>Pisum sativum</i> L.,	0%	(a) a representative sample of the seed has been subject to visual inspection at the most appropriate time to detect the pest, which may follow an appropriate treatment, and (b) the seed has been found free from <i>Bruchus pisorum</i> (Linnaeus). Note: No specific Additional Declaration (AD) required for <i>Bruchus pisorum</i> , subject to New Zealand's maintenance of country freedom.

Note: No specific Additional Declaration (AD) required for *Bruchus pisorum*, subject to New Zealand's maintenance of country freedom.

Poaceae (Gramineae)

Grasses

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Prunus spp.

Stone fruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 47, item (a), (i) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been officially certified under a certification scheme requiring them to be derived in direct line from material which has been maintained under appropriate conditions and subjected to official testing at least for American plum line pattern virus, Cherry rasp leaf virus, Peach mosaic virus, Peach rosette mosaic virus, using appropriate indicators for the presence of those pests or equivalent methods and has been found free, in these tests, from those pests.”

Or

“Consignment complies with Annex VII, point 47, item (a), (ii) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants have been derived in direct line from material which is maintained under appropriate conditions and has been subjected, within the last three complete cycles of vegetation, at least once, to official testing at least for American plum line pattern virus, Cherry rasp leaf

virus, Peach mosaic virus, Peach rosette mosaic virus, using appropriate indicators for the presence of those pests or equivalent methods and has been found free, in these tests, from those Union quarantine pests.”

And

“Consignment complies with Annex VII, point 47, item (b) of Commission Implementing Regulation (EU) 2019/2072. This declares no symptoms of diseases caused by American plum line pattern virus, Cherry rasp leaf virus, Peach mosaic virus, Peach rosette mosaic virus have been observed on plants at the place of production or on susceptible plants in its immediate vicinity, since the beginning of the last three complete cycles of vegetation.

And

Part J, Annex IV. RNQPs concerning fruit propagating material and fruit plants intended for fruit production

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled. Refer to Requirements column.

Bacteria		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Agrobacterium tumefaciens</i> (Smith & Townsend) Conn [AGRBTU]	<i>Prunus armeniaca</i> L., <i>Prunus avium</i> L., <i>Prunus cerasus</i> L., <i>Prunus domestica</i> L., <i>Prunus dulcis</i> (Mill.) D. A. Webb, <i>Prunus persica</i> (L.) Batsch, <i>Prunus salicina</i> Lindley,	0%

Pseudotsuga menziesii

Douglas Fir

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declarations required.

Additional Declaration:

“Consignment complies with Article 9, option (a) of the Commission Implementing Decision (EU) 2019/2032. This declares that the plants have been grown throughout their life in a country where *Fusarium circinatum* is known not to occur”

Note: *Fusarium circinatum* is not known to occur in New Zealand.

Rubus spp.

Berry fruit

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declarations required.

Additional declaration:

“Consignment complies with Annex VII, point 48, item a), (a) of Commission Implementing Regulation (EU) 2019/2072. This declares that the plants are free from aphids, including their eggs.”

AND

“Consignment complies with Annex VII, point 48, item a), (b), (i) first indent of Commission Implementing Regulation (EU) 2019/2072. The plants have been officially certified under a certification scheme requiring them to be derived in direct line from material which has been maintained under appropriate conditions and subjected to official testing at least for Tomato ringspot virus (ToRSV) and Black raspberry latent virus (BRLV), using appropriate indicators for the presence of those pests or equivalent methods and has been found free, in these tests, from those Union quarantine pests”

OR

“Consignment complies with Annex VII, point 48, item a), (b), (i) second indent of Commission Implementing Regulation (EU) 2019/2072” The plants are derived in direct line from material which is maintained under appropriate conditions and has been subjected, within the last three complete cycles of vegetation, at least once, to official testing at least for Tomato ringspot virus (ToRSV) and Black raspberry latent virus (BRLV), using appropriate indicators for the presence of Tomato ringspot virus (ToRSV) and Black raspberry latent virus, or for equivalent methods and has been found free, in these tests, from those Union quarantine pests”

AND

“Consignment complies with Annex VII, point 48, item a), (b), (ii) of Commission Implementing Regulation (EU) 2019/2072. No symptoms of diseases caused by Tomato ringspot virus (ToRSV) and Black raspberry latent virus (BRLV), have been observed on plants at the place of production, or on susceptible plants in its immediate vicinity, since the beginning of the last complete cycles of vegetation.”

And

Part J, Annex IV. RNQPs concerning fruit propagating material and fruit plants intended for fruit production

Bacteria		
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the fruit propagating material and fruit plants concerned
<i>Agrobacterium spp. Conn</i> [1AGRBG]	<i>Rubus</i> L.	0%
<i>Rhodococcus fascians</i> Tilford [CORBFA]	<i>Rubus</i> L.	0%

<i>Cucumber mosaic virus</i> [CMV000]	<i>Rubus L.</i>	0%
<i>Raspberry bushy dwarf virus</i> [RBDV00]	<i>Rubus L.</i>	0%
<i>Raspberry leaf mottle virus</i> [RLMV00]	<i>Rubus L.</i>	0%
<i>Raspberry ringspot virus</i> [RPRSV0]	<i>Rubus L.</i>	0%
<i>Raspberry vein chlorosis virus</i> [RVCV00]	<i>Rubus L.</i>	0%
<i>Raspberry yellow spot</i> [RYS000]	<i>Rubus L.</i>	0%
<i>Rubus yellow net virus</i> [RYNV00]	<i>Rubus L.</i>	0%
<i>Strawberry latent ringspot virus</i> [SLRSV0]	<i>Rubus L.</i>	0%
<i>Tomato black ring virus</i> [TBRV00]	Plants for planting other than seeds <i>Rubus L.</i>	0%

No corresponding measure specified for this the above table on Annex V.

Solanum lycopersicum (including hybrids)

Tomato

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required.

Additional Declaration:

For further additional declaration(s) regarding regulated non-quarantine pests relevant to this commodity, please refer to Section 2.5.3 Union Regulated Non-Quarantine Pests (RNQPs), Combined Part F, Annex IV and Part E of Annex V. RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed.

And

For seeds of varieties which are known to be resistant to Tomato brown rugose fruit virus (ToBRFV) only:

“Consignment complies with Article 10, point 2 of the Commission Implementing Decision (EU) 2023/1032. This declares that [*Insert Capsicum spp. variety that is known to be resistant*] is resistant to Tomato brown rugose fruit virus (ToBRFV)”

Note: Contact PlantExports@mpi.govt.nz if you intend to use this option.

Note: Tomato brown rugose fruit virus (ToBRFV) is not known to occur in New Zealand.

Or

For seeds harvested from 31 August 2023 of varieties that are NOT resistant to Tomato brown rugose fruit virus (ToBRFV):

“Consignment complies with Article 10, point 1, item (a), (i) of the Commission Implementing Decision (EU) 2023/1032. This declares that the mother plants of the specified seeds concerned have been produced in a production site [*insert name of production site*] where Tomato brown rugose fruit virus is known not to occur, on the basis of official inspections carried out at the appropriate time to detect Tomato brown rugose fruit virus.”

And

For seeds originating from more than 30 mother plants:

Note: For sampling schemes and testing methods for the following Additional Declaration please refer to Appendix 3 in this document.

“Consignment complies with Article 10, point 1, item (a), (ii) of the Commission Implementing Decision (EU) 2023/1032. This declares that the specified seed lot originating from more than 30 mother plants, prior to processing, has undergone official sampling and testing for Tomato brown rugose fruit virus as set out in the Annex and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

Or

For seeds originating from less than or equal to 30 mother plants:

Note: For sampling schemes and testing methods for the following Additional Declaration: Refer to Appendix 3.

“Consignment complies with Article 10, point 1, item (a), (iii) of the Commission Implementing Decision (EU) 2023/1032. This declares that the specified seed lot originating from less than or equal to 30 mother plants, sampling and testing, as set out in the Annex have been carried out on the specified seeds, and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

Or

“Consignment complies with Article 10, point 1, item (a), (iii) of the Commission Implementing Decision (EU) 2023/1032. This declares that sampling and testing, as set out in the Annex, have been carried out on each individual mother plant of those specified seeds, and have been found, according to those tests, to be free from Tomato brown rugose fruit virus.”

And

Note: The consignment must include information ensuring traceability of the production site of the mother plants:

“Consignment complies with Article 10, point 1, item (b) of the Commission Implementing Decision (EU) 2023/1032. This declares information ensuring the traceability of the mother plants to their site of production [*insert name of production site*] has been ensured.”

For seeds harvested prior to 31 August 2023:

Note: By way of derogation from Tomato brown rugose fruit virus conditions pertaining to point 1, item (a), specified seeds that have been harvested prior to 31 August 2023 and before their introduction within the Union have been found to comply with the requirements of Implementing Regulation (EU) 2020/1191, may be introduced into the Union territory accompanied by a phytosanitary certificate indicating under the heading ‘Additional Declaration’, the following statement: “These seeds have been harvested before 31 August 2023 and have been found to comply with Regulation (EU) 2020/1191.”

And

Note: The consignment must include information ensuring traceability of the production site of the mother plants:

“Consignment complies with Article 10, point 1, item (b) of the Commission Implementing Decision (EU) 2023/1032. This declares information ensuring the traceability of the mother plants to their site of production [*insert name of production site*] has been ensured.”

And

Combined Part F, Annex IV and Part E of Annex V, RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed

The following measures shall be taken concerning the respective RNQPs and:

The competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the following table, are fulfilled. Refer to the Requirements column.

Bacteria			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Clavibacter michiganensis</i> ssp. <i>michiganensis</i> (Smith) Davis et al. [CORBMI]	<i>Solanum lycopersicum</i> L.	0%	(a) the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method; and (b) (i) the seeds originate in areas known to be free from <i>Clavibacter michiganensis</i> ssp. <i>michiganensis</i> (Smith) Davis et al.; or (ii) no symptoms of disease caused by <i>Clavibacter michiganensis</i> ssp. <i>michiganensis</i> (Smith) Davis et al. have been observed in visual inspections at appropriate times to detect the pest during their complete cycle of vegetation of the plants at the site of production; or (iii) the seeds have been subjected to official testing for <i>Clavibacter michiganensis</i> ssp. <i>michiganensis</i> (Smith) Davis et al. on a representative sample and using appropriate methods, and have been found, in those tests, to be free from the pest.

<i>Xanthomonas euvesicatoria</i> Jones et al. [XANTEU]	<i>Solanum lycopersicum</i> L.	0%	<p>(a) the seeds are obtained by an appropriate acid extraction; and</p> <p>(b) the seeds originate in areas known to be free from <i>Xanthomonas euvesicatoria</i> Jones et al.; or</p> <p>(c) (i) no symptoms of disease caused by <i>Xanthomonas euvesicatoria</i> Jones et al. have been observed in visual inspections at appropriate times to detect the pest during the complete cycle of vegetation of the plants at the site of production; or</p> <p>(ii) the seeds have been subjected to official testing for <i>Xanthomonas euvesicatoria</i> Jones et al. on a representative sample and using appropriate methods, whether or not following an appropriate treatment, and have been found, in those tests, free from <i>Xanthomonas euvesicatoria</i> Jones et al.</p>
<i>Xanthomonas gardneri</i> (ex Šutič 1957) Jones et al [XANTGA]	<i>Solanum lycopersicum</i> L.	0%	<p>(a) the seeds are obtained by an appropriate acid extraction; and</p> <p>(b) the seeds originate in areas known to be free from <i>Xanthomonas gardneri</i> (ex Šutič) Jones et al.; or</p> <p>(c) (i) no symptoms of disease caused by <i>Xanthomonas gardneri</i> (ex Šutič) Jones et al. have been observed in visual inspections at appropriate times during the complete cycle of vegetation of the plants at the site of production; or</p> <p>(ii) the seeds have been subjected to official testing for <i>Xanthomonas gardneri</i> (ex Šutič) Jones et al. on a representative sample and</p>

Viruses, viroids, virus-like diseases and phytoplasmas			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
Pepino mosaic virus [PEPMV0]	<i>Solanum lycopersicum</i> L.	0%	<p>(a) the seeds have been obtained by means of an appropriate acid extraction method or an equivalent method, and:</p> <p>(b) (i) the seeds originate in areas where Pepino mosaic virus is known not to occur; or</p> <p>(ii) no symptoms of diseases caused by Pepino mosaic virus have been observed on the plants at the place of production during their complete cycle of vegetation; or</p> <p>(iii) the seeds have been subjected to official testing for Pepino mosaic virus, on a representative sample and using appropriate methods, and have been found, in those tests, free from the pest.</p>
Potato spindle tuber viroid [PSTVD0]	<i>Solanum lycopersicum</i> L.	0%	<p>(a) (i) the seeds originate in areas where Potato spindle tuber viroid is not known to occur; or</p> <p>(ii) no symptoms of diseases caused Potato</p>

			<p>spindle tuber viroid have been observed on the plants at the place of production during their complete cycle of vegetation; or</p> <p>(iii) the seeds have been subjected to official testing for Potato spindle tuber viroid, on a representative sample and using appropriate methods, and have been found, in those tests, free from the pest.</p>
Tomato brown rugose fruit virus [ToBRFV]	<i>Solanum lycopersicum</i> L.	0%	<p>(a) the seeds originate in a country established as being free from ToBRFV by the national plant protection organisation of that country, in accordance with the International Standards for Phytosanitary Measures; or</p> <p>(b)(i) the seeds have been subjected to official testing or testing by professional operators under official supervision of the competent authority for ToBRFV, on a representative sample and using appropriate molecular methods, and have been found, in those tests, free from that pest; or</p> <p>(ii) in the case of a seed lot originating from 30 or less than 30 mother plants, the seeds, or the mother plant of those seeds, have been subjected to official testing, or testing by the professional operator under official supervision of the competent authority, for the presence of ToBRFV on a representative sample and using appropriate molecular methods, and have been found, in those tests, free from that pest.</p>

Trifolium spp.
Conditions:

Clover

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Triticum spp.

Wheat

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Vicia faba

Broad bean

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate required.

Additional Declaration:

Combined Part F, Annex IV and Part E of Annex V. RNQPs and its measures to prevent the presence of the RNQP concerning vegetable seed

The following measures shall be taken concerning the respective RNQPs and plants for planting: the competent authority, or the professional operator under the official supervision of the competent authority, shall carry out checks and take any other actions to ensure that the requirements, concerning the respective RNQPs and plants for planting, provided for in the third column of the following table, are fulfilled. Refer to Requirements column.

Insects and mites			
RNQPs or symptoms caused by RNQPs	Plants for planting (genus or species)	Threshold for the vegetable seed concerned	Requirements (Ref.: Consignment complies with Annex V, Part E of Commission Implementing Regulation (EU) 2019/2072)
<i>Bruchus rufimanus</i> Boheman.	<i>Vicia faba</i> L	0%	(a) a representative sample of the seed has been subject to visual inspection at the most appropriate time to detect the pest, which may follow an appropriate treatment, and (b) the seed has been found free from <i>Bruchus rufimanus</i> Boheman.

Zea mays

Maize

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and additional declaration required. The consignment will be subjected to a plant health inspection on arrival. Refer to Section 2.8 Inspection on Arrival for further information.

Additional Declaration:

“Consignment complies with Annex VII, point 73, option (a) of Commission Implementing Regulation (EU) 2019/2072. This declares the seeds originate in a country recognised as being free from *Pantoea stewartii* subsp. *stewartii* (Smith) Mergaert, Verdonck & Kersters, in accordance with the relevant International Standards for Phytosanitary Measures,”

Or

“Consignment complies with Annex VII, point 73, option (b) of Commission Implementing Regulation (EU) 2019/2072. This declares the seeds originate in an area established by the national plant protection organisation in the country of origin as being free from *Pantoea stewartii* subsp. *stewartii* (Smith) Mergaert, Verdonck & Kersters in accordance with the relevant International Standards for Phytosanitary Measures, which is mentioned on the phytosanitary certificate,

Or

“Consignment complies with Annex VII, point 73, option (c) of Commission Implementing Regulation (EU) 2019/2072. This declares a representative sample of the seeds has been tested and found free from *Pantoea stewartii* subsp. *stewartii* (Smith) Mergaert, Verdonck & Kersters in this test. The size of the sample for inspection shall be such as to enable at least the detection of 0,5 % level of infestation with a level of confidence of 99 %. However, in the case of seed lots smaller than 8000 seeds, a representative sample of 10 % of the lot has been tested and found free from *Pantoea stewartii* subsp. *stewartii* (Smith) Mergaert, Verdonck & Kersters in this test.’

Note: *Erwinia stewartii* (*Pantoea stewartii* subsp. *Stewartii*) is not known to occur in New Zealand.

4.5 Growing Media and Packing Material

Refer section 3.5 for commodity class requirements.

4.6 Miscellaneous

Terrarium bedding

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate not required.

Tree fern fibres (*Dicksonia* spp.)

Conditions:

Phytosanitary import permit not required. Phytosanitary certificate and treatment required.

Treatment:

Heat treatment to at least 56°C for 40 continuous minutes.

Note: Applies to The Netherlands only.

Appendix 2: Plant species requiring an additional declaration for *Xylella fastidiosa*

The following plants for planting, other than seed, are required to have the following additional declaration, in addition to other requirements listed in this ICPR.

“Consignment complies with Article 28 of Commission Implementing Regulation (EU) 2020/1201 and *Xylella fastidiosa* is not present in New Zealand”

Note: The following list is as per Annex I of Commission Implementing Regulation (EU) 2020/1201 - ‘List of plants, known to be susceptible to one or more subspecies of the specified pest (‘host plants’).’ Annual site inspections for *Xylella fastidiosa* are required for the species listed below.

<i>Acacia</i> spp.	<i>Erodium moschatum</i>	<i>Perovskia abrotanoides</i>
<i>Acer</i> spp.	<i>Erysimum</i> spp. (incl hybrids)	<i>Persea americana</i>
<i>Adenocarpus lainzii</i>	<i>Euphorbia chamaesyce</i>	<i>Phagnalon saxatile</i>

<i>Clematis cirrhosa</i>	<i>Lavatera cretica</i>	<i>Sapindus saponaria</i>
<i>Clematis vitalba</i>	<i>Ligustrum lucidum</i>	<i>Sassafras</i> spp.
<i>Clinopodium nepeta</i>	<i>Liquidambar styraciflua</i>	<i>Scabiosa atropurpurea</i> var. <i>maritima</i>
<i>Coelorachis cylindrica</i>	<i>Lonicera implexa</i>	<i>Senecio inaequidens</i>
<i>Coffea</i> spp.	<i>Lonicera japonica</i>	<i>Setaria magna</i>
<i>Conium maculatum</i>	<i>Lonicera periclymenum</i>	<i>Solidago fistulosa</i>
<i>Convolvulus cneorum</i>	<i>Lupinus aridorum</i>	<i>Solidago virgaurea</i>
<i>Coprosma repens</i>	<i>Lupinus villosus</i>	<i>Sorghum halepense</i>
<i>Cornus sanguinea</i>	<i>Magnolia grandiflora</i>	<i>Spartium</i> spp.
<i>Coronilla</i> spp.	<i>Magnolia grandiflora</i>	<i>Stewartia pseudocamellia</i>
<i>Cortaderia selloana</i>	<i>Magnolia x soulangeana</i>	<i>Strelitzia reginae</i>
<i>Cyperus eragrostis</i>	<i>Mallotus paniculatus</i>	<i>Streptocarpus</i> spp.
<i>Cytisus</i> spp.	<i>Medicago arborea</i>	<i>Symphotrichum divaricatum</i>
<i>Digitaria</i> spp.	<i>Medicago sativa</i>	<i>Syringa vulgaris</i>
<i>Dimorphotheca ecklonis</i>	<i>Mentha suaveolens</i>	<i>Teucrium capitatum</i>
<i>Dimorphotheca fruticosa</i>	<i>Metrosideros</i> spp.	<i>Thymus vulgaris</i>
<i>Diospyros kaki</i>	<i>Mimosa</i> spp.	<i>Trifolium repens</i>
<i>Diplocyclos palmatus</i>	<i>Modiola caroliniana</i>	<i>Ulex</i> spp.
<i>Dittrichia viscosa</i>	<i>Morus</i> spp.	<i>Ulmus</i> spp.
<i>Dodonaea viscosa</i>	<i>Myoporum insulare</i>	<i>Vaccinium</i> spp.
<i>Echium plantagineum</i>	<i>Myoporum laetum</i>	<i>Viburnum tinus</i>
<i>Elaeagnus angustifolia</i>	<i>Myrtus communis</i>	<i>Vinca</i> spp.
<i>Elaeagnus submacrophylla</i> x	<i>Nandina domestica</i>	<i>Vitex agnus-castus</i>
<i>Encelia farinosa</i>	<i>Neptunia lutea</i>	<i>Vitis</i> spp.
<i>Eremophila maculata</i>	<i>Nerium oleander</i>	<i>Westringia fruticosa</i>
<i>Erica cinerea</i>	<i>Olea</i> spp.	<i>Westringia glabra</i>
<i>Erigeron</i> spp.	<i>Parthenocissus quinquefolia</i>	<i>Xanthium strumarium</i>
<i>Eriocephalus africanus</i>	<i>Paspalum dilatatum</i>	

Appendix 3: ANNEX for *Capsicum* spp. and *Lycopersicon esculentum* (syn. *Solanum lycopersicum*) seeds and plants for planting.

1. Sampling schemes of specified seeds, other than those of varieties which are known to be resistant to Tomato brown rugose fruit virus (ToBRFV)

Sampling of seeds for testing shall be carried out under the following sampling schemes depending on the seed lots as referred to in the relevant tables of the International Standards for Phytosanitary Measures No 31 Methodologies for sampling of consignments (ISPM31):

- a) for a seed lot originating from less than or equal to 30 mother plants:
 - application of a hypergeometric sampling scheme able to identify with 95 % reliability a level of presence of infected plants of 10 % or above; or
 - testing of each mother plant of the seed lot;
- b) for a seed lot less than or equal to 3 000 seeds:

application of a hypergeometric sampling scheme able to identify with 95 % reliability a level of presence of infected plants of 10 % or above;

- c) for a seed lot of more than 3 000 but less than or equal to 30 000 seeds:
application of a sampling scheme able to identify with 95 % reliability a level of presence of infected plants of 1 % or above;
- d) for a seed lot of more than 30 000 seeds:
application of a sampling scheme able to identify with 95 % reliability a level of presence of infected plants of 0,1 % or above.

Sub samples shall consist of 1 000 seeds maximum for Polymerase Chain Reaction (PCR) methods.

2. Sampling schemes of specified plants, other than those varieties which are known to be resistant to Tomato brown rugose fruit virus

- a) In the case of those specified plants, at least one sample of up to 200 young leaves from the top of the plant, or sepals from fruits, shall be collected per site of production and per cultivar when applicable.
- b) In the case of symptomatic plants, sampling for testing shall be performed on at least 3 symptomatic leaves.
- c) In case of testing of mother plants, young leaves from the top of plant, or sepals from fruits, shall be collected as appropriate.

3. Testing methods for detecting and identifying Tomato brown rugose fruit virus (ToBRFV) on seeds, other than those of varieties which are known to be resistant to ToBRFV

One of the following testing methods shall be used for the detection of Tomato brown rugose fruit virus on the specified seeds:

- real-time RT-PCR using the primers and probes described in the ISF protocol (2020)(1);
- real-time RT-PCR using primers and probe of Menzel and Winter (2021)(2);
- real-time RT-PCR using primers and probe from Bernabé-Orts et al. (2021)(3).

In case of a positive result of the detection test, a second testing method, different from the one used for detection, shall be carried out with one of the real-time RT-PCR methods listed above, using the same sample to confirm the identification. In the case of inconsistency between detection and identification results

4. Testing methods for detecting and identifying Tomato brown rugose fruit virus (ToBRFV) on the specified plants, other than those of varieties which are known to be resistant to ToBRFV, and on the specified fruits

One of the following testing methods shall be carried out for the detection of the specified pest on the specified plants, other than those varieties which are known to be resistant to Tomato brown rugose fruit virus, and on the specified fruits:

- ELISA, only for symptomatic material;
- conventional RT-PCR using the primers of Alkowni et al. (2019)(4);

- conventional RT-PCR using the primers of Rodriguez-Mendoza et al. (2019)(5);
- real-time RT-PCR using the primers and probes described in the ISF protocol (2020)(6);
- real-time RT-PCR using primers and probe of Menzel and Winter (2021)(7);
- real-time RT-PCR using primers and probe from Bernabé-Orts et al. (2021)(8).

In case of a positive result of the detection test, a second testing method, different from the one used for detection, shall be carried out with one of the RT-PCR methods listed above, using the same sample to confirm the identification.

Appendix 4: Quarantine Pest List

(combined Part A & Part B, Annex II of Commission Implementing Regulation (EU) 2019/2072)

Pest Type and Species Name	Notes
Bacteria	
<i>Candidatus Liberibacter africanus</i>	
<i>Candidatus Liberibacter americanus</i>	
<i>Candidatus Liberibacter asiaticus</i>	
<i>Clavibacter sepedonicus</i>	
<i>Curtobacterium flaccumfaciens</i> pv. <i>flaccumfaciens</i>	
<i>Pantoea stewartii</i> subsp. <i>stewartii</i>	
<i>Ralstonia pseudosolanacearum</i>	
<i>Ralstonia solanacearum</i>	
<i>Ralstonia syzygii</i> subsp. <i>celebesensis</i>	
<i>Ralstonia syzygii</i> subsp. <i>indonesiensis</i>	
<i>Xanthomonas citri</i> pv. <i>aurantifolii</i>	
<i>Xanthomonas citri</i> pv. <i>citri</i>	
<i>Xanthomonas oryzae</i> pv. <i>oryzae</i>	
<i>Xanthomonas oryzae</i> pv. <i>oryzicola</i>	
<i>Xylella fastidiosa</i>	
Fungi and oomycetes	
<i>Anisogramma anomala</i>	
<i>Apiosporina morbosa</i>	
<i>Atropellis</i> spp.	
<i>Botryosphaeria kuwatsukai</i>	
<i>Bretziella fagacearum</i>	
<i>Ceratocystis platani</i>	
<i>Chrysomyxa arctostaphyli</i>	
<i>Coniferiporia sulphurascens</i>	
<i>Coniferiporia weirii</i>	
<i>Cronartium</i> spp. (except <i>Cronartium gentianeum</i> ,	

<i>Cronartium pini</i> , <i>Cronartium ribicola</i>)	
<i>Davidsoniella virescens</i>	
<i>Elsinoë australis</i>	
<i>Elsinoë citricola</i>	
<i>Elsinoë fawcettii</i>	
<i>Fusarium circinatum</i>	
<i>Fusarium oxysporum</i> f. sp. <i>albedinis</i>	
<i>Geosmithia morbida</i>	
<i>Gymnosporangium</i> spp. (except <i>Gymnosporangium amelanchieris</i> , <i>Gymnosporangium atlanticum</i> , <i>Gymnosporangium clavariiforme</i> , <i>Gymnosporangium confusum</i> , <i>Gymnosporangium cornutum</i> , <i>Gymnosporangium fusisporum</i> , <i>Gymnosporangium gaeumannii</i> , <i>Gymnosporangium gracile</i> , <i>Gymnosporangium minus</i> , <i>Gymnosporangium orientale</i> , <i>Gymnosporangium sabinae</i> , <i>Gymnosporangium torminali-juniperini</i> , <i>Gymnosporangium tremelloides</i>)	
<i>Melampsora farlowii</i>	
<i>Mycodiella laricis-leptolepidis</i>	
<i>Neocosmospora ambrosia</i>	
<i>Neocosmospora euwallaceae</i>	
<i>Neofusicoccum laricinum</i>	
<i>Phyllosticta citricarpa</i>	
<i>Phyllosticta solitaria</i>	
<i>Phymatotrichopsis omnivora</i>	
<i>Phytophthora ramorum</i> (non-EU isolates)	
<i>Pseudocercospora angolensis</i>	
<i>Pseudocercospora pini-densiflorae</i>	
<i>Puccinia pittieriana</i>	
<i>Septoria malagutii</i>	
<i>Sphaerulina musiva</i>	
<i>Stagonosporopsis andigena</i>	
<i>Stegophora ulmea</i>	
<i>Synchytrium endobioticum</i>	
<i>Thecaphora solani</i>	
<i>Tilletia indica</i>	
<i>Venturia nashicola</i>	

Insects and mites	
<i>Acleris gloverana</i>	
<i>Acleris issikii</i>	
<i>Acleris minuta</i>	
<i>Acleris nishidai</i>	
<i>Acleris nivisellana</i>	
<i>Acleris robinsoniana</i>	
<i>Acleris semipurpurana</i>	
<i>Acleris senescens</i>	
<i>Acleris variana</i>	
<i>Acrobasis pyrivorella</i>	
<i>Agrilus anxius</i>	
<i>Agrilus planipennis</i>	
<i>Aleurocanthus citriperdus</i>	
<i>Aleurocanthus spiniferus</i>	
<i>Aleurocanthus woglumi</i>	
Andean potato weevil complex: <i>Phyrdenus muriceus</i> <i>Premnotrypes</i> spp. <i>Rhigopsidius tucumanus</i>	
<i>Anoplophora chinensis</i>	
<i>Anoplophora glabripennis</i>	
<i>Anthonomus bisignifer</i>	
<i>Anthonomus eugenii</i>	
<i>Anthonomus grandis</i>	
<i>Anthonomus quadrigibbus</i>	
<i>Anthonomus signatus</i>	
<i>Apriona cinerea</i>	
<i>Apriona germari</i>	
<i>Apriona rugicollis</i>	
<i>Aromia bungii</i>	
<i>Arrhenodes minutus</i>	
<i>Aschistonyx eppoi</i> (non-European populations)	Known to be vector of viruses
<i>Bactericera cockerelli</i>	
<i>Bemisia tabaci</i>	
<i>Carposina sasakii</i>	
<i>Ceratothripoides claratris</i>	
<i>Choristoneura carnana</i>	
<i>Choristoneura conflictana</i>	
<i>Choristoneura fumiferana</i>	
<i>Choristoneura lambertiana</i>	
<i>Choristoneura occidentalis biennis</i>	
<i>Choristoneura occidentalis occidentalis</i>	
<i>Choristoneura orae</i>	

<i>Choristoneura parallela</i>	
<i>Choristoneura pinus</i>	
<i>Choristoneura retiniana</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Choristoneura rosaceana</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Acrogonia citrina</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Acrogonia virescens</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Aphrophora angulata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Aphrophora permutata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Bothrogonia ferruginea</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Bucephalogonia xanthopis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Clasteroptera achatina</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Clasteroptera brunnea</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Cuerna costalis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Cuerna occidentalis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Cyphonia clavigera</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Dechacona missionum</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Dilobopterus costalimai</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Draeculacephala</i> sp.	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Ferrariana trivittata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Fingeriana dubia</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Friscanus friscanus</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Graphocephala atropunctata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Graphocephala confluens</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Graphocephala versuta</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Helochara delta</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Homalodisca ignorata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Homalodisca insolita</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>

<i>Homalodisca vitripennis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Lepyronia quadrangularis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Macugonalia cavifrons</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Macugonalia leucomelas</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Molomea consolidata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Neokolla hyeroglyphica</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Neokolla severini</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Oncometopia facialis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Oncometopia nigricans</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Oncometopia orbona</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Oragua discoidula</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Pagaronia confusa</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Pagaronia furcata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Pagaronia tredecimpunctata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Pagaronia triunata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Parathona gratiosa</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Plesiommata corniculata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Plesiommata mollicella</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Poophilus costalis</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Sibovia sagata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Sonesimia grossa</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Tapajosa rubromarginata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Xyphon flaviceps</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Xyphon fulgida</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Xyphon triguttata</i>	Cicadomorpha, known to be vectors of <i>Xylella fastidiosa</i>
<i>Conotrachelus nenuphar</i>	
<i>Dendrolimus sibiricus</i>	
<i>Diabrotica barberi</i>	

<i>Diabrotica undecimpunctata howardi</i>	
<i>Diabrotica undecimpunctata undecimpunctata</i>	
<i>Diabrotica virgifera zeae</i>	
<i>Diaphorina citri</i>	
<i>Eotetranychus lewisi</i>	
<i>Euwallacea fornicatus sensu lato</i>	
<i>Exomala orientalis</i>	
<i>Grapholita inopinata</i>	
<i>Grapholita packardi</i>	
<i>Grapholita prunivora</i>	
<i>Helicoverpa zea</i>	
<i>Hishimonus phycitis</i>	
<i>Keiferia lycopersicella</i>

<i>Porphyrophora tritici</i>	
<i>Massicus raddei</i>	
<i>Monochamus</i> spp. (non-European populations)	
<i>Myndus crudus</i>	
<i>Naupactus leucoloma</i>	
<i>Nemorimyza maculosa</i>	
<i>Neoleucinodes elegantalis</i>	
<i>Oeona hirta</i>	
<i>Oligonychus perditus</i>	
<i>Phyllocoptes fructiphilus</i>	
<i>Pityophthorus juglandis</i>	
<i>Pissodes cibriani</i>	
<i>Pissodes fasciatus</i>	
<i>Pissodes nemorensis</i>	
<i>Pissodes nitidus</i>	
<i>Pissodes punctatus</i>	
<i>Pissodes strobi</i>	

<i>Pissodes terminalis</i>	
<i>Pissodes yunnanensis</i>	
<i>Pissodes zitacuarensis</i>	
<i>Polygraphus proximus</i>	
<i>Popillia japonica</i>	
<i>Prodiplosis longifila</i>	
<i>Pseudopityophthorus minutissimus</i>	
<i>Pseudopityophthorus pruinus</i>	
<i>Rhynchophorus palmarum</i>	
<i>Saperda candida</i>	
<i>Scirtothrips aurantii</i>	
<i>Scirtothrips citri</i>	
<i>Scirtothrips dorsalis</i>	
<i>Scolytinae</i> spp. (non-European)	
<i>Spodoptera eridania</i>	Noctuidae
<i>Spodoptera frugiperda</i>	Noctuidae
<i>Spodoptera litura</i>	Noctuidae
<i>Tecia solanivora</i>	Tephritidae
<i>Acidiella kagoshimensis</i>	Tephritidae
<i>Acidoxantha bombacis</i>	Tephritidae
<i>Acroceratitis distincta</i>	Tephritidae
<i>Adrama</i> spp.	Tephritidae
<i>Anastrepha</i> spp.	Tephritidae
<i>Anastrepha ludens</i>	Tephritidae
<i>Asimoneura pantomelas</i>	Tephritidae
<i>Austrotephritis protrusa</i>	Tephritidae
<i>Bactrocera</i> spp. (except <i>Bactrocera oleae</i>)	Tephritidae
<i>Bactrocera dorsalis</i>	Tephritidae
<i>Bactrocera latifrons</i>	Tephritidae
<i>Bactrocera zonata</i>	Tephritidae
<i>Bistrispinaria fortis</i>	Tephritidae
<i>Bistrispinaria magniceps</i>	Tephritidae
<i>Callistomyia flavilabris</i>	Tephritidae
<i>Campiglossa albiceps</i>	Tephritidae
<i>Campiglossa californica</i>	Tephritidae
<i>Campiglossa duplex</i>	Tephritidae
<i>Campiglossa reticulata</i>	Tephritidae
<i>Campiglossa snowi</i>	Tephritidae
<i>Carpomya incompleta</i>	Tephritidae
<i>Carpomya pardalina</i>	Tephritidae
<i>Ceratitis</i> spp. (except <i>Ceratitis capitata</i>)	Tephritidae
<i>Craspedoxantha marginalis</i>	Tephritidae
<i>Dacus</i> spp.	Tephritidae

<i>Dioxya chilensis</i>	Tephritidae
<i>Dirioxa pornia</i>	Tephritidae
<i>Euleia separata</i>	Tephritidae
<i>Euphranta camelliae</i>	Tephritidae
<i>Euphranta canadensis</i>	Tephritidae
<i>Euphranta cassia</i>	Tephritidae
<i>Euphranta japonica</i>	Tephritidae
<i>Euphranta oshimensis</i>	Tephritidae
<i>Eurosta solidaginis</i>	Tephritidae
<i>Eutreta</i> spp.	Tephritidae
<i>Gastrozona nigrifemur</i>	Tephritidae
<i>Goedenia stenoparia</i>	Tephritidae
<i>Gymnocarena</i> spp.	Tephritidae
<i>Insizwa oblita</i>	Tephritidae
<i>Marriottella exquisita</i>	Tephritidae
<i>Monacrostichus citricola</i>	Tephritidae
<i>Neaspilota alba</i>	Tephritidae
<i>Neaspilota reticulata</i>	Tephritidae
<i>Neoceratitis asiatica</i>	Tephritidae
<i>Neoceratitis cyanescens</i>	Tephritidae
<i>Neotephritis finalis</i>	Tephritidae
<i>Paracantha trinotata</i>	Tephritidae
<i>Parastenopa limata</i>	Tephritidae
<i>Paratephritis fukaii</i>	Tephritidae
<i>Paratephritis takeuchii</i>	Tephritidae
<i>Paraterellia varipennis</i>	Tephritidae
<i>Philophylla fossata</i>	Tephritidae
<i>Procecidochares</i> spp.	Tephritidae
<i>Ptilona confinis</i>	Tephritidae
<i>Ptilona persimilis</i>	Tephritidae
<i>Rhagoletis</i> spp. (except <i>Rhagoletis alternata</i> , <i>Rhagoletis batava</i> , <i>Rhagoletis berberidis</i> , <i>Rhagoletis cerasi</i> , <i>Rhagoletis cingulata</i> , <i>Rhagoletis completa</i> , <i>Rhagoletis meigenii</i> , <i>Rhagoletis suavis</i> , <i>Rhagoletis zernyi</i>)	Tephritidae
<i>Rhagoletis pomonella</i>	Tephritidae
<i>Rioxoptilona dunlopi</i>	Tephritidae
<i>Sphaeniscus binoculatus</i>	Tephritidae
<i>Sphenella nigricornis</i>	Tephritidae
<i>Strauzia</i> spp. (except <i>Strauzia longipennis</i>)	Tephritidae
<i>Taomyia marshalli</i>	Tephritidae
<i>Tephritis leavittensis</i>	Tephritidae
<i>Tephritis luteipes</i>	Tephritidae

<i>Tephritis ovatipennis</i>	Tephritidae
<i>Tephritis pura</i>	Tephritidae
<i>Toxotrypana curvicauda</i>	Tephritidae
<i>Toxotrypana recurcauda</i>	Tephritidae
<i>Trupanea bisetosa</i>	Tephritidae
<i>Trupanea femoralis</i>	Tephritidae
<i>Trupanea wheeleri</i>	Tephritidae
<i>Trypanocentra nigrithorax</i>	Tephritidae
<i>Trypeta flaveola</i>	Tephritidae
<i>Urophora christophi</i>	Tephritidae
<i>Toxoptera citricida</i>	
<i>Trioza erytrae</i>	
<i>Xanthaciura insecta</i>	
<i>Zacerata asparagi</i>	
<i>Zeugodacus</i> spp.	
<i>Zonosemata electa</i>	
<i>Thaumatotibia leucotreta</i>	
<i>Thrips palmi</i>	
<i>Trirachys sartus</i>	
<i>Unaspis citri</i>	
Molluscs	
Pomacea	
Nematodes	
<i>Hirschmanniella</i> spp. (except <i>Hirschmanniella behningi</i> , <i>Hirschmanniella gracilis</i> , <i>Hirschmanniella halophila</i> , <i>Hirschmanniella loofi</i> , <i>Hirschmanniella zostericola</i>)	
<i>Longidorus diadecturus</i>	
<i>Meloidogyne enterolobii</i>	
<i>Nacobbus aberrans</i>	
<i>Xiphinema americanum</i> sensu stricto	
<i>Xiphinema bricolense</i>	
<i>Xiphinema californicum</i>	
<i>Xiphinema inaequale</i>	
<i>Xiphinema intermedium</i>	
<i>Xiphinema rivesi</i> (non-EU populations)	
<i>Xiphinema tarjanense</i>	
<i>Bursaphelenchus xylophilus</i>	
<i>Globodera pallida</i>	
<i>Globodera rostochiensis</i>	
<i>Meloidogyne chitwoodi</i>	
<i>Meloidogyne fallax</i>	
Parasitic plants	

Arceuthobium spp. (except <i>Arceuthobium azoricum</i> , <i>Arceuthobium gambyi</i> , <i>Arceuthobium oxycedri</i>)	
Viruses, viroids and phytoplasmas	
Beet curly top virus	
Begomoviruses (except Abutilon mosaic virus, Papaya leaf crumple virus, Sweet potato leaf curl virus, Tomato leaf curl New Delhi Virus, Tomato yellow leaf curl virus, Tomato yellow leaf curl Sardinia virus, Tomato yellow leaf curl Malaga virus, Tomato yellow leaf curl Axarquía virus)	
Black raspberry latent virus	
<i>Candidatus</i> Phytoplasma aurantifolia-reference strain	
Chrysanthemum stem necrosis virus	
Citrus leprosis virus C	Citrus leprosis viruses
Citrus leprosis virus C2	Citrus leprosis viruses
Hibiscus green spot virus 2	Citrus leprosis viruses
Citrus strain of Orchid fleck virus	Citrus leprosis viruses
Citrus leprosis virus N <i>sensu novo</i>	Citrus leprosis viruses
Citrus chlorotic spot virus	Citrus leprosis viruses
Citrus tristeza virus (non-EU isolates)	
Coconut cadang-cadang viroid	
Cowpea mild mottle virus	
Lettuce infectious yellows virus	
Melon yellowing-associated virus	
<i>Candidatus</i> Phytoplasma coccostanzania – subgroup 16SrIV- C	Palm lethal yellowing phytoplasmas
<i>Candidatus</i> Phytoplasma palmae – subgroups 16SrIV-A, 16SrIV-B, 16SrIV-D, 16SrIV-E, 16SrIV-F	Palm lethal yellowing phytoplasmas
<i>Candidatus</i> Phytoplasma palmicola – 16SrXXII-A	Palm lethal yellowing phytoplasmas
<i>Candidatus</i> Phytoplasma palmicola-related strain 16SrXXII- B	Palm lethal yellowing phytoplasmas
New <i>Candidatus</i> Phytoplasma causing palm lethal yellowing from 16SrIV group – ‘Bogia coconut syndrome’	Palm lethal yellowing phytoplasmas
Rose rosette virus	
Satsuma dwarf virus	

Squash vein yellowing virus	
Tobacco ringspot virus	
Tomato chocolate virus	
Tomato marchitez virus	
Tomato mild mottle virus	
Tomato ringspot virus	
American plum line pattern virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Apple fruit crinkle viroid	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Apple necrotic mosaic virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Buckland valley grapevine yellows phytoplasma	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Blueberry leaf mottle virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma aurantifolia-related strains (Pear decline Taiwan II, Crotalaria witches' broom phytoplasma, Sweet potato little leaf phytoplasma)	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma australiense Davis et al. (reference strain)	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma fraxini (reference strain) Griffiths et al.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma hispanicum (reference strain) Davis et al.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma phoenicium	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma pruni-related strain (North American grapevine yellows, NAGYIII) Davis et al.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma pyri-related strain (Peach yellow leaf roll) Norton et al.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
<i>Candidatus</i> Phytoplasma ziziphi (reference strain) Jung et al.	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>

Cherry rasp leaf virus (CRLV)	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Cherry rosette virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Cherry rusty mottle associated virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Cherry twisted leaf associated virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Grapevine berry inner necrosis virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Grapevine flavescence dorée phytoplasma	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Grapevine red blotch virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Grapevine vein-clearing virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Peach mosaic virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Peach rosette mosaic virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Raspberry latent virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Raspberry leaf curl virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Strawberry chlorotic fleck-associated virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Strawberry leaf curl virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Strawberry necrotic shock virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Temperate fruit decay-associated virus	Viruses, viroids and phytoplasmas of <i>Cydonia</i> , <i>Fragaria</i> , <i>Malus</i> , <i>Prunus</i> , <i>Pyrus</i> , <i>Ribes</i> , <i>Rubus</i> and <i>Vitis</i>
Andean potato latent virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Andean potato mild mosaic virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.

Andean potato mottle virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
<i>Candidatus</i> Phytoplasma americanum	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
<i>Candidatus</i> Phytoplasma aurantifolia-related strains (GD32; St_JO_10, 14, 17; PPT-SA; Rus-343F; PPT-GTO29, -GTO30, -SINTV; Potato Huayao Survey 2; Potato hair sprouts)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
<i>Candidatus</i> Phytoplasma fragariae-related strains (YN-169, YN-10G)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
<i>Candidatus</i> Phytoplasma pruni-related strains (Clover yellow edge, Potato purple top Akpot7, MT117, Akpot6; PPT-COHP, -GTOP)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Chilli leaf curl virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato black ringspot virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus B	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus H	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus P	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus T	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato yellow dwarf virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato yellow mosaic virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato yellow vein virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato yellowing virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Tomato leaf curl New Delhi virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.

Tomato mosaic Havana virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Tomato mottle Taino virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Tomato severe rugose virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Tomato yellow vein streak virus	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus S (Non-EU isolates)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato virus X (Non-EU isolates)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
Potato leafroll virus (Non-EU isolates)	Viruses, viroids and phytoplasmas of <i>Solanum tuberosum</i> and other tuber-forming <i>Solanum</i> spp.
